☞ In the United States Circuit-Court at Lynchburg, Va., on the 18th inst., in the case of Tyson versus the Virginia and Tennessee Railroad Company, Judge Bond delivered the opinion of the court, refusing the preliminary injunction on the ground that the Atlantic Mississippi and Ohio Railroad Company should be made a party to the suit. The court granted leave to amend the bill in this respect.

MASS. CENTRAL RAILROAD

Notice to Railroad Contractors.

Proposals for the Grading, Culvert Masonry and ordinary bridging on the Massachusetts Central Railroad will be received until November 29, at my office, in the town of Hudson, Mass., where Profiles, Plans and Specifications may be seen on and after Wednesday, November 22.

Proposals will also be received until the 15th of December, at my office in Boston, No. 10 Pemberton square, room 4, for materials to be furnished and work to be done in the construction of abutments and piers for the proposed bridge over the Connecticut River at Northampton. Plans and specifications may be seen at the Boston office after November 22, 1871.

N. C. MUNSON,
Contractor.

Chesapeake & Ohio Railroad.

NOTICE TO BRIDGE BUILDERS.

SEALED PROPOSALS will be received by the undersigned at Richmond, Va., until 12 M., Dec. 6, 1871, for about 2,000 feet of IRON BRIDGING, in spans of from 20 to 130 feet.

Proposals for any part or for all will be received.

These bridges are for the extension from White Sulphur Springs to Millers Ferry on New River, West Va.

Circulars containing a description of the spans, etc., can be had from

TO INVESTORS.

BANKING HOUSE OF JAY COOKE & Co.,
114 SOUTH THIRD STREET, Philadelphia.

The 7-30 bonds of the Northern Pacific Railroad, which have now taken their place among the solid and favorite securities of the country, have the following leading features:

They are a first and only mortgage on the road, its equipments and earnings, and, also, as fast as the road is completed, on 23,000 acres of land to each mile of track; they bear interest at the rate of 7 3-10 per cent.; both principal and interest are payable in gold, the principal in thirty years from 1870, and the interest semi-annually (January and July), at the banking houses of Jay Cooke & Co., Philadelphia, New York, and Washington.

They are exempt from United States tax, and are issued of the following denominations: Coupon, $100, $500, and $1,000; Registered $100, $500, $1,000, $5,000, and $10,000. They are at all times receivable at *ten per cent. premium* (1.10) in exchange or payment for the Company's land at the latter's lowest cash price. The proceeds of all sales of lands are required to be devoted to the purchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of of the Road, exceeding Fifty Million Acres, constitutes an Immense Sinking Fund, which will probably cancel the principal of the Company's bonded debt before it falls due.

All marketable Stocks and Bonds will be received at their highest current price in exchange for Northern Pacific Seven-Thirties. EXPRESS CHARGES on Money or Bonds received, and on Seven Thirties sent in return, will be paid by the Financial Agents. Full information, maps, pamphlets, etc., etc., will be furnished on application by any agents for the Loan or the Financial Agents of the Company. There are agencies for the sale of the Bonds in nearly every city and important town in the country. Investors can, at their option, order the Bonds through their local banker or directly from Jay Cooke & Co.

With the same confidence with which they have recommended United States Government Bonds to the public, the undersigned now recommend these securities to all classes as an investment combining a profitable return with absolute safety.

JAY COOKE & CO.,

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY,
PHILADELPHIA, NEW YORK, WASHINGTON.

Lynchburgh and Danville Railroad.

At the annual meeting of this company held at Danville (Va.) on the 22d ult., a resolution was adopted accepting the provisions of the act of Virginia of January 14, 1871, authorizing the consolidation of the Lynchburg and Danville Railroad with the Orange, Alexandria and Manassas, under the name of the Virginia and North Carolina Railroad Company. The old board of directors, with Col. J. S. Barbour as president, was re-elected. Col. Sharpe, representative of the Statesville and Danville road, being present, a resolution was passed extending a cordial greeting, and pledging to that road ready co-operation.

☞ The new Railroad from Williamstown to Atco, on the Camden and Atlantic road, is now being graded, a large force of workmen having been placed on the line.

Pittsburgh, Ft. Wayne & Chicago Railway Special Improvement Stock.

As stated by us last week, the Pittsburgh, Port Wayne and Chicago Railway Company will issue on and after December 21, 1871, 20,000 shares of new stock, to be designated as "Special Improvement Stock." In making this announcement to the N. Y. Stock Exchange on the 22d ult., the president of the company says:

This issue is made in conformity with Article 16 of the lease of the railway of this company to the Pennsylvania Railroad Company, and represents actual cash values of property placed upon the railway by the lessee, the title to which property is now in this company.

The shares are to be one hundred dollars each, entitled to dividends of seven per cent. per annum, payable quarterly, free of all taxes, from the means provided by the Pennsylvania Railroad Company, as stipulated in an agreement of said company, a certified copy of which is indorsed on each certificate; but this issue is in all respect subject to the original or guarantied stock to have distributed to it in quarterly instalments an annual dividend fund of $1,880,000 free of all taxes.

The following is a copy of Article 16 of the lease of the Pittsburgh, Fort Wayne and Chicago Railway to the Pennsylvania Railroad Company, under which the issue is made of the special improvement stock:

ARTICLE XVI.—"The party of the first part hereby agrees that, for the purpose of enabling the party of the second part to meet the obligations of the party of the first part to the public by making, from time to time, such improvements upon and additions to the said Pittsburgh, Fort Wayne and Chicago Railway, in the extension of facilities for increased business by additional tracks and depots, shops and equipments, and the substitution of stone or iron bridges for wooden bridges, or steel rails for iron rails, the party of the first part will issue, from time to time, a special stock, which shall bear such name as shall hereafter be agreed upon, or bonds, or other securities, which shall be issued in such form, as may, from time to time, be found to be most available with respect to economy of interest and negotiability, and shall be consistent with the legal powers of the party of the first part and the rights secured by these presents; which special stock, or bonds, or other securities, shall be issued on the conditions following: The said party of the second part shall guarantee the payment, semi-annually or quarterly, thereon of such rate of interest as may be agreed upon be-

tween the parties hereto, to be paid by the said party of the second part to the holders thereof, without deduction from the rent hereinbefore reserved; and the said special stock, or bonds, or other securities, shall be issued only in respect to improvements of and additions to the said railway which, and estimates and specifications of which, shall have been submitted to and approved by the said party of the first part, in writing; and all such improvements or additions shall be made in such manner as shall be approved by the said party of the first part. The party of the first part shall not at any time, during the term aforesaid and the continuance of this lease, make or issue any bond or obligation, in addition to the bonds hereinbefore specified, except subject to this lease, without the consent in writing of the said party of the second part first had and obtained thereunto."

The following is a copy of the agreement of the Pennsylvania Railroad Company in regard to said stock:

The Pennsylvania Railroad Company having, in pursuance of Article 16 of the lease of the Pittsburgh, Fort Wayne and Chicago Railway Company, requested the preparation and issue, from time to time, of a Special Improvement Stock to it, the said Pennsylvania Railroad Company, or to its order, for the benefit of each and every person who may become a holder of said Improvement Stock, after the same is issued to said Pennsylvania Railroad Company, or to its order, that the said Pennsylvania Railroad Company, its successors or assigns shall and will provide and pay to the said Pittsburgh, Fort Wayne and Chicago Railway Company quarterly, to wit, on or before the first day of January, April, July and October, in each and every year, an amount sufficient to pay quarterly dividends at the rate of 7 per cent. per annum upon said Special Improvement Stock, as free of taxes as the dividends upon the original or guaranteed stock of said Pittsburgh, Fort Wayne and Chicago Railway Co., are made payable by the provisions of said lease, which payment shall be made quarterly, in each year, after providing for and in addition to fully paying or providing for the payment of the regular quarterly dividends payable upon the original or guaranteed stock of the said railway company, for which original guaranteed stock a dividend fund of $1,380,000 per annum is inviolably pledged and set apart under the provisions of said lease bearing date June 7th, 1869.

And it is further agreed, that all needful expenses connected with the said Special Improvement Stock, the issue of certificates therefor and the payment of dividends thereon, shall be borne and paid by the Pennsylvania Railroad Co.

The promises and agreements herein before set forth are made by the said Pennsylvania Railroad Co., not only to and with the said Pittsburgh, Fort Wayne and Chicago Railway Co., but to and with each and every person who shall become a holder of the said Special Improvement Stock.

A copy of this agreement shall be printed on the back of each certificate, and the Transfer Agents of the Pittsburgh, Fort Wayne and Chicago Railway Company may and they are hereby authorized to certify on behalf of the Pennsylvania Railroad Company, as well as of the Pittsburgh, Fort Wayne and Chicago Railway Company, on each and every certificate for Special Improvement Stock issued from time to time under the provisions hereof, that this agreement has been duly executed by the Pennsylvania Railroad Company, under its corporate seal.

In witness whereof, the said Pennsylvania Railroad Company has caused its corporate seal to be hereunto affixed, and these presents to be signed by its President and Secretary, this 28th day of October, 1871.

J. EDGAR THOMSON, President.

☞ The New York State Canal Board have resolved to close the Canals on the 9th of December, if not sooner closed by ice.

Boston and Maine Railroad.

The following is a comparative statement of the earnings and expenses of this road for twelve months ending May 31, 1870, and for sixteen months ending September 30, 1871. The financial year of the company now closes at the last named date, and corresponds with the time for making the annual return to the Legislature of Massachusetts. In consequence of this new arrangement, the directors have declared a dividend of three dollars per share, net, out of the profits of the four months ending September 30th, payable November 15th. Hereafter it is proposed to make semi-annual dividends, payable in May and November. During the year ending May 31, 1871, the receipts from all sources amounted to $1,964,922 56, which exceeds the amount of the previous year by $98,860 86. The gross revenue for the sixteen months is $2,721,495 77, as follows, viz.:

	Twelve months, 1869-'70.	Sixteen months, 1870-71.
From passengers	$1,113,119 32	$1,562,613 41
" freight	693,851 86	1,031,497 76

Reserved for the purchase of rails and unadjusted liabilities, etc		203,000 00
Leaving net earnings for 16 months		$614,591 52
Deduct two dividends of five per cent. each	$455,000	
Deduct one dividend of three per cent	150,000	
		605,000 00
Balance		$9,591 52
Add balance May 31, 1870		1,002,978 77
Total, as in General Balance Sheet		$1,012,570 29

The above balance of $1,012,570 29, is invested as follows: in Newburyport Railroad bonds, $303,750; in Danvers Railroad bonds (guaranteed by this corporation) $73,000; in the Danvers Railroad contract and stock, $27,480; in the Dover and Winnipiseogee Railroad stock, $258,464 48—and the remainder in expenditures on the road, rolling stock, etc., in addition to the capital received from the sale of stock. It is therefore only an element indicating, in some measure, the value of the stock above par; but it is not available for the payment of debts or dividends. The report says:

Since our last annual report the passenger depots at Reading and Malden have been finished. They are in good style of architecture, and are suitable to the purposes for which they were built.

New passenger depots have been erected in Somerville, Wakefield Centre, Wakefield Junction, and at the Gonic Station in Rochester, N. H. One is also in process of construction at Plaistow.

We have formerly stated that a new passenger depot was much needed in South Lawrence; that will soon be supplied. Contracts were made early in the season for the erection of a brick building a for passenger depot, and rooms for a dining and refreshment saloon. It will be an ornamental and useful structure. The whole outlay there, including drainage, fixtures for water, and also for the dining and refreshment saloon, platforms, &c., will be about twenty thousand dollars.

A dwelling house has been erected at Somerville, on our land hitherto occupied. It is tenanted by the man having charge of that section of the road, for whom it was built.

A new freight house will be finished soon at Reading. Extensive additions to the car shops at Lawrence will at once be made to facilitate the manufacture and repair of cars. Repairs, and, in some cases, additions have been made to the buildings and other structures along the line of the road, as occasion required.

It has been our object to keep the property in good condition, and to replace old by new structures, as fast as could conveniently be done. This process should continue until all the depot buildings shall be in good and satisfactory condition.

The work upon the new location and double track between North Andover and the bridge over Merrimack River is progressing. We hope to have it done before winter sets in. It is necessarily a slow, difficult and expensive piece of work.

A new iron bridge has been placed under the track across the Shawsheen at North Andover; and one is soon to be placed under the track across the canal at North Lawrence. These are furnished by the Swamscot Machine Company of South New Market.

A new draw, thirty six feet in width, has been put in the bridge over Charles River, as required by a recent law of the Legislature of this State. The cost will be about $33,000. The draw in Mystic River has also been repaired with new trusses.

The freight track timbers on Charles River bridge have been renewed this year. The passenger track timbers there were recently renewed, as stated in previous reports. The track timbers on the westerly side of Mystic River bridge have been wholly relaid with new timber. The other half will be renewed another year. These renewals have been entirely with the best Southern pine, and it is hoped it will endure longer than the Northern pine.

The track timbers on the bridge over Merrimack River have been entirely renewed, and other repairs have been made at a cost of several thousand dollars. New turntables have been made for Dover, Great Falls and Alton Bay.

A new coal slide has been constructed on the east side of the bridge and island near Boston. We now have four slides, with an engine to each, occupied in the coal hoisting business.

The steel rails heretofore laid down upon our road have thus far proved satisfactory. But in order to keep the track in good condition, under the greatly increased traffic, the outlay for rails, continue to be very great.

Our rolling stock increases in proportion to the demands of the public.

It consists of fifty locomotives, eighty-eight

passenger cars, sixty-eight of them with monitor tops—twenty-three baggage cars, and ten hundred and fifty-five regular merchandise cars, in addition to many gravel and other cars not used for general merchandise.

In our last annual report it was stated that the Portland, Saco and Portsmouth Railroad Company had taken measures to terminate the contract of April 1, 1847, by serving a notice upon us, and also upon the Eastern Railroad Company, in the manner provided therein. In pursuance thereof the contract was terminated January 20, 1871. Our claim for betterments under the contract, which is of large amount, has not been adjusted. As a competent tribunal is provided in the contract, no difficulty is anticipated in its settlement.

Soon after the service of the notice in July, 1870, your directors endeavored to induce the directors of the Eastern Road to unite with us in making a new contract. We need not here go into the subject in detail. We will simply say that our efforts were in vain. And all attempts to make a separate contract with the Portland, Saco and Portsmouth Railroad Company were equally unavailing.

Consequently, after January 20, 1871, as our road extended only to South Berwick Junction, a point thirty-eight miles this side of Portland, we became merely a connecting road, a side line connecting with the Eastern Line between Boston and Portland.

Under these circumstances, looking at the great importance of the Eastern business in the future, it was thought advisable to apply to the Legislature of Maine for leave to extend our road into Portland.

The authority was granted by a liberal charter. At a special meeting of our stockholders, holden at Lawrence, March 16, 1871, the act of the Legislature of Maine was accepted by a stock vote of 10,405 yeas to 119 nays.

In pursuance of instructions then given, your directors proceeded, "at the earliest date consistent with economy," in the preparations necessary to construct the extension. Preliminary explorations and surveys commenced on the first of April and continued with several parties in the field until early in August, when the directors personally examined the country through which it was proposed to construct the road. The line was agreed upon. It has been definitely run out, and the location in York County is approved by the County Commissioners. That portion of it in Cumberland County will be submitted to the Commissioners of that County at once.

Favorable contracts for grading and masonry, to be executed by June 1, 1872, have been made and work is now in successful progress along the line of the extension. Your directors anticipate much permanent advantage in having an independent road between Boston and Portland.

Treasurer.—A. BLANCHARD.

Superintendent.—WILLIAM MERRITT.

The Virginia and Tennessee Railroad Injunction Case.

In the U. S. Circuit Court, at Lynchburg, Va., on the 18th ult., Judges Bond and Rives presiding, the preliminary injunction prayed for by James E. Tyson, of Baltimore, against the Virginia and Tennessee Railroad Company was denied. The technical ground for the denial of the injunction seems to be the failure of the complainant to make the Atlantic, Mississippi and Ohio Railroad Company, (into which the Virginia and Tennessee with other roads was consolidated by act of the Legislature of 1870,) a party to the suit, but Judge Bond, in delivering the opinion of the Court, went somewhat into the merits of the case, and indicated pretty clearly what the decision of the Court would be upon a final hearing. Under the act the new consolidated company was authorized to issue $15,000,000 in bonds, which the president, Gen. Mahone, had arranged to negotiate in New York, to be applied to the repair and extension of the roads. Judge Bond said:

So great pecuniary interests are involved in this suit, and the danger of loss to one of the parties, at least, if the proper persons were made parties, would be so serious and immediate, that the Court is inclined at once to determine the motion before it, without attempting to decide any of the other questions affecting complainant's rights, which have been elaborately argued, and which will be more directly before the Court at the final hearing of the cause.

What the Court is now asked to do is to enjoin these new defendants, provided they are made parties as they should be, by a preliminary injunction from proceeding to execute any of the powers and franchises alleged to be granted to them by the act of 17th June, 1870, pending the suit.

This is to invoke the extraordinary power of this Court, which ought not to be exercised unless the injury threatened the complainant be immediate, serious and irreparable; and not then, if the damage to the defendants is likely to be greater than that of complainant, and equally immediate, serious and irreparable.

It seems to the Court that the complainant has neither of these reasons for asking the Court to exercise this power in his behalf.

Whatever has been done by the defendants respecting the stock or property of the Virginia and Tennessee Railroad Company, was done or was contemplated to be done twelve months before the complainant purchased his stock in the road, and the former owner of his shares was a participant in part of the proceedings which led to defendant's action. Complainant had full notice of what defendants were about to do, and if, under these circumstances, he purchased his stock in the Virginia and Tennessee Railroad Company, he voluntarily put his interest in jeopardy, and cannot call upon the Court to exercise its extraordinary powers to protect him, pending a suit to determine his jeoparded rights, which had been in danger, if at all, twelve months before he voluntarily purchased them.

It is manifest to the Court that the danger of loss to defendants in case the Court should exercise the power invoked, if at the final hearing its judgment should be for defendants, is likely to be more serious and irreparable than any possible loss to complainant.

Credit is a delicate thing. Confidence in the power and right of defendants to make the pledges they have made to raise the money authorized by the act of June 17, 1870, is absolutely necessary to the success of the loan.

In this suit defendants have at stake millions of dollars, while the complainant at the commencement of the action had but five shares of stock, which he alleges in his bill are in immediate danger of depreciation in value by defendants' conduct, which danger was not great enough to prevent his purchasing fifty shares more since the suit began.

Under these circumstances the Court is of opinion that the complainant has no right to ask the Court to exercise this extraordinary power.

Whatever rights or interests the complainant may have are in no danger of great or irreparable loss.

They may be fully determined and secured at the final hearing, without the aid of preliminary injunction, and the Court will refuse the motion.

The opinion of Judge Rives, while concurring with that of Judge Bond, embraced in its scope substantially an assertion of the legality of the consolidation act, and the fact that the complainant had no right to expect any redress at the hands of the defendants other than compensation for his stock at its market value. The Lynchburg *Republican* congratulates its readers at the results of the trial, and says:

It has seldom been our fortune to publish tidings of greater joy than we are privileged to do this morning. For four days the public mind has been stretched to its utmost tension in view of the tremendous consequences involved in the decision of the great Tyson injunction case, under discussion in the United States Circuit Court. Our pen is incapable of depicting the terrible calamities which a decision of this case adverse to the railroad company would have brought about, and now that the case has been fully argued and the injunction denied, the people of Virginia have reason to "rejoice and be exceedingly glad."

Released from legal obstacles, we doubt not that Gen. Mahone will immediately push forward the full restoration of his completed line, and make a vigorous beginning on the construction of the Cumberland Gap Road. The friends of the line all over the State can rejoice that its increasing usefulness in the development of material wealth is fixed upon an immovable basis.

☞ The notice issued by the Michigan Central Railroad Company, October 10th, that holders of Jackson, Lansing and Saginaw Railroad bonds could exchange them for those of the Michigan Central Company, twenty-five years to run, has been withdrawn, and it is understood that the contemplated exchange will not be made.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

American Railroad Journal.

Saturday, December 2, 1871.

Stock Exchange and Money Market.

Money has been in less liberal supply and has been quoted firmer in price, call loan rates ranging from 5@7, with the bulk of the latter negotiations at 6@7, and strictly prime to good discounts at from 7@10 per cent. per annum. The demand for accommodation has been rather more urgent particularly from speculative borrowers. There has been a considerable outflow of currency to the interior, for trade and commercial purposes, which has unfavorably affected the reserves of the city banks, which, in their last weekly returns, showed a loss of nearly 1½ millions of legal tender notes, with a slight reduction of their special hoard, and a small addition to their deposit item. Their loan and discount averages, were enlarged nearly 24 millions. The U. S. Sub-Treasury office added $568,798 to its coin and $651,729 to its currency balances, as the result of the week's business which absorption of specie and lawful money also told against the resources of the banks. The city banks, in their latest return, show a reduction of $1,486,600 of legal tender notes, and $16,500 of specie, with an increase of $42,900 of deposits; also an addition of $2,199,200 to their loan and discount averages, and a reduction of $49,100 in their item of circulation. The city bank exchanges, last week, averaged $89,657,725; and for, thus this week, 86½ millions daily. The banks now hold $7,590,125 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $16,222,300, against $18,222,617 same time last year. The city bank deposits are now $219,220,800 against $194,415,073 week ending Nov. 26, 1870. The legal tender reserve amounts to $53,694,900 against $51,826,556 same time last year. The circulation now stands at $30,089,500, against $32,353 679 same time last year. The loans are now $288,408,700, against $264,608,116 at this date last year.

The U. S. Sub-Treasury enlarged its currency balance $651,729 and its coin reserve $563,798, as the result of the week's business. The receipts of the office were $5,756,793 in coin, and $4,035,257 in currency; payments, $5,192,995 in coin, and $4,035,257 in currency. The office received $2,406,000 in coin or its equivalent, from customs; and disbursed $2,187,043 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,049,372 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $368,288,200; and as security for deposits of public money, United States bonds for $15,279,000. The aggregate of the outstanding circulation of the National Banks of the country is $325,605,600.

Government revenues have been on a moderate scale, since our last. The excises yielded last week about 2¾ millions, and thus far since July 1. $55,006,777. The customs at the port of New York, last week were $2,256,372; and at the outports, equal to about $700,000 more, all in coin, or coin certificates.

The Gold movement has been moderately active, but closed tamely. With a lighter offering of coin for prompt delivery, however, the price has shown more steadiness. The speculative call has been fair. The customs drain has been under half a million a day. The export of specie has been light. The range of the price during the week, has been from 110⅜@111⅜ and the closing quotation on Wednesday was 110½ against 110¾ the preceding Wednesday. The specie outflow, last week, was $380,929; on Tuesday of this week, $———; and on Wednesday $———. The Gold Exchange Bank clearances have averaged 81¾ millions a day.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Nov. 25th, 1871, $81,026,823, against $81,995,336 same time in 1870.

The export drain of specie was $380,929 last week, against $449,984, same week preceding year. The shipments since January 1, 1871, have been $61,609,502, against $56,016 460 same time in 1870.

The Treasury Department on Tuesday held a coin reserve of $93,400,000, and a currency balance of $6,500,000.

The customs demand for Gold last week, averaged $401 170 a day; thus far, this week, it has averaged $350,000 a day, or equal to a weekly aggregate of $2,100,000. The arrivals of

specie from Europe, Havana and other foreign ports last week were $12,683, and since Jan. 1, 1871, $8,422,001 against $11,284,976 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $144,309,962 against $130,723,112 same time in 1870.

Foreign exchange has been less inquired for and quoted easier. Bankers' sixty day bills on London closed on Wednesday at 108⅞@109; sight bills on London, 109⅝@109¾.

On Tuesday, Government bought in no bonds, the Secretary of the Treasury declining to accept the proposals, as they were above par in gold. The amount of bonds offered was $2,252,100 at from 110 74@111 05.

Government securities have been offered sparingly yet have shown rather less firmness, on an unusually limited volume of dealings, both at the Stock Exchange and through private channels.

U. S. sixes of 1881 closed here on Tuesday of the current week at 117⅜@117⅝; U. S. Five-Twenties of 1862, (other than the bonds called in) 111¼@111½; U. S. Five-Twenties of 1864 at 111¼@111⅜; U. S. Five-Twenties of 1865, 111½@111¾; U. S. Five-Twenties of 1865 consolidated, 113½@113¾; U. S. Five Twenties of 1867, 114½@114¾; U. S. Five-Twenties of 1868, 114⅝@114⅞; U. S. Ten-forties at 109⅝@109⅞; U. S. Six per cent. currency bonds, 118¼@118⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 15.	Nov. 22.	Nov. 28.

" 10-40s	90⅛	90¼	90⅛
Erie	26	25⅝	25⅜

The new Funding Five per cent. Loan was quoted in London on Tuesday at 1 1/2 per cent. discount.

State bonds have been in less demand and unsettled in price.

Railway bonds have been in fair investment demand especially through the commission houses, at well supported prices. Central Pacific Sixes have been in good request closing strong, on the basis of 103½@103¾, on light offerings of the Bonds. Chesapeake and Ohio Sixes have been quite freely purchased, for investment purposes, at 94 per cent. and accrued interest.

Railway and miscellaneous share property has been less freely dealt in and has been irregular in price.

General business has been moderately active, Breadstuffs have been depressed in price. Provisions closed with some show of steadiness. Middling upland cotton closed on Wednesday at 19⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 818,223 bales, against 962,667 bales same time in the preceding year; exports 321,856 bales, against 457,547 bales in the previous year; stock at the ports at latest dates, 361,115 bales, against 343,759 bales same date 1870.

At the Live Stock Markets, Beeves have been in less demand at from 8¼@12cts.; Veals at 5@10½ cts.; Sheep at 4@6¼ cts.; Lambs at 5¼@7¼ cts.; Swine, at 4⅜@4⅝ cts. per lb., all live weight. The week's receipts were 9,226 Beeves, 1,752 Veal Calves, 29,757 Sheep and Lambs; and 54,214 Swine.

Foreign goods have been moderately sought after at generally unchanged rates. The week's imports of foreign goods reached $6,891,411, including $2,256,155 of dry goods.

Ocean freights have been moderately active and rates have been quoted firmer.

At the auction sale of Scranton Coal on Wednesday, 100,000 tons were sold at a further reduction in prices, the range having been from 3.35 @ 5.25 per ton.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Defense Loan, 1883, 105¼@106; City Passenger R. R. 23@—; George's Creek Coal, 78@82¾.

☞ The Boston and Albany Railroad Company have decided to issue but $1,500,000 twenty year 7 per cent bonds, instead of $3,000,000 as originally proposed, and the time for receiving tenders extended to December 5th. The bonds will be dated Feb. 1, 1872, at which time payment must be made, and the bonds will be delivered, but parties can anticipate payment after allotment, and draw 7 per cent. interest.

☞ The freight cars on the Western Maryland railroad now run to within eight or ten miles of Hargerstown. The road will be finished to Hagerstown, and trains running, by New Year's Day.

Trautwine's Engineer's Pocket-Book.

We feel that we cannot confer a greater favor on those of our readers who are engaged in any branch of the arts and manufactures, and particularly in civil engineering, building, architectural works, &c., than by acquainting them with the fact of the publication, by Claxton, Remsen & Haffelfinger, Philadelphia, of the Civil Engineer's Pocket Book, by Jno. C. Trautwine, Civil Engineer.

It is scarcely necessary for us to say that a work of this kind could not have emanated from a more competent source.

Mr. Trautwine has for many years been engaged on some of the most difficult engineering works of modern times. The railroad across the Isthmus of Darien is a proof, not only of his skill, but of his indomitable energy and perseverance. In the face of difficulties and dangers that would have appalled even ordinarily brave men—with his assistants and workmen falling around him from the fatal Chagres fever; with rains that continue three hundred days in the year and the whole country inundated, and surveys and observations made only from boats—this brave man persevered and completed this highway of nations. He subsequently made a reconnoissance of the Isthmus, with a view to finding a feasible route for a ship-canal. After a careful investigation of the various routes, he pronounced the scheme impracticable, unless at an expenditure of capital beyond the hope of a remunerating return. This opinion has been fully corroborated by subsequent explorers. Mr. T. has been engaged on innumerable other engineering works of the greatest magnitude, and this work is, therefore, not (as is too frequently the case) the mere reproduction of the labor of others, but is, to a greater extent than any recent work of the same kind, an original work. The tables in this work are mostly new, and the old ones have been entirely recalculated for this work and many important errors detected. Some idea of the scope and comprehensiveness of this work may be obtained from the fact that the index, or table of contents, greatly condensed, comprises fifteen pages closely printed, in double column. Among the subjects fully discussed are the strength of iron and wooden pillars, with full tables; trusses for roofs and bridges; weights of bars, bolts, pipes, &c.; stone bridges, culverts, and arches; hydraulics, hydrostatics, force in rigid bodies, railroads, locomotives; leveling, surveying, tables of cubes, square roots, cube roots, traverses, sines and tangents, board measure, radii and curves, chords, logarithms, level cuttings, &c., &c.

The title of the work would seem to imply that it is intended principally for the use of professional civil engineers or the more advanced students in civil engineering alone, but this is by no means the case. The elementary principles of geometry, arithmetic, algebra, surveying, natural philosophy, mechanical engineering, &c., are very fully given; and the work possesses the great merit of avoiding, as much as possible, technical and scientific terms, whose meaning is unknown to the general reader, and besides there is appended to the work a very copious glossary.

The work contains six hundred and fifty pages of small type, and is bound in tuck or pocket-book style, and will no doubt find a place hereafter in the pocket or on the desk of every engineer machinist, or manufacturer. As the readers of this journal consist largely of these classes, we have deemed this work of sufficient importance to warrant us in bringing it thus prominently before them. As a specimen of neat typography, it does infinite credit to the publishers. It is impossible for us in so short a notice to do justice to a work of this kind, and we must therefore content ourselves by referring our readers to the work itself.—*Phila. Trade Journal.*

☞ The net earnings of the Pennsylvania and New York Canal Company (being the northern end of the Lehigh Valley Railroad), for the month of August were $64,100.

Duxbury and Cohasset R. R.

The annual meeting of this company was held in Boston on the 21st ult., the president, Hon. Onslow Stearns, in the chair, and Stephen N. Gifford, clerk. The following were chosen directors for the ensuing year: Onslow Stearns, Joseph O. Cole of Scituate, Nathanel N. Whiting of Marshfield, Stephen Gifford of Duxbury, Royal W. Turner of Randolph and Uriel Crocker of Boston. It was voted to enter into a contract with the South Shore and the Old Colony and Newport Railroad Companies for the transaction of joint business over the roads. Also to accept chapter 104 of the acts of the Legislature of 1871 authorizing the extension of the road to Kingston. Also to authorize the directors to issue bonds to be secured by a mortgage of the road under the provisions of chapter 47 of the acts of 1870. The president made a statement of the financial condition of the road, from which it appeared that the road had been constructed at a probable cost, when all bills are paid, of $375,000, which is $25,000 less than the estimate.

☞ The West Wisconsin Railway, which forms the chief link in the new and short through route from Chicago to St. Paul and the great North-West, will be completed, equipped, and in running order by the middle of November. The iron is down to within 10 miles of Hudson, and is being laid at the rate of a mile a day, and the grading throughout is finished. One hundred and twenty miles have been in operation for a year, and had a large and profitable local business, and a still larger amount awaits its completion through St. Croix County to the shore of the lake. The lumber traffic this winter will be very heavy. Immense quantities are already piled up at the mills on the line of the road awaiting the completion of the connection with St. Paul when it will be distributed over the treeless prairies of Minnesota and Iowa. Besides this local business the West Wisconsin will get a large share of the traffic between St. Paul and the North-West and the Lakes. It is a hundred miles shorter than the present line, and has direct connections with Chicago. The road has a valuable Land Grant of 1,000,000 acres in the best part of Wisconsin. This grant with the Road itself, is pledged in support of the First Mortgage 7 per cent. Gold bonds which may be bought at 90 and accrued interest in currency of White, Morris & Co., No. 18 Wall st., and Gwynne, Johnson & Day, No. 16 Wall st., Agents to the Company.

☞ The regular schedule of passenger trains on the Western Division of the Chesapeake and Ohio Railroad, between Huntington on the Ohio, and Charleston, the capitol of West Virginia, commences Dec. 4. The whole line from the seaboard to the Ohio navigation will be ready in the summer of 1872, and the Lexington extension to Louisville very soon thereafter.

☞ It is currently reported in San Francisco that the Stockton and Copperopolis and the Stockton and Visalia Railroads have been sold to the Central Pacific, which, with the exception of a short line in Los Angeles, now owns every rod of railroad in California.

☞ The Chicago and Northwestern Railway Company have declared a semi-annual dividend of 3½ per cent on the preferred stock, less government tax, payable December 28th.

☞ The Salem (N. J.) Railroad company have declared a semi-annual dividend of three per cent, payable December 4th.

HARVEY FISK. A. S. HATCH.

FISK & HATCH, Bankers,
No. 5 Nassau-st., New York,
Nov. 25, 1871.

The scarcity of, and demand for, really desirable *six per cent. gold* bonds for solid and permanent investments, are evinced by the fact that

Five-twenty Bonds of 1867 are selling at..115
Central Pacific Bonds are selling at.....103½
Chesapeake and Ohio Bonds are selling at 94

These bonds all pay both principal and interest in New-York City, in United States gold coin, and are equally safe for investment.

The reason why Five-twenty Bonds are so high is because no more can be issued, and the outstanding amount is being rapidly decreased by purchases by the Government from their surplus revenues.

The reason why we think Central Pacific Bonds will in time advance to the price of Five-twenties is because no more can be issued; while the operation of their Sinking Fund will soon commence to decrease the amount.

The reason why Chesapeake and Ohio Bonds are selling so low, comparatively, while equally safe, is because the Company are selling Bonds to complete the road. They will all be sold in a short time, and in a few months the road will be finished, when we have no doubt the same result will follow as with Five-twenty and Central Pacific Bonds. The sinking fund of the Chesapeake and Ohio must go into effect within one year after the completion of the road.

The Chesapeake and Ohio Bonds are issued either coupon or registered—the denominations are as follows:

$100, which cost to-day.....$94 40
$500, which cost to-day.....471 97
$1,000, which cost to-day.....943 95

We buy and sell Government and Central Pacific Bonds, and receive them in exchange for Chesapeake and Ohio Bonds.

Accounts of Banks, Bankers and others received on which we allow interest at the rate of four per cent. per annum.

FISK & HATCH.

Cleveland and Pittsburgh Railroad.

The Cleveland and Pittsburgh Railroad, recently leased to the Pennsylvania Railroad Company, a distance of 124 miles, with branches from Yelextends from Cleveland, Ohio, to Rochester, Penn., low-Creek to Bellair, 48 miles, and from Bayard to New Philadelphia, 32 miles. It enters Pittsburgh, however, on the track of the Pittsburgh, Fort Wayne and Chicago Railway, over twenty-six miles of which, from Rochester, it has had the right of running trains. The entire mileage of the company, which will be turned over to the Pennsylvania Company on the 1st of December, is 199 miles. By the terms of the lease the Pennsylvania will pay the interest on the bonded debt of the Cleveland and Pittsburgh (about $3,800,000), and seven per cent. dividends, free of tax, on the capital stock increased by 42.85 per cent.—which will give an income of ten per cent. on the present share capital—about $7,500,000.

☞ The completion of the West Wisconsin Railway from Tomah to Hudson, Wisconsin, was duly celebrated on the 28th inst.

Journal of Railroad Law.

RAILROAD COMPANIES—CONNECTING ROUTES. WHEN RESPONSIBILITY BEGINS AND ENDS.

The facts of the late case of Root *vs.* The Great Western Railway Company, (2 Lansing, 199,) are fully and clearly stated in the following opinion by

JAMES C. SMITH, J.—The plaintiff's property, which the defendants received for transportation, was directed "Burr Oak, Michigan," a place on the line of the Michigan Southern Railroad. The road of the Michigan Company and that of the defendants were connected together at Detroit, and the Michigan Company was under an agreement with the defendants to carry freight arriving at Detroit by defendants' road to places along its line. For this purpose defendants, pursuant to the agreement, were accustomed to deliver their freight at the warehouse of the Michigan Company at Detroit, and the latter received it there and transported it to its destination, collecting the entire charges for freight on both roads at the place of destination, and at stated periods the Michigan Company settled with the defendants and paid them their share of the freight thus collected. The defendants having received the plaintiff's property for transportation under these circumstances without any express contract or limitation of their liability, and in the ordinary course of their business as common carriers, impliedly contracted for its carriage to its place of destination. The agreement between the two companies, and their custom, in pursuance of their agreement, distinguishes the case from that of Van Santwood *vs.* St. John, (6 Hill, 157,) and others cited by the appellant's counsel. The agreement between the two companies created reciprocal obligations as between themselves, the defendants being bound to deliver to the Michigan Company for transportation all property coming over their road destined to points on the line of the Michigan Company, and the latter being bound to receive such property and carry it to its destination and also to collect the freight earned by the defendants in respect to it, and to account to them therefor. Had such a connection existed between the river boats and the canal line in Van Santwood *vs.* St. John, it is obvious from the course of reasoning adopted in the published opinion that the decision of the case would have been the reverse of what it was.

But if there is any doubt concerning the defendant's liability independently of statute, the existence of such liability under the provisions of the act of 1847 (ch. 270) seems to me undeniable. The act referred to provides that whenever two or more railroads are connected together, any company owning either of said roads receiving freight to be transported to any place on the line of either of said roads so connected shall be liable as common carriers for the delivery of such freight at such place. The act further provides that in case any such company shall become liable to pay any sum by reason of the neglect or misconduct of any other company or companies, the company paying such sum, may collect the same of the company or companies by reason of whose neglect or misconduct it became so liable. (§ 9.)

The defendant's counsel argues that the statute does not apply to the defendants for the reason that they are a foreign corporation, and the statute is evidently framed, it is said, with respect to domestic corporations and those only. Although the defendants are a foreign corporation, one terminus of their road is in this State, and at that point they received the plaintiff's property and made the contract respecting it, out of which, if at all, the liability arises, which the plaintiff seeks to enforce in this action. In respect to contracts made by the corporation within this State, the corporation is amendable to the laws of the State, and the act in question is applicable to such contract.

The act also applies, notwithstanding the company owning the connecting road (the Michigan Company) is also a foreign corporation, and its road is wholly without this State. This was held in Burtis *vs.* The Buffalo and State Line Railroad Company, (24 N. Y., 269). If, as is argued by their counsel, the defendants cannot avail themselves of the remedy over against the connecting road, given by the act, by reason of the fact that the defendants and the Michigan Company are foreign corporations, they might have protected themselves against liability for a loss occurring through the fault of the connecting road by an express contract to that effect, as suggested by Mr. Justice Denio in the case last cited.

It is also argued that the statute does not apply to the case, for the reason, that the loss was not owing to any neglect or misconduct on the part of the connecting company. But that circumstance does not relieve the company receiving the freight from liability to the owner.

The company receiving the freight for transportation to a point on the line of a connecting road, without any express limitation of its liability, by that very act becomes liable as a common carrier for the delivery of the freight at such point. It insures the property, on its transit, against all loss, except that arising from the act of God or the public enemy. Where the loss is caused by the neglect or misconduct of the connecting road, the insurer has a remedy over, by way of indemnity. In all other cases he must make good the loss, without recourse to any other party.

It is further argued, that the section referred to is simply declaratory of common law, and that the question, therefore, is whether by the common law, carriers are responsible for the delivery of property directed to points beyond their own route. But the statute creates a new rule. It makes the company receiving the property liable, as a carrier, in respect to the connecting road, as well as its own, unless it expressly provides otherwise by its contract.

Lastly it is insisted by the counsel for the defendants that the statute goes no further than to impose the liability in question upon the company originally receiving the property for transportation, to wit: in the present case, the New York Central Railroad Company.

If this position were correct, I should be inclined to the conclusion which the counsel deduces from it, that the plaintiff making a contract with that company, expressly relieving it from such responsibility, waived its right under the statute, or, at least, that the defendants having no notice of such contract, did not assume any other obligations than those which they would have incurred if such contract had not been made.

But I apprehend the true construction of the act, in this respect, is that each immediate carrier as well as the first, who receives property to be transported to a point on the line of a connecting road, without an express limitation of his liability is responsible for its transportation over his own, road, and also over every other connecting road, on which it must subsequently be carried to reach its place of destination. It is not material to his liability whether the previous carrier has been relieved from the responsibility imposed by the statute or not. The immediate carrier is not liable however, for loss or injury happening to the property while in the hands of a previous carrier; and this is all that was decided in the case of Smith *vs.* The New York Central Railroad Company, cited by the defendant's counsel (43 Barb., 225). Although the question now under consideration was suggested by my learned brother, who wrote the opinion in that case, his remarks upon it were merely by way of illustrating and enforcing his views of the real point in controversy. The question was not presented by the facts of the case, and consequently it was not before the court and was not decided.

There is no reported case, that I am aware of, in which the question has been adjudicated. As was said by Judge Denio in Burtis *vs.* The Buffalo and State Line Railroad Company, (*sup.*): "The act is eminently a remedial law, and should receive a liberal, as distinguished from a narrow, construction." The language of the clause on which this question depends is very broad. It applies to every case of railroads connected together, however many. It makes liable any company owning either of the railroads, receiving freight to be transported to any place on the line of either of said roads so connected, without limiting the liability to the company first receiving it. In short, as I read the act, each successive railroad company forming a link in the chain of communication between the place of freighting and place of destination, which agrees to carry property beyond the terminus of its road, and receives the goods under such an agreement, shall be liable as a common carrier for the delinquencies of each of the other roads running in connection with it, over which the property shall subsequently pass, on the route to the place of delivery.

The foregoing views of the case make it unnecessary to examine any other question presented by the points of counsel. I am in favor of affirming the judgment.

Judgment affirmed.

☞ The second installment of $100 per share on 1477 shares ($738,500) Boston and Lowell Railroad new stock (par $500), voted February 5, 1861, will be due Dec. 1. The three remaining fall due June 15 and December 1, 1872, and July 1, 1873. Seven per cent. interest is paid on installments, or 6 per cent. on any sums anticipated. The Boston and Lowell has three classes of stock; the "old," which carries a twenty per cent. scrip dividend, due October 1, 1873, and payable in cash or stock at the option of the company. Then the so called "new" in limited amount ($370 000), which is not entitled to the scrip dividend, and was created by the conversion since January 1, 1867, of the bonds of 1873. And the third class of the

above named issue, for which certificates will not be delivered until July 18, 1873.

Railways of Great Britain.

The returns by the Board of Trade of the capital, traffic, and working expenditure of the several railway companies in the United Kingdom for 1870 have just been issued. We there find that at the end of that period the total stock and share capital received amounted to £387,974,234, £229,282,150 of which was ordinary, £36,188,320 guaranteed, £122,503,764 preferential. The loan capital amounted to £141,934,439, viz., £90.713,779 by loans, and £51.220.660 by debenture stock, making a total of £529,908,673 share and loan capital. In 1850, or 20 years ago, it was £240,270,746, showing an increase in that period of £289,637,927.

The ordinary capital in England and Wales amounted to £194,591,487, of which £192,236,443 belonged to companies whose lines were open for traffic. Of this sum £22,399,661. or 12 per cent. paid no dividend at all; £55.051.790, or 29 per cent. paid under 4 per cent.; £15,844.944, or 8 per cent. paid 4 and under 5 per cent.; £4,029,024, or 2 per cent. paid 5 and under 6 per cent.; £56,630,412, or 29 per cent. paid 6 and under 7 per cent.; £31,507,364, or 16 per cent. paid 7 and under 8 per cent.; and £6,883,248, or about 4 per cent. paid from 8 to 12½ per cent. So that more than half the ordinary capital of the companies whose lines were open for traffic paid a dividend of 5 per cent. and more. The guaranteed capital amounted to £26,464,358, of which £3,756,360, or 14. per cent. paid 4 per cent. and under; £1,176,740, or 4 per cent. paid 4½ per cent.; $17,866,665, or 68 per cent. paid 5 and under 6 per cent.; and £3,654,593, or 14 per cent. paid from 6 to 8 per cent. The preferential capital amounted to £100,481,500, of which 11 per cent. paid no dividend at all; 30 per cent. paid 4½ per cent. and under; 51 per cent. paid 5 and under 6 per cent.; and 8 per cent. paid from 6 to 10 per cent. The debenture loans in England and Wales amounted to £71,842,935, and the debenture stock to £46,799,175.

In Scotland the ordinary capital amounted to £19,754,991, of which £6,894.336 or 35 per cent. paid no dividend at all; £6,907,728 or 35 per cent. paid under 4 per cent.; £1,188,771 or 6 per cent. paid 4 and under 5 per cent.; £4,049,479 or 20 per cent. paid 5 and under 6 per cent.; and £719,682 or 4 per cent. paid from 6 to 10 per cent. The guaranteed amounted to £9,514,745. of which 11 per cent paid under 4 per cent.; 22 per cent. paid 4 and under 5 per cent.; 36 per cent. paid 5 and under 6 per cent.; 23 per cent. paid 6 and under 7 per cent.; and 8 per cent paid from 7 to 10 per cent. The preferential capital amounted to £16,369,009, of which £518,661 or 3 per cent. paid no dividend at all; £3,288,188 or 20 per cent. paid under 4 per cent.; £4,576,636 or 28 per cent. paid 4 and under 5 per cent.; £6,085,775 or 37 per cent. paid 5 and under 6 per cent.; and £1,899,754 or 12 per cent. paid from 6 to 7 per cent. The debenture loans amounted to £14,002,592, and the debenture stock to £2,870,960.

In Ireland the ordinary capital amounted to £14,935,672, of which £2,849,311 or 19 per cent. paid no dividend at all; £4,102,536 or 28 per cent. paid under 4 per cent; £1,255 895 or 8 per cent. paid 4 and under 5 per cent; £6,877,980 or 48 per cent. paid 5 and under 6 per cent.; and £350,000 or 2 per cent. paid 9½ per cent. The guaranteed amounted to £219,217 only, which paid 4 and 4½ per cent. The preferential capital amounted to £5,653.255 of which £1 868,655 or 24 per cent. paid no dividend at all; £319,135 or 6 per cent. paid under 4 per cent.; $2 002,005 or 35 per cent. paid 4 and under 5 per cent.; £1,721,280 or 31 per cent. paid 5 and under 6 per cent.; and £242,180 or 4 per cent paid 6 per cent. The debenture loans amounted to £4,868,252, and the debenture stock to £1,550,525.

It thus appears that of the total ordinary capital for the United Kingdom 15 per cent. paid no dividend at all; 29 per cent. paid under 4 per cent.; 8 per cent. paid 4 and under 5 per cent.; 6 per cent. paid 5 and under 6 per cent.; and 42 per cent paid from 6 to 12½ per cent. Of the guaranteed 3 per cent. paid under 4 per cent.; 20 per cent. paid 4 and under 5 per cent.; 59 per cent. paid 5 and under 6 per cent.; and 18 per cent. from 6 to 10 per cent. Of the preferential 11 per cent. paid no dividend at all; 8 per cent. paid under 4 per cent.; 30 per cent. paid 4 and under 5 per cent.; 48 per cent. paid 5 and under 6 per cent.; and 8 per cent. paid from 6 to 10 per cent. From a statement at the end of the return we find that the debenture stock or funded debt is increasing very fast, having risen in ten years from £7,576,874 to £51,220,660, whilst the debenture loans or floating debts has decreased in three years from £110,392,559 to £90,713,779. The capital received per mile constructed was £84 106.

For the £529,908,673 subscribed there were 15,537 miles of railway constructed in the United Kingdom, 11,043 being in England and Wales, 2,519 in Scotland, and 1,975 in Ireland. The total number of passengers conveyed was 330,004,398 (exclusive of 156,403 season or periodical ticket holders), of whom about 10 per cent. traveled first-class; 22 per cent. second-class; and 68 per cent third-class. In England and Wales 283,682,921 passengers were conveyed (exclusive of 118,110 season-ticket holders), of whom 27,004,386 or 9 per cent. travelled first-class; 66,736,823 or 23 per cent. second-class; and 194,891,712 or 68 per cent. third-class. In Scotland there were 27,046,864 passengers, of whom 12 per cent. were first class, 12 per cent. second-class, and 76 per cent third-class. In Ireland there were 14,324,613 passengers conveyed, of whom 12 per cent. were first class, 28 per cent. second-class, and 60 per cent. third-class. The passengers had increased in 20 years from 72,854,422 to 330 004,398. The total receipts from all classes of passengers amounted £17,039,242. or rather more than 1s. per passenger; in addition to this there were £1,677,625 received for excess luggage, parcels, carriages, horses, &c., and £585,044 for the conveyance of mails, making the total receipts from passenger traffic £19,301 911 or rather more than £1,242 per mile of line constructed. The passenger trains travelled 86,648,931 miles, 71,362,063 being in England and Wales, 9,463,114 in Scotland, and 5,818,754 in Ireland.

The receipts from the goods traffic were £13,810,196 for merchandise, £912,450 for live stock, and £9,392,513 for minerals, making a total of £24,115,159, or about £1,552 per mile of line open. The number of miles travelled by goods trains was 82,423,441. The total receipts from all sources of traffic, including £1,661,073 miscellaneous, rents, tolls, &c., were £45.078,143, of which England and Wales had £38,122,161, Scotland £4,825,264, and Ireland £2,130,718. The proportion per cent. of passenger traffic to the total receipts was 42·82, that of the goods 53·50, and the miscellaneous 3·68. The receipts per mile constructed, exclusive of the miscellaneous receipts were £2,794 or 5s. 1½d. per train mile. In twenty years the receipts from passenger traffic had increased from £6,827,761 to £19,301,911, and those from the goods traffic from £6,376,908 to £24,115,159.

To work this immense amount of traffic there were 9,379 locomotives, 20,121 carriages for the conveyance of passengers only, 8,036 other vehicles attached to passenger trains 256,870 wagons of all kinds for the conveyance of live stock, minerals or general merchandise, and 5,964 vehicles not included in the foregoing, thus making the total rolling stock amount to 299,373; 240,782 belonging to the English Companies, 48,782 to the Scottish and 9,859 to the Irish.

The total working expenditure amounted to £21,715,525, or about 48 per cent. of the receipts. Of this expenditure we find that the maintenance of way and works cost £4,155,367, or about 20 per cent. of the total expenditure; locomotive power £5,619,649, or 26 per cent.; repairs and renewals of carriages and wagons £1,857,282, or 9 per cent.; traffic expenses £6,087,371, or 28 per cent.; general charges £949,570 or 4 per cent.; rates, taxes, and Government duty, £1,421,034 or 6 per cent. (Irish railways do not pay Government duty); compensation for personal injury, and damage to and loss of goods £446,431, or 2 per cent.; legal and Parliamentary expenses £245,455, or 1 per cent.; steamboat, canal, and harbor expenses £521,648, or 2 per cent.; and miscellaneous not included in the foregoing £411,768, or 2 per cent. The net receipts amounted to £23,362,618, and their proportion per cent. to total capital received was 4·41.

It may afford some comfort to those who are nervous about the danger of railway travelling to be told that in 1870 out of 330,004,398 passengers conveyed and 156,403 season ticket holders, only 90 were killed, or not one in every 4,000,000, and that 1 094 were injured, or one in rather more than 300,000. Of the 90 killed, 24 met their deaths owing to their own misconduct or want of caution. Contrasting these figures with the casualties of our London streets it would appear that the greatest danger consists in getting to and from the station, and not in the journey itself, thereby bearing out Mr. Bright's words that a person is safer in a first class railway carriage than anywhere else.—*Herapath.*

United Companie's Lease.

The Pennsylvania Railroad Company will take possession of the several works of the "United Companies" of New Jersey, under its lease of 999 years, on the 1st day of December. The whole of the leased property will come under the general supervision of Mr. A. J. Cassatt, at present the general superintendent of the Pennsylvania Railroad Company, and who will have his office hereafter in the company's building in Philadelphia. Mr. Ashbel Welch will be continued as the president of the "United Companies," and his acquaintance with the required improvements at Harsimus Cove will probably command for him the direction and control of that important work. The railroads included in the lease in East Jersey, including several branches of the Camden and Amboy to Camden and Philadelphia, and Trenton to West Philadelphia and Kensington, will be under the special superintendence of F. W. Jackson, of Jersey City, who is now in charge of the through line between Philadelphia and New York. The roads in the control of the "United Companies" in West Jersey will be under the special superintendence of Gen. W. J. Sewell, at present the efficient superintendent of the West Jersey Railroad. Mr. A. L. Dennis, President of the New Jersey Railroad and Transportation Company, will continue to perform the duties of his office as hitherto. Mr. F. W. Rankin Secretary and General Passenger Agent, will be continued in his present position, and Mr. Barker will still be master of transportation.

☞ The Michigan Central Railroad Company will issue at par to stockholders of November 18th one new share for every six old ones, payable one third December 15, 1871, January 15, and February 15, 1872, with interest at 7 per cent. after December 1, or payment can be made in full at that date and avoid paying interest. Stockholders should notify by December 10th to secure the new stock, which will draw a dividend July 1, 1872.

☞ The Chesapeake and Ohio Railroad has been finished between Charleston and Huntington, West Virginia, and the cars will commence running on the 4th of December.

Philadelphia, Wilmington and Baltimore Railroad.

The Wilmington (Del.) *Commercial* says that though it is true the Pennsylvania Railroad Company has neither purchased the Boston capitalists' stock in the Philadelphia, Wilmington and Baltimore Railroad, nor, as yet, arranged for a lease of the latter, there is not much doubt that a proposition to lease has been, or will be made. No such offer has yet been laid before the directors of the Philadelphia, Wilmington and Baltimore Railroad, and if any has been tendered it must be thus far altogether unofficial, and only under consideration by those officers and stockholders whose influence and moneyed interests are so large as to render their decision practically final when the matter is brought to a formal vote in the Board.

But when all the circumstances are considered, there can be little doubt that such a lease is one of the most probable events of the future. The Pennsylvania Company now control the Camden and Amboy and Philadelphia and Trenton lines, giving them that portion of the New York and Washington route. They are also standing back of Governor Bowie's Baltimore and Potomac Road, which will soon be completed and give them the link between Baltimore and Washington. South and West of Washington they have been steadily absorbing immense and wide-reaching lines, much of whose trade must be carried through to and from Philadelphia and New York. It is, therefore, unreasonable to expect that they will not in some way obtain the control of the link between Baltimore and Philadelphia. Such a link they must have, or their lines will be imperfect and detached.

It is true, we know, that there are theories to the effect that the Pennsylvania managers mean to construct a line of their own between Baltimore and New York, by using the Northern Central (which they own), up to some convenient point just over the Pennsylvania line, and then striking eastward by West Chester, Downingtown, Norristown, Doylestown, New Hope and thence across Jersey. But this is now exceedingly unlikely not only because it is an indirect route, much longer than the practical Air Line through Wilmington, but because the Pennsylvania Road, since acquiring the Camden and Amboy lines, certainly will not desire to build any new rou es between Philadelphia and New York. For that portion of their great North and South trade they now have ample accommodation, and do not need to throw away money in building new roads which, after all, would be simply parallel and competing.

Such a lease, we say, is almost certain to come. It appears to be necessary to the complete plans of the Pennsylvania Company, and if they make sufficiently liberal offer to the Philadelphia, Wilmington, and Baltimore corporation, the latter, we confidently judge, will have no objection to the arrangement. The stockholders of the Philadelphia, Wilmington and Baltimore are business men, of a plain practical sort. They have been running their road on railroad principles as a simple affair of business. Their dividends are eight per cent. per annum regularly, with an excellent maintenance of their road, and liberal provision of new rolling-stock.

If, then, they are offered a ninety-nine year lease, with a guaranty of ten per cent. by a reliable party, it is not likely that they will refuse, unless there should be difficulty in arranging the details. Some of these, including the consideration of what is to be done with the Baltimore Central Road, might take time, and require lengthened negotiation, but the result would certainly be likely to prove that such an offer was acceptable. And so, as we see good reason, in the nature of things, for one party to desire to lease, and for the other party to be at least ready to listen to the offer, we say, as many business men are now saying, that the acquisition of this road by the Pennsylvania is one of the most probable railroad events of the future.

Toronto and Nipissing Railroad.

This narrow gauge (three feet six inch) railroad was opened as far as Uxbridge, forty-one miles from Toronto, on the 14th of October. It is expected to have it completed to Woodville, sixty-four miles from Toronto, this season, and to its terminus at Coboconck early next summer. In his annual report the Chief Engineer, Mr. Edmund Wragge, gives the following statement of cost:

Actual cash cost of construction from Scarboro Junction to Uxbridge, when finished, thirty-two miles, $402,250, equivalent to a sum of $12,570 per mile. Out of this sum an amount of $280 per mile is properly chargeable to renewals, being the amount paid as a seven years' guarantee on the rails. This reduces the cost to $12,840 per mile. As regards the equipment, it is estimated that an outlay of $3,000 per mile in cash will be required to fully stock the road to Coboconck. This is more than was originally estimated, but is a matter of congratulation to the proprietary that they will have a traffic which will necessitate the supply of more rolling stock than was anticipated. Adding the cost of equipment to that of construction, we have a total cost of $14,340 per mile in cash, as against the estimate of $15,000.

☞ There is now in course of construction a line of railroad extending from the town of Garrett, on the Pittsburg and Connellsville Railroad, to Berlin, Somerset county, Pa. It is known as the Buffalo Valley Railroad. Its length is eight miles, and passes through a beautifully located coal basin. The contractors are finishing up the grading, &c., having completed the entire job ready for the cross ties, in the short space of ninety days.

☞ The last rail on the Port Huron and Lake Michigan Railroad was laid and the last spike driven on the 19th, bringing the track to the centre of Flint. Cars will be running regularly to Port Huron about December 1.

☞ The Lincoln Coal Company is now engaged in the location of a railroad to open up the "Koontz Tract," situated about two miles from Lonaconing, in Allegany County, Md.

☞ OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILWAY COMPANY, 80 BROADWAY, NEW YORK. November, 1871.—The coupons due December 1st on First Mortgage Bonds of the Toledo, Peoria and Warsaw Railway Co. (Eastern Division) will be paid at the office of the Farmers' and Loan Trust Company, 26 Exchange Place, on adn after that date, less Government tax.

American Railroad Journal.

New York Saturday, December 9, 1871.

New Bedford and Taunton Railroad.

The annual meeting of the stockholders of this company was held in New Bedford on the 4th inst. The old board of directors was unanimously re-elected; and at a subsequent meeting of the directors Hon. Joseph Grinnell was rechosen president, and Lawrence Grinnell treasurer. The former has filled the presidency for thirty-three years, and the latter has been treasurer for twenty-six years.

The gross receipts of the corporation the past year were $262,224 22; total expenses $219,945,-97; net earnings $42,578 25. There has been expended during the year, for new locomotives $16,000; new passenger and baggage cars $8,044 27; new freight cars $7,839 81.

☞ The proposals for the new seven per cent. currency loan of the Boston and Albany Railroad corporation were opened on the 5th inst. Bids were made for $6,000,000 at rates reported to range from 2 to 5¼ per cent. premium. The awards were made for the desired amount—$1,500,000. The bonds are to run for twenty years from the first of next February.

☞ The Concord Railroad Company have just purchased the right to use "Miller's Patent Platform," and will put it on its cars at once.

☞ THE MONTH OF DECEMBER OPENS WITH LARGE SALES OF NORTHERN PACIFIC SEVEN-THIRTIES, which we recommend to our friends and the public generally as among the Safest and Most Profitable Securities on the market.

Of Northern Pacific Railroad 7-30 gold bonds, now selling at par, in currency:

$1,000 will buy	$1,000 00
1,000 Seven-Thirty gold bonds will yield, in ten years, in gold	730 00
	$1,730 00

If the computation be made to cover twenty years instead of ten, the showing is still more strikingly in favor of the Seven-Thirties.

It is also practically certain that even at the end of ten years a 7-30 Northern Pacific Bond will stand at least 10 per cent. higher in the market than a six per cent. Gold Bond equally secured.

The first mortgage 7-30 gold bonds of the Northern Pacific Railroad, bought at par in currency, are a much more profitable investment—that is, are cheaper—than

1 United States Five-Twenties at	114
2 " New Fives at	111
3 Railroad or Municipal 6 per cent. gold bonds at	95
4 " " " "	92
5 " " currency "	90

Northern Pacifics have Thirty Years to run, are exempt from U. S. taxation, are issued in denominations from $100 to $10,000, and are secured not only by the Road and its earnings, but by 50,000,000 acres of Land, worth at Government valuation $125,000,000.

No Bond could be more secure.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

☞ The certificate of incorporation of the Baltimore, Pittsburgh and Continental Railroad, from the east line of Ohio, in Columbiana county, to the west line, in Mercer county, capital stock $1,000,000, was filed in the office of the Secretary of State, at Columbus, Ohio, on the 28th ultimo. This is the part of the Pittsburgh and Chicago extension of the Baltimore, Connellsville and Pittsburgh Railroad.

Railroad Progress, 1870 to 1871.

The following returns show the changes in the mileage and cost of railroads in the sections specified below, from the close of 1870 to the close of 1871.

The RAILROAD JOURNAL, in its annual tables for the year 1870, gives the following as the approximate statistics relating to the railroads then existing:

SECTIONS AND STATES.	Miles.	Cost.
New England—Maine, N. Hamp., Vermont, Massachusetts, Rhode Island and Connecticut.	4,506.49	$199,658,090
Middle States—N. York, N. Jersey, Penn. Delaware, Maryland and W. Virginia	11,300.62	680,589,976
Southern States—Virginia, N. Carolina, South Carolina, Georgia and Florida	6,155.70	174,519,582
Gulf and S. W. States.—Ala., Miss., La., Texas, Arkansas, Tenn. and Kentucky	6,201.25	217,348,686
Total (24 States)	28.164.06	$1,272,116.834
Average cost of railroads per mile		$45,169

An approximate estimate recently completed and keeping in view the changes to be made up to Dec. 31, 1871, gives the following results:

SECTIONS.	Miles.	Cost.
New England	4,982.65	$288 682,286
Middle States	12.821.31	783 061 509
Southern States	6 567.07	189,584,4 0
Gulf and S. W. States	7 009,52	245,237,434
Total	30,880,55	$1,451,515,609
Average cost of railroads per mile.		$47,186

The increase of mileage and cost in the year is shown in the following deductions:

SECTIONS.	Miles.	Cost.
New England	476.16	$33,974,146
Middle States	1,020.69	102 471.538
Southern States	411 37	15.064 848
Gulf and S. W. States	808.20	27,888,748
Total increase	2.716,49	$179.399 275
Average cost of increased mileage per mile.		$66,053

This increased cost per mile, however, is only apparent, as much of it undoubtedly belongs to expenditures on old lines and the large increase of equipment which most of the great lines have

made during the year. It is scarcely probable that the new roads on an average have cost more than $45,000 per mile, varying of course in different localities and in the quality of the roadway, appurtenances and rolling stock. It must also be taken into consideration that the cost as above given embraces a large mileage in progress, the cost of which is not separated in the published accounts. And yet the apparent increase in cost during the year is only at this rate on all the roads of $2,104, an amount easily consumed in improvements, and rolling stock, and far below the amount of extraordinary expenses on the great through lines, the increasing traffic on which has been accompanied by enlarged demands for increased facilities and accommodation. It is impossible, however, to trace the constant out-go for these purposes; and we feel satisfied of the material accuracy of the very elaborate tables compiled by us, of which the above summary gives the great result. The states of the northwest and west will no doubt show even a larger increase in both mileage and cost proportionately to the extent of their systems. That the sections referred to have now at least as many miles of railroads as are found to exist in the 24 states above summarized, we have no doubt; nor have we the least doubt that were it possible to obtain the statistics of all the railroads in the United States that the sum of them would range from 63,000 to 65,000 miles. In 1860 the population of the United States was 31,484,466, and the length of railroads 31,769, or about 1000 persons to each mile of railroad. In 1870 the population was 38,538,180, and at close of the year the length of railroads was 54,335 miles, or about 700 persons to each mile of railroad. That the population does not increase in the same ratio as mileage is thus certain, and that the breach has widened during the past year is not to be doubted. Notwithstanding this fact most of our railroads are constantly increasing their traffic and making enlarged earnings. Steam power, indeed, is now the great producer and carrier. Man is simply its guardian and guide.

Western Railroad of Alabama.

We have received the Report of this Company for the first fiscal year ending August 31, 1871, from which we learn that under the resolutions of the stockholders of the Western Railroad Company, and the stockholders of the Montgomery and West Point Railroad Company, the entire line of railroad from Selma to West Point, and the branch road from Opelika to Columbus, became the Western Railroad of Alabama, on the 1st of September, 1870. The receipts of the road have been:

From passengers	$265 283 83
From freights	391,739 33
From mail pay	11,152 06
Total	$668,175 22
The expenses of operating the road have been	443,023 19
Leaving net income	$225,152 03

—which has provided for the interest on the debt of the company.

At the time of the purchase, the road to Selma was not entirely completed, the bridge over the Alabama river being unfinished. It was, however, completed and the road opened early in December.

The cost of the road from Montgomery to Selma, 44 miles in length, was		$1,455,402 42
Including interest on debt, discount on bonds, and all expenses up to September 1st, and deducting from it the amount of earnings during the progress of the work. From which deduct the proceeds of the donation of $117,000 of Selma and Meridian Railroad bonds made by the State to aid in building the road		81,800 00
And the actual cost to the company is shown by the books to be		$1,373,602 42
Which was provided for by capital stock	364,100 00	
Cash paid out	1,009,502 42	
	$1,373,602 42	

To provide for the payment of what was due for building the road, after exhausting the proceeds of the first mortgage bonds for $600,000, and to pay the floating debt of the Montgomery and West Point Railroad Company. The second mortgage bonds of the Western Railroad Company for $1,200,000 were issued, bearing interest at 8 per cent., dated September 15th, 1870, and payable on October 1st, 1890. These bonds have been disposed of as follows:

There was deposited with the Central Railroad Bank in Savannah to be given in exchange for the second mortgage bonds of the Montgomery and West Point Railroad Company		$250,000 00
Deposited with John P. King, agent, to take up $150,000 of the bonds of the Montgomery and West Point Railroad Company due January 1st, 1873		$150,000 00
We have on hand		13,000 00
And have sold		787,000 00
		$1,200,000 00
The $787,000 of bonds were sold so as to net the company a fraction less than 90c. and netted the sum of		$706,972 00
Which paid up the balance due for building the road to Selma	$409,502 42	
Debt due the State of Alabama	71,000 00	480,502 42
Leaving a balance of		$226 469 96

—which was appropriated to pay the floating debt of the Montgomery and West Point Railroad Company.

Upon reference to the financial condition of the company, which is shown by the general statement herewith submitted, you will see that a floating debt has been created, amounting to $375,424 05—which has been unavoidable. Upon an examination of the Montgomery and West Point Railroad it was found that the old flange rail, on the main line of the road, between Montgomery and West Point, which has been in use for twenty years, having been laid down on the first opening of the road in 1850, was so completely worn out that trains could not be passed over it with safety. When the repairs were begun it was hoped that the portion of it which had been re-laid with new stringers, within the last three years, might be retained for a year longer, but it was found that, even on this, the iron would not sustain the trains. Scarcely a week passed without having two or three trains off the track, breaking up our rolling stock and damaging freights, and the alternative was presented of thoroughly rebuilding the road, and creating a debt to do it, or working on in its dilapidated and worn out condition, and, by some serious accident on our passenger trains, utterly bankrupt the company; for, in the event of any injury inflicted on passengers, with the road so unsafe, we could have made no defense against claims for the heaviest damages.

Within the year the main road has been put in such thorough repair, as to make it now fully equal in condition to the best of Southern roads. Thirty-eight miles of new rails have been laid down, bridges and culverts repaired, and on the flat and swampy lands on the lower end of the road, 30 miles ballasted. On the Columbus branch which was opened in 1855, and which was laid with a heavier flange rail than the rail on the main line, four miles of new rails, beginning at the Columbus bridge, have been laid down, and with the good flange rails taken up, the remainder of the branch road has been put in as good condition as it can be with the iron now on it. It must, however, all be relaid within the next two years, and as much sooner as the means of the company will warrant. We have now on hand 355 tons of old rails, which will be re-rolled in Atlanta, as soon as we can spare the money to meet the expense.

The amount expended in rebuilding, repairing and improving the road has been:

For 3,360 tons iron laid on 42 miles of road, which has cost the company a fraction less than $60 per ton	$197,675 05
109,200 new cross-ties laid on the 42 miles, 50 cents each	54,600 00
Work of relaying new iron, and ballasting track	25,200 00
Spikes $200 per mile	8,400 00
3½ miles new side tracks, and fitting up track at Opelika	10,000 00
Ballasting 30 miles of track on lower end of road	30,000 00
Cost of 18 Dooly Switches put in place of old frogs	2,160 00
New buildings erected on line of road and in Selma	6,250 00
Repairing and rebuilding bridges, culverts, etc., etc.	12,000 00
	$346,285 05

An examination of the road will satisfy you that, although the amount appears to be large, it has been judiciously expended, for the road is now in a better condition than it ever has been. Beginning without means, it dragged slowly along, and the first portion of it opened for use from Montgomery to Franklin, was worn out before it could be extended beyond that point. From 1855 to 1861, it gradually worked up, paying dividends to its stockholders, and improving year by year in condition.

Utterly ruined at the close of the war, by the destruction of its property, it has been a hard struggle to keep up and run the road, and if I could have foreseen the difficulties and embarrassments to be encountered in sustaining it, when the war closed, I would have urged its sale. I hope it has seen the worst, and that it will steadily continue to improve in value as a property, and in condition as part of the great East and West line connecting the Southern Atlantic cities of Savannah and Charleston with the South-west. New roads are being constructed which will compete with it for the business which it has heretofore had a monopoly of, and others are being built which will bring in to it a new business, and, upon carefully looking at its surroundings, I see no reason why our income should not gradually increase. For the coming year, we will be fortunate if our income holds up to what it was last year, in consequence of the failure of the cotton crop—for we can not hope to move over the road more than one-half the number of bales moved last year.

Within the year, the rolling stock has been increased by the purchase of four locomotives, and the purchase and building of ninety-five freight cars. We have now fourteen passenger cars, nine baggage cars of all classes, two hundred and eighteen freight cars of all classes, and twenty-three locomotives—not as many of either as we should have; but every effort will be made to do the work of the road with the present outfit.

Having done all that is now needed to put the road in condition to move passengers safely and in good time, and to pass freights without delay or damage, the large extra force kept on the road for the past year has been discharged, and every effort will be made to keep the expenses down in proportion to the income.

The company have 23 locomotives, 7 first-class and 7 second-class passenger, 8 baggage and mail, 1 express, 141 box, 44 flat, 16 cab, 10 coal, 1 wood, 6 Green Line, 4 crank and 31 repair cars. Number of miles run by locomotives, 27,571; by passenger, baggage, mail and express cars, 623,191; by freight cars, 1,465,776. Number of through passengers carried, 19,804; do. way do., 94,176—total, 113,980. Bales of cotton transported, 112,503. The superintendent in his report says:

The opening of the road to Selma was so very late in the season, that the business of the road between Montgomery and Selma for the year, gives no test of its value.

The receipts were, from passengers	$46,059 00
From freights	30,171 00
Making a total of only	$76,130 00

Take the amount of gross receipts, $76,130, from the entire receipts of the whole line, which shows an increase of $196,948 57, and it is shown that the increase of receipts on the Montgomery and West Point part of the road is, for the year, $120,818 57. This increase is shown as follows: Receipts of the Montgomery and West Point road,

	Passengers.	Freights.
For 1871	$219,224 83	$372,820 39
" 1870	155,135 21	316,091 44
Increase for 1871	$64,089 62	$56,728 95

Having the advantage of the Selma connection from the opening of this season, I hope, that although we will have to contend against the reduced quantity of cotton to be moved, our gross receipts for the year may be kept up to what they were last year.

Our outfit of engines and cars were found inadequate to the business. Four engines were ordered from Rogers' Locomotive and Machine Works, which were received early in the year, and which have performed the services for which they were built in the most satisfactory manner. Fifty box cars were purchased of the Tredegar Company of Richmond. One first-class passenger, one baggage and mail, twenty-five box, ten platform, and ten coal cars have been built in the company's shops during the year, in addition to doing the repairing necessary to keep the cars in good condition. This has been done without increasing the pay rolls of the car department above those of former years. We have most of the material on hand to complete thirty more box cars, which will be built as rapidly as can be done without adding to our car factory force. With the improved condition of our track, it is believed that our repairs will be so much less than the average of past years, that more time can be devoted to new work, and that, from this time on, everything needed by the road, in the way of cars, can be built in the company's shops.

The financial condition of the company August 31, 1871, was as follows:

LIABILITIES.

Preferred stock		$64,100 00
Common stock		1,944,224 00
First mortgage bonds	$6,500 00

President.—CHARLES T. POLLARD.

Superintendent.—G. J. FOREACRE.

Commerce of New York.

The foreign imports at New York for the month of October, 1870 and 1871, are officially stated as follows:

	1870.	1871.
Entered for consumpt'n	$14,087,056	$17,423,743
Do. for warehousing	7,163,067	10,315,541
Free goods	1,193,348	2,300,611
Specie and bullion	417,860	605,862
Total entered at port	$22 861,331	$30,645,757
Withdrawn fr. wareh'use	8,802,588	10,862,097

The foreign imports at New York for the ten months from January 1, were:

	1870.	1871.
Entered for consumpt'n	$144,010,203	$182,520,289
Do. for warehousing	100,299,719	121,668,706
Free goods	11,174,186	24,884,789
Specie and bullion	8,799,031	6,192,628
Total entered at port	$264,283,139	$335,266,412
Withdrawn fr. wareh'se	99,738,423	109,487,119

The revenue from customs at New York for ten months from January 1, has been as follows:

	1870.	1871.
Six months	$67,581,811 10	$73,692,107 93
In July	10,592,841 37	11,934,957 33
August	15,078,512 90	16,932,839 65
September	14,182,516 12	15,738,891 86
October	11,161,364 60	12,066,671 28
Ten months	$118,597,046 09	$130,360,468 05

The exports from New York to foreign ports in the month of October, were:

	1870.	1871.
Domestic produce	$16,018,569	$21,775,792
Foreign free goods	1,905	15,092
Do. dutiable	638,930	585,343
Specie and bullion	2,416,356	2,086,891
Total exports	$19,075,760	$24,443,118
Do. exclusive of specie	16,659,404	22,356,227

The exports from New York to foreign ports for ten months from January 1, were:

	1870.	1871.
Domestic produce	$142,440,575	$188,170,458
Foreign free goods	334,800	1,011,954
Do. dutiable	8,416 680	6,479,259
Specie and bullion	51,344,339	59,706,815
Total exports	$202,536,394	$255,368,481
Do. exclusive of specie	151,192,055	195,661,666

☞ The earnings of the Toledo, Wabash and Western Railroad in November, 1871, were $531,079; in November 1870, they were $425,687—an increase of $105,392.

Old Colony and Newport Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 27th ult. The Annual Report was read and placed on file. The next business in order being the choice of directors, Judge Bennett of Taunton moved that a committee of five be appointed to distribute, collect and sort ballots. The committee thus appointed consisted of the following gentlemen: E. H. Bennett of Taunton, John R. Brewer of Boston, E. C. Sherman of Plymouth, J. H. French of Bridgewater and Joseph S. Beal of Kingston.

The only printed ticket in circulation was that containing the names of the old board, with a single exception—the name of Charles F. Choate of Boston being substituted for that of Francis B. Hayes of Boston, that gentleman being absent in Europe. The Auditor's report was then read and accepted.

The acceptance of Chapter 54 of the Acts of Legislature of 1871, authorizing an increase of stock, was then brought up by Mr. Charles F. Choate, who stated in explanation that there was a mortgage on the road of $3,000,000, which must be met sooner or later, and that the most eligible way would be to increase the capital stock. He moved, therefore, that it be increased to $6,500,000, the new stock to be issued by the directors when required by the necessities of the company. Unanimously adopted.

The acceptance of Chapter 325 of the Acts of Legislature of 1871, authorizing the corporation to construct the Shawmut Branch Railroad, was then brought before the meeting, and the subject discussed at some length. It was finally voted to ratify, approve and confirm the action of the directors in regard to the location and construction of said branch road and to authorize the issue of stock to an amount not exceeding $100,000 to defray the expense thereof.

It was voted to authorize the directors, in behalf of the corporation, to subscribe for stock in the Plymouth and Sandwich Railroad Company, or to guaranty its bonds under the provisions of law to an amount not exceeding $133,000. Also to authorize the directors, in behalf of the corporation, to aid in the construction of the Plymouth County Railroad so far as authorized by law to such extent as they might deem expedient.

Mr. Choate stated that as under the present by-laws no provision existed by which vacancies could be filled in the Board of Directors, he moved that they be so amended that such vacancies should be filled by the Board.

Mr. Holmes objected to placing such power in the hands of the Board, and said he believed the stockholders should have a voice in the matter. An amendment was subsequently offered by Mr. Holmes, providing that vacancies not exceeding two in one year should be filled by the directors.

It was moved and carried that the Auditing Committee of the past year be elected for the ensuing year.

The committee on counting the ballots reported the following list of names as constituting the new Board of Directors, the whole number of shares represented being 20,207:

Onslow Stearns, Boston, Mass.; Uriel Crocker, Boston, Mass.; Benjamin Finch, Newport, R. I.; Charles F. Choate, Boston, Mass.; Oliver Ames, North Easton, Mass.; Samuel L. Crocker, Taunton, Mass.; Jacob H. Loud, Plymouth, Mass.; John S. Brayton, Fall River, Mass.; Royal W. Turner, Randolph, Mass.

On motion adjourned.

☞ The Southern Central Railroad, extending from Fair Haven to Athens, Pa., was formally opened on the 28th ult. The road is 117 miles in length, passing Weedsport, Auburn, Dryden, Owego and various other minor towns, to Athens, Pa., and from thence, by other roads, through the most famous coal regions of Pennsylvania, to Philadelphia.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

American Railroad Journal.

Saturday, December 9, 1871.

Stock Exchange and Money Market.

The President's Message, and the Annual Reports from the various heads of Departments, especially that of the Secretary of the Treasury, and of the Controller of the Currency, which were received in this city late on Monday, were the chief topics of conversation in financial and commercial circles during the closing days of the week under review. The proposed repeal of all Internal Taxes, other than on Tobacco, Spirits and Stamps, which will produce abont $110,000,000 per annum, recommended by both President and Secretary, has met popular approval. The review of the finances of the nation for the last fiscal year presents a creditable exhibit. The last Public Debt Statement showed a further liquidation, in November of $3,462,080. Money has been more active in the speculative line, on the basis of 6@7 per cent. as the prevailing figures on call, closing at fully 7 per cent. to the best cash borrowers. The city banks as well as the Treasury office, have had their currency reserves further reduced, in part by the drain to the interior for commercial purposes. The floating supply here has been less liberal, and lenders have been somewhat firmer in their views. In the discount line, a moderately active business has been reported, chiefly in strictly choice grades of mercantile paper, within the range of 7@9 per cent. per annum.

From Washington we hear that the payments on account of the new five per cent. Funding Loan have come in with unexpected promptness. The coin needed for the payment of the six per cents is already provided. It is not anticipated, however, that a very large proportion of coin will be required for the redemption of the 100,000,000 of the called six per cents. Eight millions of gold have been paid on account of cash redemptions, which amount covers all the bonds presented for cash payment on both foreign and domestic account. The most of the 100,000,000 of the five-twenties called in for Dec. 1, have been taken up by American and European syndicate. These will be used in settlement for the new five per cents. It is, consequently deemed improbable that any large additional amount of gold will be required to close the negotiation. The U. S. Assistant Treasurer at this port, on Monday cashed gold checks issued for the redemption of 5-20's to the amount of $2,200,000, and on Wednesday, $800,000 making a total thus far paid out on this account here of full ten millions.

The amount of U. S. currency outstanding at the beginning of the current month was $398,721,569.

The city banks, in their latest return, show a reduction of $1,286,000 of legal tender notes, with an increase of $1,851,900 of specie, and $4,284,700 of deposits; also an addition of $3 913,200 to their loan and discount averages, and a reduction of $17,400 to their item of circulation. The city bank exchanges, last week, averaged $106,310.611; and thus far, this week, 119⅛ millions daily. The banks now hold $7,078,250 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $18,074,700, against $17,108,066 same time last year. The city bank deposits are now $223,514,500 against $194,991,319 week ending Dec. 3, 1870. The legal tender reserve amounts to $52,408,900 against $51,257,656 same time last year. The circulation now stands at $30,106,900, against $32,238 888 same time last year. The loans are now $292,316,900, against $266,263,143 at this date last year.

The U. S. Sub Treasury reduced its currency balance $1,544,953 and enlarged its coin reserve $1,999,679, as the result of the week's business. The receipts of the office were $11,598,009 in coin, and $2,864,134 in currency; payments, $9,598,330 in coin, and $4,409,087 in currency. The office received $1,941,000 in coin or its equivalent, from customs; and disbursed $650,000 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,641,846 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $368,605,700; and as security for deposits of public money, United States bonds for $15,229,000. The aggregate of the outstanding circulation of the National Banks of the country is $326,004,550.

Government revenues have been yielding less freely, since our last. The excises yielded last week about 2¼ millions, and thus far since July 1, about 57¼ millions. The customs at the port of New York, last week were $1,810,846; and at the outports, equal to about $600,000 more, all in coin, or coin certificates.

The aggregate revenue of the Treasury Department, in the last fiscal year, was $383,823,944, viz: from customs, $206,270,408 05; from internal revenue, $143,098,153 63; from sales of public lands, $2,388 646 68; from miscellaneous sources, $31,066,736 53.

Gold has been in rather limited speculative demand during the week, and there has been less firmness in the course of the market as to the price. The export and customs call has been less urgent, particularly for customs. The offerings of Gold have been more liberal. The range of the price during the week has been from 109¾@110¼ and the closing quotation on Wednesday was 109⅞@110 against 110⅛ the preceding Wednesday. The specie outflow, last week, was $556,614; on Tuesday of this week, $1,000; and on Wednesday $161,473. The Gold Exchange Bank clearances have averaged 38¼ millions a day during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Dec. 2, 1871 $81,657,990, against $83,228,416 same time in 1870.

The export drain of specie was $556,614 last week, against $519,863, same week preceding year. The shipments since January 1, 1871, have been $62,166,116, against $56,536,323 same time in 1870.

The Treasury Department on Wednesday held a coin reserve of $98,400,000, and a currency balance of $10,160,000.

The customs demand for Gold last week, averaged $362,000 a day; thus far, this week, it has averaged $565,000 a day, or equal to a weekly aggregate of $3,390,000. The arrivals o specie from Europe, Havana and other foreign ports last week were $6,904, and since Jan. 1, 1871, $9,428,905 against $11,387,557 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $146,253,017 against $132,764,278 same time in 1870.

Foreign exchange has been quoted stronger, but has been without remarkable activity. Bankers' sixty day bills on London closed on Wednesday at 109@109⅛; sight bills on London, 109¾@109⅞.

Government securities have been offered sparingly and have been quoted generally firm notwithstanding the depression in gold. The demand for the later issues of the coin bearing bonds has been fair, both on home and foreign investment account.

On Wednesday, Government bought in $517,450 of Five-Twenties at 109 74 @109 87. The amount of bonds offered was $813,950 at from 109 74@110 50.

Under the December programme of the Treasury Department, Government proposes to sell at least four millions of gold, during the month, as follows: Thursday, Dec. 7, $1,000,000; Thursday, Dec. 14, $1,000,000; Thursday, Dec. 21, $1,000,000; Thursday, Dec. 28, 1,000,000. And to buy in at least, four million of Five-Twenties, as follows: Wednesday, Dec. 6, $1,000,000; Wednesday, Dec. 13, $1,000,000; Wednesday, Dec. 20, $1,000,000; Wednesday, Dec. 27, $1,000,000;

The new 5 per cents of the Funding Loan of 1881 recently negotiated were put on the regular call at the Stock Exchange on Monday and sold at 109¾.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117¼@117⅛; U. S. Five-Twenties of 1862, (other than the bonds called in) 110¾@111; U. S. Five-Twenties of 1864 at 110⅝@110⅞; U. S. Five-Twenties of 1865, 111¼@111⅜; U. S. Five-Twenties of 1865 consolidated, 113⅜@113⅛; U. S. Five Twenties of 1867, 114⅜@114⅛; U. S. Five-Twenties of 1868, 114⅛@114¾; U. S. Ten-forties at 109¾@110⅞; U. S. Fives of 1881 (Funding Loan) 109⅛@109¾. Six per cent. currency bonds, 113@113¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 22.	Nov. 28.	Dec. 6.
Consols	93⅝	93⅛	92⅛
U. S. 5-20's of 1862	92	92	92⅜
U. S. 5-20s, 1865	92¼	92¼	92¾
" 1867	94¾	94¾	95⅛
" 10-40s	90¼	90⅛	90¾
Erie	25⅝	25⅜	26¼

The new Funding Five per cent. Loan was not quoted in London on Wednesday.

State bonds have been in moderate demand at fairly supported prices.

Railway bonds have been in good demand for investment purposes especially through the commission houses, at generally strong and buoyant prices for the more popular loans. Central Pacific Railroad Sixes closed firmly on the basis of 103⅛@103¾, with a fairly active call for the bonds, which are quite scarce, in the open market. Chesapeake and Ohio Sixes have been readily taken at 94 per cent. and accrued interest.

Railway and miscellaneous share property has not been remarkably active, and, with Money somewhat more stringent to speculative borrowers, there has been some depression and irregularity in value, though towards the close, the advantage seemed in favor of operators for a rise.

General business has been on a restricted scale. Breadstuffs and provisions have been rather unsettled in prices. Middling upland cotton closed on Wednesday at 19¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 948,102 bales, against 1,134,817 bales same time in the preceding year; exports 401,864 bales, against 537,922 bales in the previous year; stock at the ports at latest dates, 378,905 bales, against 388,819 bales same date 1870.

At the Live Stock Markets, Beeves have been in more confident demand at from 9½@12¼ cts.; Veals at 5@10½ cts.; Sheep at 4½@6½ cts.; Lambs at 6@8 cts.; Swine, at 4⅜@4⅝ cts. per lb., all live weight. The week's receipts were 4,450 Beeves, 1,178 Veal Calves, 20,994 Sheep and Lambs; and 46,858 Swine.

Foreign goods have been in less request at however generally steady rates. The week's imports of foreign goods reached $5,644,926, including $1,223,810 of dry goods.

Ocean freights have been less active and rates have been quoted somewhat irregular.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Mississippi, Ouachita and Red River Railroad.

The *Memphis Appeal* reports as follows respecting this road:

"The Mississippi, Ouachita and Red River Railroad, of which Colonel Sappington is the general land agent, has a perfected track of thirty miles and forty miles of iron paid for and delivered. Chicot City, instead of Eunice, will be the river terminus of the road, and from the same point the narrow guage road to Little Rock progresses rapidly. Seventy miles of this line of road are graded, iron for forty miles has been provided and a locomotive for the road left Pittsburg a few days ago. It is possible that Shreveport and Camden may reach the Mississippi at Chicot before the Memphis and Shreveport line is finished. New Orleans and Cincinnati will have packet lines to Chicot City.

There will soon be a vast number of cotton bales gathered at Chicot City."

The Public Debt Statement.

The following is a recapitulation of the public debt statement November 30, 1871:

DEBT BEARING COIN INTEREST.

Five per cent. bonds	$277,363,700 00
Six per cent. bonds	1,577,135 150 00
Total	$1,854,498,850 00
Accrued interest	36,954,839 42

DEBT BEARING INTEREST IN LAWFUL MONEY.

Three per cent. certificates	$23,490,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Certificates at 4 per cent.	678,000 00
Total	$38,168,000 00
Interest	244,760 00
Debt on which interest has ceased since maturity	$1,769,297 26
Interest	294,346 34

DEBT BEARING NO INTEREST.

Demand and legal tender notes	$357,592,801 25
Fractional currency	40,166 036 05
Coin Certificates	24,928,140 00
Total	$422,686,977 30
Unclaimed Interest	14,442 18
Total amount outstanding	$2,317,123,124 56
Total interest	37,508,387 89
Total debt, principal and interest, to date, including interest due and unpaid	$2,354,631,512 45

AMOUNT IN TREASURY.

Coin	$96,256,554 84
Currency	10,123,589 76
Total	$106,380,144 80
Debt less amount in Treasury	$2,248,251,367 85
Debt less amount in Treasury November 1, 1871	2,251,713,448 03
Decrease of debt during the past month	$3,462,080 18
Decrease of debt since March 1st, 1869	$277,211,892 16

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236 512	$680 912 80
Kansas Pacific	6,303,000	157,575 08
Sioux City and Pacific	1,628,320	40,708 00
Central Pacific	25,881,000	647,025 00
Central Branch Union Pacific	1,600,000	40,000 00
Western Pacific	1,970,000	49,250 00
Totals	$64,618,832	$1,615 470 80
Interest paid by United States		$12,692,475 41
Interest repaid by transportation of mails, etc.		3,317,907 44
Balance of interest paid by United States		9,374,567 97

☞ The earnings of the Cincinnati, Sandusky and Cleveland Railroad for the quarter ending October 1, 1871, were $135,005 24; and for the quarter ending October 1, 1870, $100,811 52—an increase of $34,193 72.

THE REDEMPTION OF 5-20 BONDS BY THE GOVERNMENT.

WAS COMMENCED DEC. 1, AND IS rapidly going on, releasing a large amount of invested capital, a large proportion of which must seek reinvestment in substantial securities.

We offer and recommend the SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY as among the **safest and most desirable securities to be had in the market for the secure investment of capital.**

A small proportion only of the loan now remains unsold, and the reinvestment of the proceeds of redeemed Five-twenties should absorb them within a short time.

Present price, 94 and accrued interest.

Interest and principal payable in gold in New York City. Interest May 1 and November 1. Denominations, $1,000, $500, and $100, coupon or registered.

The popularity of and demand for, the CENTRAL PACIFIC SIX PER CENT. GOLD BONDS, originally put on the market by us, and now in demand at 103¼, afford an illustration of the **high standing which this class of Bonds, amply secured on well managed and productive Trunk lines of Railroad must always maintain.**

We buy and sell, as usual, Government and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS. Accounts of Banks, Bankers, and others received, on which we allow interest. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

HARVEY FISK. FISK & HATCH.
A. S. HATCH.

California Railroads.

The San Francisco *Chronicle* of November 9, says: The Central Pacific Railroad Company are now operating fourteen hundred miles of railroad, and are rapidly extending their lines in various directions. The San Joaquin Valley Branch, for which a subsidy was asked at the last session of the Legislature, is being extended southerly from Lathrop to Bear Creek, a point distant only 90 miles from Visalia, Tulare county. When completed to Bear Creek, all the travel for points in the San Joaquin Valley as far as Visalia will, instead of going by rail to Gilroy and thence over the mountains 140 miles to Visalia, take the railroad to Bear Creek, whence the road is level over the plains. Freight and travel to the Kern county mines will, instead of going by the way of Los Angeles, also follow the San Joaquin Valley road. The company are actively advancing, and the cars will soon be running to Bear Creek. Work on the Oregon Branch of the Central Pacific is being vigorously prosecuted, and in a few days the people of Red Bluff will be in direct railroad communication with San Francisco.

☞ The Kentucky and Great Eastern Railroad Company has closed a contract at Cerredo, West Virginia, with the commissioners of West Virginia, by which they acquire the franchises and property of the West Virginia Central Railway Company.

☞ James L. Mc Lane has been elected President, Robert Hooper Secretary and Treasurer, Richard B. Osborne Chief Engineer, and John T. Rigney General Superintendent of the Western Maryland Railroad Company.

Journal of Railroad Law.

RAILROAD COMPANIES—WHAT IS NEGLIGENCE ON THE PART OF FELLOW SERVANTS—RULE AS TO SELECTION OF SERVANTS AND RESPONSIBILITY THEREFOR BY COMPANIES.

The facts in the recent case of Brickner, Administratrix, &c., *vs.* The New York Central Railroad Company, (2 Lansing, 506,) are fully and clearly stated in the following opinion by

POTTER, J.—A review of this case requires the statement of the leading facts proved on the trial. The plaintiff's intestate, Frederick Brickner, was a carpenter in the employ of the defendant at West Albany at the time of the accident which resulted in his death, and which occurred in October, 1867. Brickner was at the time, and for some days previous, with three others, had been engaged in putting sky-lights into the roof of the shop of the defendant; and to effect this object had built scaffolding below the roof under the openings for the sky-lights at a height of some twenty-five feet above the floor or ground of the shop. Three such sky-lights were to be constructed; and to do this holes had to be cut through the roof of the size of the sky-light. The carpenters had to stand upon the scaffold while at work, and while raising up the timbers when raised upon the scaffolds. The first two of these scaffolds were constructed by three carpenters, of which Brickner was one. These two scaffolds answered all the purposes of their construction. The third scaffold, which was built for the like purpose of being used for the carpenters to stand upon while constructing the third sky-light, was built by two young men of the ages of sixteen and eighteen who were in the employ of the defendant, and who had little (if any) knowledge of the trade, one of whom had worked at the business but about two months.

When the three carpenters had finished the second sky-light, they were ordered by the defendant's foreman or boss carpenter, whose name was Westman, to go to work upon the third. The carpenters found the third scaffold constructed. They proceeded from the second sky-light, over the roof of the building, and stepped down upon the scaffold from the third sky light through the hole cut in the roof for the sky-light, this being the only way to get upon the scaffold. Seen from above, this scaffold was, in its appearance, like the others which had been constructed by the carpenters; it was closely covered with boards cut out of the roof. Three of the carpenters got on this scaffold, and when the fourth, who was the plaintiff's intestate, stepped upon the scaffold, it gave way; he fell to the ground, receiving injuries which resulted in his death. The timber with which this scaffold was constructed was insufficient in size, strength or quality for a scaffold; and one of the sticks upon which boards were placed was cross-grained hemlock. There is the absence of evidence in the case that either of the directors of the defendant had any personal supervision, or gave directions in regard to any of the work at West Albany.

The directing power there, so far as the proof shows it, is that one Colby was master mechanic, under one Jones, and one Westman was boss of the gang of carpenters. That Jones and Colby were competent men, but there was proof that Westman indulged in habits of drinking, and was occasionally intoxicated; that Colby had threatened to dismiss him for that reason; and some proof was given that he was intoxicated at the time he ordered the carpenters upon the defective scaffold. The carpenters who entered upon it did not know. They were sent to work upon it by Westman, who was the immediate boss of the gang of carpenters, and directed their work. Upon this statement the first question, in fact the only question, as it seems to me, is, was there any fact in the case to be submitted to the jury? This is a question of law. The institutions of railroads in this country, as the great medium of individual and commercial transition, has introduced into our jurisprudence new subjects of discussion in, and adjudications by the courts, as to the degree of care, caution and diligence, demanded respectively of master and servant, employer and employee, toward the other, as well as the degree of misconduct or negligence which creates liability upon the one, or which estops the other from the making a claim for damages for injuries received while engaged in the employment of such other. To a certain extent, in given cases, we may regard the law as settled by our highest courts; but the ever varying cases, in fact and feature, presented to the courts at *nisi prius*, calls upon that court, and the court of review, in the examination of a case thus changed in its presentation from every other, to apply to it, first, what is the settled law of the general and particular cases. And to that portion which appears to be novel, or a variation from settled adjudications, to apply such general principles of common law as seem to be demanded by it.

In this case we may perhaps assume, as a settled general rule, "that a master is not responsible to those in his employ for injuries resulting from the negligence, carelessness or misconduct of a fellow servant engaged in the same general business." As also, "the rule exempting the master is the same, although the grades of the servant or employees are different, and the person injured is inferior in rank, and may be subject to the directions and general control of him by whose act the injury is caused."

In the case of Gilman *vs.* The Eastern Railroad Corporation, (10 Allen, 233, 239,) an employee of the defendant brought his action for an injury occasioned by the negligence of a switchman in failing properly to adjust the switch upon the track. The court held that the plaintiff, being a fellow servant in the employ of the same railroad company, could not have recovered of their common master; but they add: "The evidence offered by the plaintiff at the trial was competent to show that the defendant knowingly, or in ignorance caused by their own negligence, employed an habitual drunkard as a switchman, and thereby occasioned the accident. Of the sufficiency of their evidence a jury must judge. If the plaintiff can satisfy them that such misconduct or negligence in the defendant caused the injury, and that he himself used due care, he may maintain his action." In the same case they say: "It is well settled, both in England and America, that a master is bound to use ordinary care in providing his structures and engines, and in selecting his servants, and is liable to any of his fellow servants for his negligence in this regard."

If the case we are reviewing depended upon the question whether a fellow servant could maintain an action against the common master for the negligence, carelessness or misconduct of a fellow servant engaged in the same general business, it would be clear that the learned judge correctly ordered a non-suit at the trial. This case, however, has evidence in it tending to sustain a different basis of right to recover, to wit: The negligence of the defendant in erecting an unsafe and dangerous structure upon which the plaintiff was placed, or directed to go, to perform his labor; and the negligence of the defendant in selecting proper and competent servants, or knowingly keeping intemperate and incompetent servants in their employ, by reason of which the plaintiff's intestate was injured. Upon this feature of the case we think the learned judge was in error in not submitting the case to the jury with proper instructions as to the law of the case, or with proper issues of fact to be found by them, upon which the law could be declared. There was evidence in this case of the incompetency of the persons who constructed the scaffold in question; the fall of which caused the death of plaintiff's intestate. They were mere boys, sixteen and eighteen years of age, unlearned in the trade of carpenters, and as a natural consequence, inexpert, and unacquainted with the strength and support necessary for such a structure. In the absence of proof as to who directed them to construct this scaffold, the presumption must be that it was the defendant, or the directing power of the defendant; some one who had the authority to direct. If the presumption should be that it was Westman, the boss carpenter, then the direction was given by one as to whose competency, by reason of his habits of intemperance, was a question of fact properly for a jury. It is entirely clear that the scaffold, as a structure, implement, facility, or appliance by whatever name it may be called, was an unsafe and dangerous one; it was constructed by incompetent persons, and of poor and insufficient materials. When this was proved, I think, the burden was upon the defendant of showing, at least, that it was constructed by a competent director of work, or competent fellow servant. If the defendant, as master, directed these incompetent boys to construct this scaffold, then they are responsible for the consequence.

Perhaps we have gone as far as necessary to show it was error in the judge to take this cause from the jury. I do not understand it to be urged as a ground for sustaining the nonsuit, that the plaintiff's intestate had been guilty of contributing negligence on his part; or, that the learned judge put his decision on that ground. Upon the argument of this case, the main point relied upon to sustain the ruling of the learned judge, was that no negligence was brought home to the defendant. That the business of employing and discharging men was left to Colby and Jones; and they being competent, whatever resulted from their negligence, is to be accounted the negligence of a fellow servant.

Though the case does not inform us who employed either Jones, Colby or Westman, as agents or operatives, it does appear that among themselves they took some rank in the order of Jones

Colby and Westman. They were all called bosses by the workmen, which is doubtless a title of superiority, perhaps each in a different department. Jones was highest; but Colby employed and discharged men; and Westman was in charge of and directed the gang of carpenters as to their work. As none but the principal has the right to employ agents and servants, without a delegation of the power to do so, the presumption must be in this case, in the absence of o her evidence that these three bosses were employed by the defendant, and each had delegated to him power to direct.

It is claimed that in cases of corporations, who can only act by agents, that the directors may be regarded as the master, or principals, and that all others, all persons in their employ, whatever may be their employment or duties, whether general superintendent, or the lowest grade of menial laborers, all stand upon an equality of co-laborers, or employes, as regards the question of negligence toward each other. This may be the rule where the executive power, the directing and superintending duties of the corporation, are performed by the directors in person, as was the case of Warren *vs.* Erie Railway Co., (39 N. Y., 471). I have not yet learned from any respectable adjudications, that a railroad, or other corporation, by appointing a superintending agent to transact all executive duties, and surrendering to him all right to perform such duties, retaining and exercising no power to discharge such duties themselves, can escape all legal liability as master; that the superintending and controlling agent in such case can be held to be only a mere fellow servant and co-laborer, the equal with all other employes of the corporation; or, in other words, that by this device, corporations can avoid having a master to whom negligence or knowledge of defective or insufficient machinery, implements, or appliances, can be brought home, so as to create liabilities. Such a doctrine is simply monstrous. Corporations would thus be absolved from all possible liability, and the sound old maxim "*Qui facit per alium facit per se*," would be abrogated.

A corporation cannot act personally. It requires some person to superintend structures, to purchase and control the running of cars, to employ and discharge men, and provide all needful appliances. This can only be done by agents; they are the representatives of the corporation. They are then the executive head or master. Their acts are the acts of the corporation. The duties above described are the duties of the corporation. When these directors appoint some person other than themselves to superintend and perform all these executive duties for them, then such appointees, equally with themselves, represent the corporation as master in all those respects. And though in the performance of these executive duties he may be and is a servant of the corporation, he is not in those respects a co-servant, a co-laborer, a co employee, in the common acceptation of those terms, any more than is a director who exercises the same authority. Though such superintendent may also labor like other co-laborers, and he may be in that respect a co laborer, and his negligence as such co-laborer, when acting only as a laborer, may be likened to that of any other, yet, when by appointment of the master, he exercises the executive duties of master, as in the employment of servants, in the selection for the adoption of the machinery, apparatus, tools, structures, appliances and means suitable and proper for the use of other and subordinate servants, then his acts are executive acts; are the acts of a master; and then the corporation are responsible that he shall act with a reasonable degree of care for the safety, security and life of the other persons in their employ. These executive duties may also be distributed to different heads of different departments, so that each super intendent within his sphere may represent the corporation as master. In controlling and directing structures, in employing and discharging operatives, in selecting machinery and tools, thus he speaks the language of a master. Then he issues their order to their operatives. Then he is the mouthpiece and interpreter of their will. Their voice which is silent, is spoken by him. He then only speaks their executive will, not the irrespon sible will of a fellow workman or co-laborer. The corporation can speak or act in no other way. His executive acts are their acts. His negligence is their negligence. His control, their control. He has in the executive duty no equal. He is not while in the performance of these executive duties only the equal of the common co laborer or co-servant. I do not discover in this view anything in conflict with the case of Wright *vs.* N. Y. Cent. R. R. Co., or Warner *vs.* The Erie R.R. Co. Those cases have not held, that when a corporation exercises its executive power by an agent or superintendent, that they are not liable for his negligence as such, because he is only a servant of the corporation. That step in advance is yet to be taken by the courts in this country. Before it is taken, I think the court will take into consideration the consequences of such a rule. I doubt if they will be found inclined to open a door which should allow corporations or individuals to escape all responsibility for accidents occasioned by negligence of their executive agents, and thus suggest the expediency of managing all institutions in that way.

We are referred by the brief of the defendant's, counsel, to two cases recently decided in the English courts, (Gallagher *vs.* Piper, 16 C. B. N. S., 669, and Wilson *vs.* Murray decided in the House of Lords in 1868,) which, it is said, held the rule that knowledge of negligence must be brought home to the defendants; and that it is not sufficient that knowledge of such negligence be brought to the defendants' general manager, the foreman of the scaffold in the case of an insufficient scaffold. I have not had access to the books containing those holdings, and the statement from the brief does not show us whether the master or defendants in those cases, themselves, had personal charge of their own business, or whether the whole charge of the management was committed by the master to a superintendent and general manager. That is the distinction that I have regarded as important, if not controlling, and have not felt bound in this court to adopt the rule as it is claimed. I do not think it could be endured in this country. But the negligence referred to in the English case of Wilson *vs.* Murry was the negligence of a competent and skillful workman, not the negligence which consists in the employing an incompetent and unskillful one, through whose incompetence the injury happened. A very clear difference.

This case shows an absence of all evidence as to the actual power of those persons who exercised executive duties. The apparent authority, in such case, must be presumed to be the real authority. There were facts in the case that should have been presented to the jury. It was error to nonsuit.

Judgment reversed.

Book Notice.

THE CIVIL ENGINEER'S POCKET BOOK of Mensuration, Trigonometry, Surveying, Hydraulics, Hydrostatics, Instruments and their Adjustments, Strength of Materials, Masonry, Principles of Wooden and Iron Roof and Bridge Trusses, Stone Bridges and Culverts, Trestles, Pillars, Suspension Bridges, Dams, Railroads, Turnouts, Turning-Platforms, Water Stations, Cost of Earthwork, Foundations, Retaining Walls, etc., etc., etc. In addition to which the Elucidation of Certain Important Principles of Construction is made in a more simple manner than heretofore.—By JOHN C. TRAUTWINE, Civil Engineer. Philadelphia: Claxton, Remsen & Haffelfinger, 1872.

The first impression on a cursory glance through this neatly printed, compact volume, full of carefully executed small illustrations, was that the author had carried to excess the idea of simplifying the language and avoiding the higher mathematics. But the impression wore away with further study. It is a well devised compendium of rules and notes. It bristles with facts. The fineness of the type, and the liberal employment of simple and easily understood abbreviations has enabled the experienced author to present in addition to his comprehensive general values, specific facts of much interest, even to the general reader. As an example perhaps by no means the best, we cite from the chapter on Hydraulics:

A gutta percha pipe, 1/8 inch thick, and 3/4 inch bore, has sustained safely an internal pressure of more than 250 lbs. per sq. inch; equal to nearly 600 feet head. It merely swelled slightly at 337 lbs. The Croton water is carried to Blackwell's Island by a tube of that material, sunk in the East River, New York. It is kept down by weights. It is 2 1/8 inch bore, and about 1/8 inch thick. Was laid in 1851, and is still in perfect condition in 1871. Experience has there shown that on rocky bottom the pipe must be prevented from shifting with the tide, &c., otherwise it will soon wear through. It is frequently displaced by the anchors of dragging vessels. A wrapping of canvas, confined by spun yarn, has been used as a protection against abrasion.

On Suspension Bridges he says:

The greatest danger arises from the action of strong winds striking below the floor, and either lifting the whole platform, and letting it fall suddenly, or imparting to it violent wavelike undulations. The bridge of 1010 ft. span across the Ohio at Wheeling, by Charles Ellet, Jr., was destroyed in this manner. It is said to have undulated 20 ft. vertically before giving way. It had no eff-ctive guards against undulation; for although its hand railing was trussed, it was too low and slight to be of much service in so great a

span. Many other bridges have been either destroyed or injured in the same way. When the height of the roadway above the water admits of it, the precaution may be adopted of tie-rods, or anchor rods, under the floor at different points along the span, and carried from thence, inclining downward, to the abutments, to which they should be very strongly confined. In the Niagara Railroad bridge 56 such ties, made of wire ropes 1¼ inch diam., extend diagonally from the bottom of the bridge, to the rocks below. They, however, detract greatly from the dignity of a structure. Mr. Brunel, in some cases, for checking undulations from violent winds striking *beneath* the platform, used also *inverted* or *up-curving* cables under the floor. Their ends were strongly confined to the abutments several feet below the platform; and the cables were connected at intervals, with the platform, so as to hold it down.

The book appears admirably adapted for all the uses for which it is intended. The author quotes largely, but without any show of affectation, from his own experiments, which have been in many cases, the only ones on record in regard to a material or form, or to dimensions in common use in this country. For instance, the following, on glass, which is coming to be more and more used in first class buildings, for railway and other purposes:

The tensile strength of common glass varies from 2,000 to 3,000 lbs. per sq. inch. Crushing strength 6,000 to 10,000 lbs. per sq. inch, transversely, (by the writer's trials). Millville, N. J. flooring glass, 1 inch square, and 1 foot between the end supports, breaks under a center load of about 170 lbs.; consequently, it is considerably stronger than granite, except as regards crushing, in which the two are about equal. Remark, window and other glass which contains an excess of potash or of soda is very liable to become dull in time, owing to the decomposition of those ingredients by atmospheric influences.

The author urges as a reason for avoiding the abstruse mathematics, what is worthy of deep attention from all classes of readers; that "nature rarely combines high mathematical talent with that practical tact and observation of outward things, so essential to a successful engineer.

The book can, we presume, be procured of most book dealers. It can certainly be obtained by mail directly from the publishers. See advertisement in another column.

Parkersburg Branch Railroad.

At the annual meeting of the stockholders of this company in Parkersburg, W. Va., on the 28th ult., the directors presented the report of the operations of the road for the fiscal year ending September 30, 1871, by which it appears that the gross earnings amounted to $733 095 34, an increase, as compared with the preceding year, of $171,210 35, and the operating expenses, including the maintenance and improvement of the roadbed and taxes, amounted to $721,288 03, an increase of $59,507 62 over 1870. This leaves a balance of earnings of $11,80731, against a deficit of $99,895 42. The report shows that 3,927 tons, or nearly 42 miles of new and superior rails have been laid, which required 114,495 new cross-ties. Most of the bridges have been strengthened, and in some cases have been entirely renewed, besides two or three miles of additional sidings. The roadbed, in its present condition, is superior in most respects to the main stem of the Baltimore and Ohio Railroad, and by the completion of the great Ohio River bridge, uninterrupted rail communication is secured to the West.

Virginia Valley Railroad.

At a meeting of the directors of this company in Baltimore on the 28th ult., the president, Mr. Robert Garrett, made the following remarks:

Gentlemen—I have the pleasure to inform you that since the last meeting of the Board, after full consideration, arrangements were perfected by which the subscriptions of the Baltimore and Ohio Company and the city of Baltimore, each for a million of dollars, were obtained. In the expectation of accomplishing this result, our engineers were instructed to press their work, so that the whole line might be located and placed under contract at the earliest practicable period. I have the satisfaction of stating that the report of the engineer in charge (Major Richard Randolph) will now be submitted, in reference especially to the location of the route between Harrisonburg and Staunton. I trust the information will be found sufficiently definite on this subject to enable the Board to decide upon a line and authorize advertisements for contracts for the work promptly.

Full forces of engineers have been diligently engaged in locating a route between Staunton and Salem, and I hope at an early day to be able to submit the requisite information for your action on this subject also.

After the reading of Engineer Randolph's report a statement was made and papers submitted setting forth the amount of subscriptions and the releases of right of way upon each of the lines located between Harrisonburg and Staunton.

After a full consideration of the facts furnished, the action of the Board was unanimous upon the adoption of the eastern route.

Proposals for contracts upon this line will at once be advertised for, and it is designed that the line shall be pushed rapidly to completion.

The citizens of the town of Harrisonburg, recognizing the great importance of this work and its future advantage to their community, have granted the company a free right of way through their town, and the company have also been met appreciatively and liberally on the line adopted between Harrisonburg and Staunton.

The line which the Board determined to adopt possesses material advantages in distance and in grades. The length of the located line will be twenty-six miles, and the ruling grade will not exceed fifty feet to the mile. It was further determined that the location of the entire route to Salem shall be vigorously pressed, so that the entire line shall be placed under contract to be constructed at the earliest practicable period.

Tennessee Railroads.

At the sale of the interest of the State of Tennessee in various roads, recently held, the road from Tullahoma to McMinnville, twenty-six miles in length, was bought by the Memphis and Charleston Road. At the same time it bought the Winchester and Alabama Road, thirty-nine miles in length, running from Decherd to Fayetteville, Tennessee.

The new road leaves the Memphis and Charleston at or near Huntsville, crossing the Winchester and Alabama west of Winchester. From the crossing of this road south graders are now at work. From this crossing the road runs northeast to Tullahoma; from Tullahoma to McMinnville it is in first-class condition.

Graders are at work between this point and Sparta. The bridge over Collins river, three and a-half miles from town, is nearly finished, and the piers for the Caney Fork bridge are under way. From this point to the Kentucky line the road will pass through White, Putnam and Overton counties. White and Overton have subscribed $120,000 each, and Putnam will do nearly as well. There is every assurance that the road will be under contract to the State line of Kentucky by April 1, 1872.

From the State line to Danville is seventy-five miles, Nicholasville fifteen more, where it will strike David Sinton's road and a Cincinnati connection.

TRAUTWINE'S
CIVIL ENGINEER'S POCKET-BOOK.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Chesapeake and Ohio Railroad.

The annual meeting of the stockholders of the Chesapeake and Ohio Railroad Company was held in Richmond, Va., on the 7th inst. The President in his Report states that the bonds of the company now command 94 cents on the dollar, and prophesied a premium within the year. The road is now completed from the city of Huntington, on the Ohio River, to the mouth of New River. That portion of the line between the mouth of New River and White Sulphur Springs (102 miles), which will complete the line from the city of Richmond to the Ohio River, is all under contract, and the grading and masonry on eleven miles of it is completed, and the balance of the work is progressing so favorably as to leave no doubt that the whole of it will be completed, and that the cars will be running daily over the entire line from Richmond to the city of Huntington before the close of the present fiscal year.

The surveys which have been made during the past year establish the fact that connections may be made at either of several points on the Chesapeake Bay, having good harbors and abundant depth of water and easily accessible from the ocean at all seasons of the year, at moderate cost.

The funded debt of the road secured by mortgage is $11,237,100; the amount of bonds issued for funded interest is $163,844 95; dividend bonds $29,312; the floating debt $1,234,906 11.

The General Superintendent states that the earnings of the Company from passengers, freight, &c., amount to $769,265 05; expenses, $479,256 62; net receipts, $290,008 43. The increase for the year is $91,939,78. There is also a decrease in the expenses of $138,182 41.

The equipment consists of 37 locomotives, 15 first-class and 6 second class passenger cars, 12 baggage, mail and express cars, 205 box cars, 55 stock cars, 124 flat cars, 20 gondola cars, 10 caboose and boarding cars and 7 gravel cars; 100 freight cars have been purchased, and 50 freight, 61 dump, 6 gravel, 3 passenger and 1 mail and express cars have been built at the Company's shop.

The Directors of the road are; Messrs. C. P. Huntington, A. A. Low, W. H. Aspinwall, of New York; Pliny Fisk, of Pennsylvania; David Stewart, Jonas B. Clark, Wm. B. Hatch, of New York; H. C. Parsons, of West Virginia; John Echols, Wms. C. Wickham and Jos. R. Anderson, of Virginia.

International Bridge Proposed.

The Buffalo *Express*, of December 5, says: The Great Western Railway Company of Canada, finding difficulties in the proposed connection of their "Loop Line" with the Grand Trunk Railway, at Cayuga, now contemplate extending the Loop Line to Niagara river at Black Creek, and there making an independent crossing of the river, by bridges from the Canadian shore to Grand Island, from Grand Island to Tonawanda Island, and from Tonawanda Island to the eastern bank of the river at Tonawanda, where connection can be made with both the Erie and Central Railways. It is understood that engineers are now engaged in making surveys for carrying the proposed road across Grand Island, which is some six miles in width at the point indicated. We have no doubt that the point in question is, in some respects, a very favorable one for crossing the river; but it has the disadvantage, both for the railroad and this city, of being several miles removed from Buffalo. We do not know that the project has been determined upon, we are only informed that it is in contemplation, and that surveys with reference to it are being made.

Cincinnati, Richmond and Fort Wayne Railroad.

The Fort Wayne *Gazette* says that the last rail was laid and the last spike driven on the Cincinnati, Richmond and Fort Wayne Railroad on the 6th inst. The two parties of workmen, working from both ends of the route, the one under the auspices of the company and the other of Hugh McKee & Co., contractors, met each other at the expected time. Quite a number of people were present from Portland, Decatur, Fort Wayne, &c., including Hon. Wm. Parry, president of the company, Hon. Jesse L. Williams, chief engineer, Gen. Hugh McKee, builder, and others. The *Gazette* adds:

The completion of this road is an event of too much importance to the interests of this city and state to be entirely overlooked. As the continuation of the Grand Rapids and Indiana Railroad, which thrusts its long arm through the magnificent pineries of Michigan and lays its hand upon the straits of Mackinaw, it binds together and consolidates interests which hitherto have lain widely apart. The almost unrivalled situation of Fort Wayne as a railroad centre is now manifest to the world. In direct communication with the Atlantic and Pacific seaboards, the head of Lake Erie and the Mississippi river, the western shore of Lake Huron and the city of New Orleans, the eastern shore of Lake Michigan and the city of Savannah, she may well enjoy a dream of prosperity in keeping with the glittering possibilities of her future.

The district of country which this road opens up is one of the most important in the state. Leaving Fort Wayne side and side with the track of the Pittsburgh, Fort Wayne and Chicago Railway for a distance of five miles it strikes off in a direction a little east of south by a direct tangent to Decatur, the county seat of Adams county; thence nearly due south to Portland, the county seat of Jay county; thence a little west of south to Ridgeville, where it intersects the Pan Handle route; thence a little east of south to Winchester, the county seat of Randolph county, where it intersects the Bellefontaine road; and thence to Richmond. From this point through to Cincinnati it penetrates an extensive network of railroads, all of which will be benefited and contribute to the success of this line. The road will be to some extent under the control of the Pennsylvania Railroad Company, but it will lose nothing from its connection with this powerful corporation, whose ability in the management of vast public interests is without parallel in the history of railroads.

Iron Freight Cars.

The Baltimore *American* says that the Baltimore and Ohio Railroad Company have experimented with iron freight cars, and while finding them an improvement over the wooden car, it was also discovered that in numerous instances certain kinds of freight were rendered useless by the sweating process to which iron cars are subjected. To obviate the sweating process a system of ventilation was resorted to, when it was found that if the goods were not covered with dust they were in great danger of being set on fire by sparks which found their way into the cars through the channels left open for ventilation. The Company however, is experimenting with iron cars, and will use every exertion to bring them into general use.

Boston and Providence Railroad.

The earnings of this road for the year ending September 30, 1871, were as follows:

From passengers	$761,517 98
" freight	604,196 39
" rents	12,398 44
" expresses	26,979 27
" mails	6,145 51
" interest, etc	3,043 27
" dividends	1,200 00
	$1,415,480 86

Expenses, viz:		
Repairs of railroad	$78,942 62	
Sleeper account	28,213 54

Dividend 5 per cent. and Government tax, on 39,600 shares, payable November 15, 1871	202,564 10	
		577,307 70
Balance to new account		$357,575 55

Since the last annual meeting, the negotiations with the city government of Boston for the disposal of a portion of our territory to be used in the extension of Columbus Avenue have been renewed, and brought to a conclusion satisfactory to both the parties. A contract has been executed, by which, for the sum of $475,000 in cash, the remission of a claim of $7 000 for betterments assessed for the widening of Eliot street, the exemption of the corporation from all claim for betterments for the extension of Columbus Avenue, estimated at $50,000, the discontinuance of Church street, and the conveyance by the city to the corporation of its interest therein, and other considerations, the strip of land referred to in the Appendix to the last annual report has been conveyed to the city. This conveyance renders necessary the erection of a new station house in Boston, for which the directors are now making the requisite preparation, and the work will be prosecuted with all practicable dispatch.

The construction of the third track between Boston and Readville, to which frequent reference has been heretofore made in these reports, is now so far advanced as to make it quite certain that it will be completed and put in operation before the close of this month. Some unavoidable and unlooked-for delay has attended the progress of this work; but that it was unavoidable, the diligent and unceasing efforts of the managers of the road to expedite it will bear witness. We now have the satisfaction of stating that through the aid of the legislature at its last session in extending the time within which we were authorized to take land for this purpose, we have been enabled to settle every claim for land damages, and they were numerous and vexatious, without resorting to legal proceedings in a single case.

During the year especial attention has been given to the erection of new station houses on the line of the road; and it is an agreeable duty on the part of the directors to state, that all causes for the reproach which so long attached to us in respect to these most conspicuous insignia of a well-managed railroad are fast disappearing along the whole length of the line.

Those already completed, are: one at Sharon, one at Jamaica Plain, one at the Clarendon Hills, and one at Walnut Hill, a new station on the Dedham branch.

In addition to these, work has been commenced, but not completed, upon a commodious brick structure which we are erecting jointly with the Providence and Worcester Railroad, on the west side of the track, at Pawtucket. When it is finished, the old station house on the east side will be removed, and extensive arrangements made by the two corporations to better accommodate the already large and rapidly increasing freight business at this station.

During the coming year new structures will be completed at Boylston station in West Roxbury, at Hyde Park, and at Dodgeville. In addition to these we shall also be obliged to construct, in connection with the Taunton Branch Railroad (whose branch from Taunton to Attleboro' has been completed, and in operation since the first of August last), a joint station house at the junction of the two roads, near the site of our present station in the town of Attleboro'.

Before the close of the year 1873, it is hoped that we shall have rebuilt every station house on the line of the road thereby terminating all our extraordinary expenses in that department for many years to come.

All the new buildings thus far erected, have been built at a reasonable cost, and have received from the public the highest commendation.

Four new locomotives have been added to our stock during the year, two built at our own works and two by the Rhode Island Locomotive Company, in Providence.

We have also added eight new passenger cars, with a large number of freight cars, to our equipment, in addition to our proportion of the new equipment for the Shore Line, which, since the building of the new ferry boat at Groton, has taken its place as in every respect a first-class all-rail line between Boston and New York.

The authority given by the legislature to increase the capital stock of the corporation for the construction of the third track, and other purposes, has been acted upon by the directors, and the capital fixed at four millions of dollars, of which five hundred shares remain unissued, and the corporation is burdened with no funded or floating debt.

TRIAL BALANCE, September 30, 1871.

Construction and equipment		$3,844,114 42
Cash and cash funds		37,374 50

Treasurer.—BENJ. B. TORREY.

Superintendent.—A. A. FOLSOM.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 30th of November inclusive, during the years 1870 and 1871, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu
1870	430,400	17,124,700	4,805,100	3,984,700
1871	290,700	21,313,400	20,042,200	3,839,400
Dec.	139,700	*4,188,700	*15,237,200	145,300

* Increase.

The receipts of the new crop of barley are 3,799,000 bush., against 3,902,300 bush. in 1870. The receipts of 1870, from December 1st to the close of navigation, were about 600,000 bushels. It is probable there is not far from that quantity now frozen in on the canal.

By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows an increase equal to 698,040 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of November, in the years indicated:

	1869.	1870.	1871.
Canal opened—	May 6.	May 10.	April 24.
Flour, bbls.	521,300	430,004	290,700
Wheat, bushels.	18,028,800	17,124,700	21,313,400
Corn, bushels	7,038,800	4,805,100	20,042,200
Barley, bushels.	3,159,300	3,984,700	3,839,400
Oats, bushels	4,831,000	6,167,500	6,639,400
Rye, bushels	251,400	587,500	1,107,900
Malt, bushels	238,400	761,200	889,200

Virginia Valley Railroad.

Proposals will be received for the graduation, masonry, and ballasting of the first twenty-six sections of the Valley Road, between Harrisonburg and Staunton, until the 15th of January. Specifications, forms of contract and other information can be obtained at the Company's office in Staunton or on application to Richard Randolph, Engineer, at Camden Station. The construction of this Road has been undertaken by Pesident Garrett with great energy, and it will be pushed forward to early completion. This is a most important link for the trade of Baltimore. The eastern

route has been taken, by way of Mount Sidney, parallel to the Valley turnpike, and enters the town of Staunton on the eastern side.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of November, were:

Wages, etc.....	21,452 23	
Lost and damage freight..	258 80	
		50,417 82
Net earnings....		$92,162 28

The number of passengers carried over the road during the past year has been 41,988—an increase over the previous year of 25,331. Tons of freight moved, 55,028—an increase of 37,162. The President in his report says:

Negotiations in progress at your last annual meeting with the Great Western Railway Company of Canada, and the Detroit and Milwaukee Railroad Company, were concluded on the 15th day of February last. Those agreements involved a change in our western terminus from Lansing to Owosso. It is believed that the connections thus secured will prove of permanent and substantial benefit to our company.

During the past year we have laid 33 miles of rails of which 28 miles have been added to our main line. The ballasting has been completed between Port Huron and Davison station, nine miles east of Flint, and the rest of the track has been put in good condition, so that the road will be open for traffic to Flint City on the 6th day of December next. So far as completed the track is in as good condition as that of any road in the State.

We have increased the equipment of the road by the addition of four first class locomotives, four passenger coaches, two baggage and mail cars, fifty-five box and sixty platform cars. We have also arranged to put 100 box cars, 32 feet long, into the "Michigan Line," transportation, and with the quota of the Great Western Railway in the same line shall offer ample facilities for the prompt movement of freight. At Port Huron a freight house and shed each one hundred feet long have been added for the accomodation of our traffic. The docks have been extended one thousand feet, including a ferry slip, which was put into use on the 15th day of June last. The adjacent grounds have been filled in and ample sidings provided. A set of Fairbanks' track scales of the capacity of 80 tons, have been put in upon our grounds here, and connected with our main and dock tracks.

An addition of 20x50 feet has been made to our work shop, a permanent turn-table has been put in, and a second engine-house to receive three locomotives has been erected.

Station buildings at Emmet and Attica have been completed. At Lapeer a freight house 24x100 feet has been put up, and a passenger house of the same dimensions is nearly completed. The contracts for all necessary buildings at Elba, Davison and Flint, are also let, and they will be ready for occupancy within 30 days. A turn-table and an engine house to receive two locomotives, have been completed at Flint. In accordance with the contract between this company and the Great Western Railway Company, the steamer *Florence* and the barge *Kent* have been employed here since the 15th day of June in transporting passengers and cars between the two roads.

A boat of capacity to carry ten loaded cars at a trip, and with double engines and boilers, and first-class accomodations for passengers, is now being constructed and will be ready for the Spring business. A contract has been entered into with the American Merchants' Union Express Company, and they are now doing business over our road.

Over twenty miles of fencing have been built during the year. A telegraph line has also been put up and will be ready for use when our trains run to Flint.

The report of the treasurer submitted herewith shows the total fiscal operations for the year to have been $852,663 25. The gross earnings of the road were $142,580 10; operating expenses, $50.417 82; net earnings, $92,162 28. The operating expenses have been only 35 36-100 per cent. of the earnings and it is believed that with economy the expenses can be kept at about that ratio for some time. Statements of the earnings and expenses of the road for the current fiscal year, a comparative statement of the freight and number of passengers carried and of the equipment, are herewith submitted.

Arrangements are in progress for the completion of the line, and we see no reason to doubt that before another annual meeting the great work for which we have labored so long and zealously will have been finished, and in profitable operation.

The company have 7 locomotives, 6 passenger, 2 baggage, 2 caboose, 59 box freight, 100 "Michigan Line" box freight, 100 platform and 20 hand cars.

President—W. L. BANCROFT.

Directors—Isaac Gale, Artemas Thayer, Edgar White, W. L. Bancroft, W. K. Muir, Joseph Price, W. F. Drake.

Treasurer.—EDGAR WHITE.

Secretary.—E. B. TAYLOR.

Chief Engineer.—CHARLES PALMER.

General Superintendent.—W. L. BANCROFT.

New York (Viaduct) Railway.

At a meeting of the directors of this company on the 6th inst., it was decided to investigate throughly the plan approved by the old board, and to examine the principal plans which have been brought forward for rapid transit, with a view to adopting that which should prove the most feasible. For this purpose committees were appointed as follows:

Finance Committee—J. Seligman, L. P. Morton, J. F. D. Lanier, A. Belmont, and A. T. Stewart.

Executive Committee—John Taylor Johnston, William B. Duncan, William B. Ogden, S. D. Babcock, Sidney Dilon, William T. Blodgett, and Abraham S. Hewitt.

☞ The Port Huron and Lake Michigan Railroad was formally opened to Flint on the 6th inst.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, December 16, 1871.

Stock Exchange and Money Market.

Money has been quite brisk through the week. The offerings in the open market have been on a restricted scale, under the manipulations of the supply, by operators for lower stock values. The bank reserves of legal tender notes have been thus cut down materially, and lenders have been less liberal of accommodation. Call loans have been generally quoted at from 7 per cent. in currency to the same rate in gold, with a more urgent inquiry for aid from the Stock Exchange firms. In the discount line the dealings have been rather less extensive, with strictly prime to very good mercantile paper rated at from 8@10 per cent. per annum.

The city banks, in their latest return, show a reduction of $6,741,500 of legal tender notes, with an increase of $5,110,400 of specie, and a falling off of $1,108,800 of deposits; also an addition of $1,771,500 to their loan and discount averages, and $15,900 to their item of circulation. The city bank exchanges, last week, averaged $101,104,672; and thus far, this week, 102¾ millions daily. The banks now hold $5,729,375 of specie and legal tender notes, more than the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $23,185,100, against $15,935,848 same time last year. The city bank deposits are now $222,405,700 against $194,181,355 week ending Dec. 10, 1870. The legal tender reserve amounts to $45,667,400 against $49,124,022 same time last year. The circulation now stands at $30,122,800, against $32,185,477 same time last year. The loans are now $294,088,400, against $268,147,282 at this date last year.

The U. S. Sub Treasury increased its currency balance $1,999,955 and reduced its coin reserve $585,991, as the result of the week's business The receipts of the office were $10,582,768 in coin, and $4,977,669 in currency; payments, $11,118,754 in coin, and $2,977,714 in currency. The office received $2,160,000 in coin or its equivalent, from customs; and disbursed $921,049 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,897,575 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $370,044,000; and as security for deposits of public money, United States bonds for $15,229,000. The aggregate of the outstanding circulation of the National Banks of the country is $326,773,456.

Government revenues have been yielding less freely, since our last. The excises yielded last week about two millions, and thus far since July 1, about 59⅛ millions. The customs at the port of New York, last week were $2,082,576; and at the outports, equal to about $670,000 more, all in coin, or coin certificates.

Gold has been further weakened in price, during the week, by the liberal offerings while the demand from all sources has been less confident, particularly so on speculative account. The Government disbursements added largely to the floating supply, and materially to the depression of the market. The customs call was moderate. The export drain inconsiderable. The range of the price during the week has been from 109⅛@110¼ and the closing quotation on Wednesday was 109¼@109⅜ against 110 the preceding Wednesday. The specie outflow, last week, was $345,224; The Gold Exchange Bank clearances have averaged nearly 42½ millions a day during the week.

The customs demand for Gold last week, averaged $360,000 a day; thus far, this week, it has averaged $408,000 a day, or equal to a weekly aggregate of $2,448,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $32,425, and since Jan. 1, 1871, $8,461,330 against $11,492,784 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $148,415,742 against $134,711,673 same time in 1870.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Dec. 9, 1871, $81,579,039, against $84,769,464 same time in 1870.

The export drain of specie was $345,244 last week, against $800,468, same week preceding year. The shipments since January 1, 1871, have been $62,511,340, against $57,886,500 same time in 1870.

The Treasury Department on Monday held a coin reserve of $103,076,290, and a currency balance of $8,642,092.

Foreign exchange has been in fair, though not remarkably active request, and has been quoted firm in price. Bankers' sixty day bills on London closed on Wednesday at 109@109⅛; sight bills on London, 109¾@109⅞.

The produce exports from this port, week ending with Dec. 13, were to the currency value of $4,176,158.

Government securities have been quite scarce in the open market, and have been in good request, at firmer prices, the later issues of the coin-bearing bonds meeting with special favor, the demand being influenced by the re-investment of the proceeds of the Stock of 1862 now being paid off by the Government. At the same time there is more than the usual inquiry from the Savings Banks and Insurance Companies.

Under the December programme of the Treasury Department, Government proposes to sell gold, during the month, as follows: Thursday, Dec. 14, $1,000,000; Thursday, Dec. 21, $1,000,000; Thursday, Dec. 28, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday, Dec. 20, $1,000,000; Wednesday, Dec. 27, $1,000,000.

On Wednesday, Government bought in only $43,700 of Five-Twenties at 109 22@109 24. The amount of bonds offered was $323,700 at from 109 22@109 62.

In view of the buoyancy of Government Securities, and the improbability of the Treasury being able to buy them below par in Gold, the Secretary of the Treasury has called in, for the 7th of March, 1872, Twenty-Millions of the second series of Five-twenties of 1862, of which 16 millions are Coupon Bonds, and Four Millions Registered. The Coupon Bonds are contained in the following numbers, which foot up $16,684,800: $50 Bonds, 1 to 5,460; $100 Bonds, 1 to 13,093; 500 Bonds, 1 to 7,964; $1,000 Bonds, 1 to 11,120. On these bonds interest will cease on the 7th of March next, the proclamation conforming to the rule of a notice of ninety days.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117⅜@117⅝; U. S. Five-Twenties of 1862, (other than the bonds called in) 110¼@110½; U. S. Five-Twenties of 1864 at 110⅛@110⅜; U. S. Five-Twenties of 1865, 111½@111¾; U. S. Five-Twenties of 1865 consolidated, 113⅞@114⅛; U. S. Five Twenties of 1867, 115⅛@115⅜; U. S. Five-Twenties of 1868, 115½@115⅞; U. S. Ten-forties at 109⅜@109⅝; U. S. Fives of 1881 (Funding Loan) 109@109¼. Six per cent. currency bonds, 113⅜@113½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 28.	Dec. 6.	Dec. 13.

" 10-40s	90⅛	90¾	91⅛
Erie	25⅜	26¼	27⅛

The new Funding Five per cent. Loan was quoted in London on Wednesday at 90⅝@90¾.

State bonds continue in moderate demand at however, irregular prices.

Railway bonds of the better class have been in good demand for investment purposes. Of the older issues the offerings have been light, and prices quoted strong. Central Pacific Sixes have been quite scarce, and wanted by home and foreign buyers, closing buoyantly at 103@103¼ The favorites of the new loans have met with a free sale at the current quotations. The Chesapeake and Ohio Sixes have been in comparatively brisk request, and further considerable amounts of this loan have been taken on investment account on the basis of 94 per cent. and accrued interest.

Railway and miscellaneous share property has been moderately active, but with the Money supply made artificially stringent prices have been quite variable.

General business has been tame, as a rule. Breadstuffs have been unusually quiet. Provisions, in less urgent request. Petroleum, held above the views of buyers, in most instances. Cotton has been exceptionally active, excited, and higher, though closing irregularly. Middling upland cotton closed on Wednesday at 19⅞@20 cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,061,176 bales, against 1,291,125 bales same time in the preceding year; exports 456,852 bales, against 640,452 bales in the previous year; stock at the ports at latest dates, 410,539 bales, against 434,531 bales same date 1870.

At the Live Stock Markets, Beeves have been in fair demand at from 4½@13 cts.; Veals at 5@10½ cts.; Sheep at 3¼@6¾ cts.; Lambs at 6@8 cts.; Swine, at 4⅞@5⅛ cts. per lb., all live weight. The week's receipts were 7,687 Beeves, 802 Veal Calves, 24,239 Sheep and Lambs; and 41,628 Swine.

Foreign goods have been in moderate request at about previous rates. The week's imports of foreign goods reached $5,047,939, including $1,053,366 of dry goods.

Ocean freights have been quiet, with rates quoted somewhat unsettled.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Atlantic and Gt. Western Railway.

A meeting of the stockholders of the Atlantic and Great Western Railway Company of New York and Pennsylvania, was held on the 11th inst., to consider and vote upon the agreement entered into by the boards of directors of the Atlantic and Great Western Railway Company of New York and Pennsylvania, and the Atlantic and Great Western Railway Company of Ohio, for the consolidation of the two companies. A large number of the stockholders were present and the agreement was ratified. An election for directors was then held and the following board elected: General George B. McClellan, W. B. Duncan, General George B. Wright, Samuel L. M. Barlow, Abram S. Hewitt, Lawrence Wells, Lloyd Aspinwall, H. F. Sweetser, James B. Hodgskin, Reuben Hitchcock, John Tod, W. S. Sharp, and James McHenry. The board of directors then held a meeting and elected the following officers: President, General G. B. McClellan; vice-president, General G. B. Wright; treasurer, J. B. Hodgskin; general manager, H. F. Sweetser; secretary, Charles Day; auditor, C. W. Winslow.

☞ Undoubtedly one of the best Dumping carts ever used in this country, for Railroad and street Contractors, is manufactured by Wm. & Henry Hand, at Plainfield, N. Jersey. These gentlemen have had large experience in the use of carts, and consequently know what is wanted. Their invention is explained on another page of this week's issue. All they ask is a trial of their cart—price $65.

Farmers and Miners' Road.

A meeting was held at Circleville, Ohio, a few days since in the interest of what is called the Farmers and Miners' Railroad, proposed to be built from Urbana southward to London, Circleville and McArthur, where a connection is to be made with the contemplated Columbus, McArthur and Gallipolis Railroad. A member of the meeting being asked how long it would take two hundred iron furnaces to use up the iron ore on the line of this railroad, answered by saying that such a number of furnaces at full blast might work for a thousand years and have plenty left. For nearly fifty miles on the line of this road coal, iron, salt, stone, &c., abound in quantities to last for all time, and in variety and quality unsurpassed. The company will soon be incorporated and active steps taken to forward this great work.

Pittsburgh and Marietta Railroad.

There is a fair prospect that this enterprise will be a success. The road is intended to run from Pittsburgh to Marietta *via* Cambridge, Guernsey county, the entire length being in Ohio. The subscriptions asked by the Company from the several counties have, we believe, all been taken. Guernsey county has paid to the Company one hundred and fifty thousand dollars, and the work of constructing the road will soon commence at the Central Ohio Railway, working both northward and southward from that point. The full amount of stock required from Noble county has been raised, and engineers are at work permanently locating the line, and a strong construction party preparing the road-bed in that county.

Broadway Underground Railway.

The completed section of the Broadway Underground Railway, running from the corner of Warren street and Broadway southward under Broadway for several hundred feet, was again opened for public exhibition on the 11th inst. It is clean, well lighted and ventilated. A passenger car moved by atmospheric pressure was traversing the tunnel, carrying hundreds of curious passengers. An application will be made to the next Legislature for authority to extend the tunnel and carry passengers the length of the city.

☞ The first train over the Addison (Vt.) Railroad was run on the 6th inst. This new line, connecting Port Henry with the Rutland Railroad, opens communication with the whole iron region of New York, and is of great importance in a business point of view to the people along the line, and no less important to the business of Rutland and the various points with which it has connection by railroad.

☞ It was announced at the New York Stock Exchange on the 11th inst., that the lease by the Pennsylvania Railroad Company of the Cleveland and Pittsburg Railroad is to be capitalized at seven per cent., which gives 42.80 per cent. premium on the present 10 per cent. Stock, exclusively of the Quarterly Dividend of 2¼ per cent. in January.

☞ The receiver of the Indianapolis, Cincinnati and Lafayette Railroad has been authorized by the Court at Indianapolis to borrow money to pay all interest due on bonds issued prior to 1869. Also, to pay interest that will accrue until the sale of the road.

THE REDEMPTION OF 5-20 BONDS BY THE GOVERNMENT.

Of which a second instalment ($20,000 000) has been called in for payment in March next, is rapidly going on, releasing a large amount of invested capital, a large proportion of which must seek reinvestment in substantial securities.

We offer and recommend the SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY as among the **safest and most desirable securities to be had in the market for the secure investment of capital.**

A small proportion only of the loan now remains unsold, and the reinvestment of the proceeds of redeemed Five-twenties should absorb them within a short time.

Present price, 94 and accrued interest.

Interest and principal payable in gold in New York City. Interest May 1 and November 1. Denominations, $1,000, $500, and $100, coupon or registered.

The popularity of and demand for, the CENTRAL PACIFIC SIX PER CENT. GOLD BONDS, originally put on the market by us, and now in demand at from 3 to 4 per cent premium, afford an illustration of the **high standing which this class of Bonds, amply secured on well-managed and productive Trunk lines of Railroad must always maintain.**

We buy and sell, as usual, Government and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS. Accounts of Banks, Bankers, and others received, on which we allow interest. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

HARVEY FISK. FISK & HATCH.
A. S. HATCH.

☞ The last rail of the Hazleton Division of the Lehigh Valley Railroad was laid on the 7th inst. at Deringer Central Coal Works, eight miles from Hazleton, at which place it connects with the Danville, Hazleton and Wilkesbarre Railroad, the latter road having been completed to that point some weeks since, making a through route from Hazleton to Sunbury, fifty-one miles long. The first trip through from Sunbury to Hazleton was made by an engine of the Danville, Hazleton and Wilkesbarre Railroad, the next day after the two roads connected.

☞ The Lexington (Va.) *Gazette* has authority for stating that the survey of the Virginia Valley Railroad between that place and Staunton will be pushed on during the winter, and the road put under contract by March. The engineers will pass over, with their instruments, both the Brownsburg and Fairfield routes by that time, and the company will then choose the route.

☞ The contractors on the Lynchburg and Danville railroad, in searching for rock suitable for culverts and other stone work, have discovered a quarry of the finest granite, said by competent judges to be equal to any in the world.

☞ The Wilmington, Columbia and Augusta railroad has been completed to Columbia, S. C., and on and after December 13th, will open the line between the North and South via Columbia

Journal of Railroad Law.

RAILROAD COMPANIES—WHAT CONSTITUTES A DELIVERY OF TRUNK—WHEN COMPANY IS RESPONSIBLE.

The late case of Rogers *vs.* the Long Island Railroad Company, (2 Lansing 269,) was an action brought to recover the value of a trunk and its contents, which the plaintiff claimed to have given into the charge of the defendant, previously to taking passage on its road. The facts are fully and clearly stated in the following opinion by—

BARNARD, P. J.—There is no doubt but that to render a common carrier liable for goods to be carried by him, there must be a delivery to such carrier, and an acceptance on the part of the carrier of the goods to be carried. The proof shows in this case that the expressman took the trunk in qu stion to the depot of the defendant at Peck Slip, about noon on the 11th April, 1868. It was marked "Israel Rogers, Riverhead, Long Island." He found inside of the depot gate where he carried the trunk two or three men unloading freight of whom he inquired who took care of baggage. They told him the man in the office. He went to see the man in the office, and told him there was a trunk outside, he replied all right, and immediately sent two men to take care of it. The trunk was left by the expressman in the place where the baggage was kept and was inside of the defendant's inclosure and near their baggage crate, which was at the time locked. The man in the office had been defendant's ticket agent for some years. At about three o'clock on the same day, the plaintiff went to the ticket office and bought his ticket for Riverhead, and asked this agent for his trunk. He said he had seen a trunk answering the description a short time before, but did not know where it then was. The employes of the company subsequently informed plaintiff that the trunk had been given to an expressman who had a check corresponding to the one on the trunk.

The case should have gone to the jury. It is enough to establish a delivery in the first instance to prove that a person acting as the agent of the company received and accepted the property for transportation, even if there be in fact another person who is proved to be the actual agent having charge of the receipt of freight. There is no such proof in this case. The ticket agent was apparently in charge of the depot. The company which sanctions his employment and thus holds him out to the world as its agent, is not at liberty to repudiate his acts.

It seems also that the trunk in point of fact, came to defendant's possession. The agent had seen it. The defendant had delivered it to a stranger who presented a check. Who checked it? When and where was it checked? It was left unchecked and marked plainly for Riverhead. Why was it redelivered to a stranger at Peck Slip on the day of its receipt?

The case of Grovenor *vs.* The New York Central R. R. Co., (39 N. Y. 84), does not control this case. The court hold in that case that delivery must be in a proper place. That a delivery of a cutter so near the track as to be caught by a passing train, was not a good delivery. No such question is presented by the facts of this case.

The judgment should be reversed and a new trial granted, costs to abide the event.

On the Progress of the Through Railway Route to India.

The following are extracts from an elaborate paper by Hyde Clarke, Esq., (late Cotton Commissioner in Turkey), read before the Society of Arts, London, Nov. 22, 1871; Lord Henry G. Lennox, M. P., in the chair:

In 1868, I addressed the Society of Arts, and also the United Service Institution, on the subject of the daily mail route to India. I then called particular attention to the project of the Turkish government for raising funds to carry on the European system of railways in European Turkey. Since then above three years have passed, and it is desirable to consider the present state of the matter. Great events have in that time occurred, which have a more or less direct influence on the route to India, China, Japan, and Australia; for when we talk of a through-route to India, it is only a phrase for denoting communication with half the world. The opening of the Suez Canal is undoubtedly one great feature. It has materially affected the transport of goods to the East, and will affect that of passengers and mails. At all events, it facilitates the working of the route through Egypt. To some extent the Egyptian route is a rival with that overland; but the overland route cannot convey the bulk of goods, which will be left, under all contingencies, to the Egyptian line and that by the Cape. The Suez Canal, however, so far from being a fatal rival to the through railway route, is a promoter of it. By increasing the commerce of Bombay, it makes still more necessary quicker postal and personal communication with Bombay. By the facilities it has given for intercourse with Bagdad, Bassorah, and the Persian Gulf, on its Persian and Arabian shores, it is creating new resources for the direct line of connection with those countries. It is one great benefit of the Suez Canal that it has opened to the world regions formerly most productive, and so long shut off from intimate connection with the western world. In estimating the ultimate power of the Egyptian line, we must not lose sight of that great extension of railway to the south which will enable Egypt to run a line from Alexandria to a port on the Red Sea, expediting the conveyance of passengers and mails. The completion of railways from Bombay to Calcutta and Madras creates sections forming part of a railway from London to Calcutta, and thereby to the eastern regions beyond, which define and mark out for enterprise the unfinished gap between. Next to the Suez Canal must be placed the Brindisi route and the opening of the Mont Cenis Tunnel. The establishment of the Russian telegraph route to China, and of our submarine lines by the Mediterranean and Red Sea to the East, must not be omitted in the consideration. Every arrangement which increases the disparity between the telegraphic dispatch and the full detail by mail letter makes the mercantile community at home and abroad more eager to demand and obtain postal facilities. Each costly telegram acts in promotion of more rapid mails. Lastly, if we have named the Suez Canal and the Mont Cenis Tunnel, we must also refer to another great undertaking, the Pacific Railway. Nothing can well be more remote from the through railway route by Europe and Asia than that across the Rocky Mountains; but extremes meet, and they are rivals. San Francisco is now carrying passengers and mails to New Zealand, Australia, Japan, and Northern China, and this traffic must increase; but when the through railway from this side reaches Bassorah then Bassorah will compete with San Francisco on the other side of the world. The more the commerce of such remote termini as Japan and Australia is stimulated by improved transport, the more are resources developed which afford a prospect of revenue for other undertakings. The review of all that has taken place shows more fully the desirability of continuing the railway line, which is now in full operation from England and the countries of the West to the Danube. The opening and working of the Varna and Rustchuk railway, by quickening communication with Constantinople, may be named here as promotive of quicker communication with that capital. In this country, however, we have thought less of what has been done in continuation of the existing line, being chiefly occupied with the projects for the Euphrates, the Tigris, and the Persian routes. The continuous line must pass through Turkey in Europe and Turkey in Asia, and consequently Turkey must be consulted. This, it strikes me, is the point where most of our projectors are rather neglectful. Although Turkey is the country locally and mostly concerned, and which is to furnish the money, few think of consulting the wants and wishes of Turkey. Because we want to go to India at the expense of the Turks, or because we want to get a contract for making long lines of railway for which they are to pay, it seems to be sufficient reason why they should comply with our demands. It is this condition of affairs which has much retarded the progress of the undertaking, and which has ended in the works being confided to foreigners instead of Englishmen. Because we want to go to India, we set aside the consideration that the Turks want to connect Constantinople with the European system, and because we want to reach Bagdad and Bassorah, we are to forget that the Turks have their own need for communicating with those cities from their metropolis, and that they have political objects to accomplish, and local requirments of traffic to satisfy. It is in view of this state of affairs that I have endeavored on former occasions, and shall do so now, to direct attention to the Turkish portion of the line, and to its present condition. The European system, as all are aware, reached Basiash, on the Danube, many years ago, and there it halted. In my last paper, it was stated that the Sultan had, in consequence of his visit to this country, become urgent for the extension of railways in his empire, and had granted concessions for the European section and for the Asiatic section. The main feature is, of course, the artery from the European or Austro-Hungarian lines and the Danube to Constantinople. With this are combined cross lines, one from Nish, south, to reach the Mediterranean at Salonica, another from Adrianople to the same sea for local purposes, and a line from Adrianople by the shore of the Black Sea to reach the Varna and Rustchuk railway. It is one main transverse line with arms. With this general description of the undertaking we must be contented, because the surveys are not complete, and even the point of junction with Austro-Hungary is not fully settled. This would naturally be through Servia by or near Belgrade, but the government of the Servian principality naturally appreciates the military and political capabilities of the line and is therefore unwilling to facilitate it. Such a line enables Turkey and Austro Hungary to concentrate forces in Servia, and prevent that district from being made a post of Russia within the Danubian bounds. Servia wishes to divert the line for its own purposes, and prefers that its own lines shall be on a different gauge. On the other hand, the Roumelian railway directors threaten to leave Servia on one side, and to pass through Bosnia. Bosnia does not, however, present the same natural facilities. This matter consequently delays the arrangements, although ultimately there can be little doubt there will be lines through both Servia and Bosnia. The tide of progress by means of the railway system is now flowing towards the east. Lines through Austro-Hungary and Russia make a connection by the south with Southern Russia, and the northern shores of the Black Sea are now in commercial relation with Western Europe. The Varna and Rustchuk Railway, already referred to, offers an extension to the system towards the east shores of the Black Sea. Thus there is, as it were, a prosperous flood ready to be poured over the southern provinces of the Danube the moment a connection can be accomplished. This is a circumstance which must not be omitted, because a continuous railway communication means the

continuous transmission of western enterprise, habits of progress, artizans, agriculturists, industrial and agricultural machinery over the barbarous regions of Bulgaria and Thessaly, enabling them to raise produce for railway transport and revenue, and directly contributing towards the Turkish treasury. If one line be carried from Vienna to Filibeh or Adrianople, it means that these latter secluded cities will have the resources of Vienna available, and will have their commodities at the prices of Vienna, their imports reduced to Vienna prices and their exports raised to the same rates. These, therefore, are among the purposes of Turkish policy. They are not constructing a line solely for intercourse with India, which will give no immediate returns, but constructing, at their own expense, a line for local and imperial purposes, for which they can pay, and which will serve as a route for us. If they strengthen their political power, increase the wealth and efficiency of their people and improve their finances, they are disposed to make the effort, and expose themselves to considerable sacrifices. One great nucleus of the main Roumelian artery is Adrianople. Here works have been begun on both sides. On the eastern side, or on our side, the works are in active progress towards the city of Filibeh or Philippopoli. This line proceeds along the upper valley of the great river Maritza, towards the passes of the Balkan mountains. If it does nothing else, it will, on its opening, afford a local line for the ancient metropolis of Adrianople. The rails of this line are now being carried up the Maritza. Although so far inland, materials can be conveyed to Adrianople, as it is itself on the river Maritza, which is navigable from the sea by floats or rafts. On the western side the works are being carried to Dede Aghij (Ahaj). At the Constantinople terminus there has been opened this year the little section of 15 miles, through the suburbs of Constantinople to Kuchuk Chekmejeh (Little Drawbridge). Another small portion towards Benyuk Chekmejeh (Great Drawbridge) is ready for opening. These portions of the Constantinople and Adrianople line proceed along the shore of the Sea of Marmora, and will serve local purposes, step by step. Within Constantinople a large terminus is in progress, so as to secure a sea wharf, and it will be connected by the tramways, open and in progress, with other quarters of the city and the suburbs on the northern Bosphorus. Of the Salonica line, as it is a subsidiary line, it will be sufficient to say that it has been vigorously pushed. By about this date the section to Uskhub has been opened from Salonica as far as Karasoole, 56 miles, a very fair proof of the energy employed. It is expected the connection of Salonica with the European system will take place before that of Constantinople, and as it is well placed in the Mediterranean, it is supposed it will become an important commercial port, and for transit will compete with Brindisi advantageously. It will accommoda e Thessaly, Bulgaria, the middle Danube, Roumania, Servia, and even eastern Hungary and Transylvania, as a harbor for export and import. It is expected to afford steam communication with Smyrna, Athens, Syria, the islands of the Archipelago, Cyprus, the coast of Syria, and Egypt. It is also proposed to be employed in connection with the Mediterranean terminus of any line which may be opened by the Euphrates or Tigris with Bagdad and Bassorah. Whatever may be its power of competing with Brindisi from this point, Salonica can certainly accommodate Germany and Austro-Hungry. The Turkish Government having applied its energies to the Roumelian or European section then turned attention to the Asiatic or Anatolian section. The Roumelian section is, however, such a burden on the treasury, that the Government is not yet disposed to encounter that of the Anatolian undertaking. It is, however most anxious to promote it, and it has begun what may be called a trial work. With regard to a bridge over the Bosphorus, for which there are plans by Mr. McClean and others, that is not of necessity at this moment. The section selected is from the southern suburbs of Constantinople, or from Skutari to Ismid. It is considered by the Government to be important to develop the railway system in the neighborhood of the capital, and this line is an essential portion of a through route. At this point of Ismid begins the great question of the course of the line to the East. This I shall not attempt to decide, for my province has been rather to show what has been done. One route strongly advocated is by the east of Persia. We have now come to the point where an intermediate port is to be found for working, temporarily or permanently, the railway from the Mediterranean to Bagdad, in connection with steamers from Brindisi. It will, however, be seen that another way will be opened from Salonica. Mr. W. P. Andrew long favored Suedieh, and the restoration of the port of Seleucia, but is now, it is understood, ready to accept Skanderoon. The Government have wished not to displace the old port of Skanderoon for the creation of a new town. Either the Euphrates or Tigris line will reach Bagdad. In India itself we have now a connected railway system from the port of Bombay, and there will be another port of junction at Kurrachee. This system, as we have seen, is joined to Bassorah and Bagdad. At present this great section of the through line and this vast plant is only available for the local service of the decayed but newly growing city of Bagdad. If the through line reaches Bagdad, or if Mr. Andrew's instalment of it is perfected, then there is all the machinery for bringing passengers from further India to the Mediterranean shore, and within about two days of a station of the European railway system. It is this large traffic of all India which is waiting for us, and to be augmented by that of Ceylon, the Netherlands and Spanish India, China, Australia, and New Zealand. Such must, in the end, afford a remunerative return, not only on the whole enterprise, but on its accessories, and render possible many great yet subsidiary projects, which are now delayed for want of encouragement. Such as improved means for crossing the channel, and the plans already referred to for crossing the Bosphorus. By establishing main lines, they will facilitate the lines with light rails and with light working stock, of which we hardly know the beginning, but of which the future extension must be so great. Within a couple of years, Turkey will be able to place troops on the Danube, and to receive in case of need the aid of Austro-Hungarian armies on the Danube, or even in Asia Minor. We can already afford military help to Bagdad, and confirm the Turkish power; but if there were a through line, we can send a contingent from India to give assistance even in Asia Minor. To Turkey, the value of the through line is that it enables her to secure Bulgaria, Bosnia, and Thessaly, and to keep down the tribes of Koords and Arabs, who have until lately, resisted her supremacy, as they did that of the Greek and the Roman empires. Such undertakings, bringing with them the blessings of prosperity, increase the guarantees for peace; but to us, besides holding out a participation in such advantages, they tend to promote moral objects in which we have a still deeper interest—the welfare of our own people in India, and the natives under our protection and tutelage.

☞ Articles of incorporation were granted on the 13th of November to the Little Rock and Hot Springs section of the branch of the Missouri, Arkansas and Louisiana Railroad and Telegraph Company, of Arkansas, and the following board of directors elected: Ph. Lee Anthony, T. C. Peek James Lawson, J. J. Clendenin, and W. E. Woodruff, jr. The officers are: President, P. L. Anthony; Treasurer, S. H. Tucker; Chief Engineer, Arnold Syberg.

☞ The cars on the Camden (N. J.) Passenger Railroad commenced running on the 25th of November.

Illinois Central Railroad.

The statement of this Company for the month of November, 1871, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,417.15 for	$22,078 86
Acres Int. Fund Lands sold	40 for	376 20
Acres Free Lands sold	366.29 for	4,772.42
Total sales during month of November, 1871	2,823.44 for	$27,227 48
To which add Town Lot Sales		
Total of all	2,823.44 for	$27,227 48
Cash collected in November, 1871		$84,252 41

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 402 Miles.	Total. 1109 Miles.
Freight	$414,554 00	$80,268 00	$494,822 00
Passengers	105,105 86	38,106 70	144,212 56
Mails	6,375 00	3 059 33	9,434 33
Other sources	69,000 00	2 440 67	71,440 67
Tot. Nov., '71.	$596,034 86	$123,874 70	$719,909 56
Tot. act'l earn'gs, Nov., '70	$665,291 01	$146,416 50	$811,707 51

☞ The last rail on the Connecticut Western Railroad, connecting the eastern and western sections, was laid at Canton on the 7th inst. The road is 67½ miles in length, extending from Hartford, Conn., to Millerton, on the New York State Line, where it connects with the Dutchess and Columbia Railroad, running thence to Fishkill on the Hudson River, a farther distance of 58 miles.

☞ It is stated that there is a movement for the early construction of a narrow gauge railroad from Rutland, Vt., to Whitehall, N. Y. The movement is inaugurated by the marble dealers of West Rutland and the slate dealers of Hydeville and Fair Haven, and it is backed up by the transportation companies of Whitehall.

☞ A railroad survey is now being made along the western shore of Lake George from Caldwell to Ticonderoga. The only obstruction to such a road is Hagua Mountain, and it is said there is a ravine in that through which a road may be run with a rise of only thirty-five or forty feet to the mile.

☞ The earnings of the Central Pacific Railroad for the month of November, 1871, were $898,862, against $777,513 for November, 1870—an increase of $121,349. For the first eleven months of 1871, the earnings were $8,796,341, against $7,411,425 for the corresponding period of the previous year—an increase of $1,383,916.

☞ The last rail on the St. Louis, Lawrence and Denver Railroad was laid on the 2d inst. The road runs from Lawrence to Pleasant Hill, Mo., where it connects with the Pacific Railroad of Missouri. It is leased to and will be operated by the latter company.

☞ The last rail on the Shepaug Valley Railroad, running from Hawleyville on the Housatonic Railroad to Litchfield, Conn., was laid on the 7th inst.

☞ The associated railways of Germany consist of 78 companies, owning 19,145 miles of road. The number of miles added during the year was 1,967.

United States Mint.

The annual report of the Director of the United States Mint covers the operations of the Min and branches for the fiscal year ending June 30, 1871, thus:

The deposits of bullion at the Mint and branches during the fiscal year were as follows: Gold $37,054,202 26; silver, $5,975,982 54; total deposits, $43,030,184 80. Deducting from this total the redeposits, or bars made at one branch of the Mint and redeposited in another for coinage, the amount will be $39,147,404 18.

For the same period the coinage was as follows: Gold coin, number of pieces, 1,120,916; value, $21,302,473; unparted and fine gold bars, $13,101,089 42; silver coin, pieces. 3,664,792; value, $1,955,905 25; silver bars, $3,544,180 13; nickel, copper and bronze pieces, 11,672,750; value, $283,760; total number of pieces struck, 16,458,458; total value of coinage, $40,187,409 80.

The distribution of the bullion received and coined at the Mint and branches was as follows:

Philadelphia.—At Philadelphia, gold deposited, $3,064,733 31; gold coined, $3,206,760; fine gold bars, $129,184 88; silver deposited and purchased, $1,557,892 50; silver coined, $1,156,255 25; silver bars, $143,647 75; nickel copper and bronze coinage, value, $283 760; total deposits of gold and silver, $4,622,625 81; total coinage, $4,919,607 88; total number of pieces, 13,670,015.

San Francisco.—At the branch mint, San Francisco the gold deposits were $25,521,650 56; gold coined, $24,241,006 23; silver deposited and purchased $937,577 89; silver coined, $908,015 27; total deposits and purchases, $26,459,228 45; total coinage, $25,149,021 50; total number of pieces, 2,649 900.

New-York.—The Assay Office in New York received during the year, in gold bullion, $6,345,338 88; in silver bullion, including puchases, $2,171,120 26; total value received, $8,516,459 24; number of fine gold bars stamped, 9,769; value, $5,461 801 10; silver bars, 10,763; value, $1,269,501 75: total value gold and silver bars stamped, $6,731,302 85.

Denver.—At the Assay Office, late branch mint, Denver, Col., the deposits for unparted bars were: Gold, $1,104,147 10; silver, $18,561,63; total deposits, $1,122,708 73; an increase of deposits over the last year of $116,658 47. This is very gratifying, and encourages the belief that as the mineral resources of the district are developed the business of this office will be correspondingly increased. It is now engaged, as last year, in melting, assaying and stamping gold and silver bullion in unparted bars, bearing the Government stamp of weight and fineness. The assay office, in the performance of its appropriate functions, fully meets all the demands of the mining interests of Colorado.

Charlotte.—The deposits at the branch mint at Charlotte, N. C., have not been large, and are not increasing. The deposits. as heretofore, are as sayed and returned to depositors in the form of unparted bars. The deposits for bars during the year were: gold, $14,522 81; silver parted from gold, $145 31; total deposits, $14,668 12, a decrease from last year of $1,440 48.

Dahlonega and New Orleans.—The branch mints at these places are still closed. No necessity exists for their being opened again as assay offices or branch mints.

Carson City.—This branch mint has been in successful operation during the past fiscal year, and the prospects for the future are most encouraging. The deposits during the year were—gold, $1,003,809 60; gold coined, $230,715; unparted gold bars, $731,320 79; silver deposits and purchases, $1,290,684 85; silver coined, $52,875; unparted and fine bars, $1,969,645 05; total deposits and purchases, $2,294,494 45; total number of pieces, 138,543.

This statement exhibits the gratifying fact that the amount in value of the gold and silver deposits during the year has exceeded that of the past year more than $2,000,000. The Superintendent, in his report, expresses full confidence in the future of that branch. A bullion fund, adequate to the exigences of the business of the mint, has been provided, and full authority has been given to melt, assay, and stamp gold and silver bullion, and return the same to depositors in unparted bars, bearing the Government stamp of weight and fineness. This has largely increased its business, and added to its usefulness.

The continued suspension of specie payments restricts the work of the mint and the amount of the coinage. The capacity of the mint and branch mints now in operation is more than sufficient to meet every demand for the conversion of the gold and silver deposits into coin, and, consequently, there is no legitimate necessity for increasing the number of branch mints.

From the discoveries and developments constantly making of the deposits of the precious metals in our Western States and Territories, it is not beyond the practical and real to say that, before another decade, the annual production of gold and silver in the United States will be more than doubled. The reports are full of encouragement, but at the same time care must be taken by the prudent to distinguish between the true statement and the exaggeration of the mere speculator.

New York Elevated Railway.

The third mortgage interest in the Elevated Railway was sold at auction on the 6th inst. by Mr. James C. Miller, at the foreclosure of Mr. Nathaniel Jarvis, Jr., referee. This mortgage, of course, covered all the property and franchises of the road subject to the first two mortgages. It was purchased by the newly formed organization called the "New York Elevated Railway Company," for $230,000. The parties concerned in this enterprise own a majority of the bonds secured by the previous mortgages. The company intend to complete the road to Harlem River, and put on new dummies and cars as soon as possible. The following officers and directors have been elected: W. L. Scott, president; David Dows, treasurer; D. N. Barney, F. H. Tows, Ashbel H. Barney, John D. Main, Harry Kennedy, W. L. Wallace, Geo. H. Marvin, John A. Cowing, Geo. C. Martin, Alfred C. Barnes, F. A. Foster.

☞ The Monadnock Railroad, which now runs from Winchendon, Mass., to Peterborough, is to be extended 18 miles to Hillsborough Bridge next spring and summer, making the distance from Winchendon and Keene by rail 29 miles less to Concord than at present. The distance from Keene to Concord by turnpike is 40 miles; by rail, via Groton Junction, Mass., and Nashua, about 111 miles; via Winchendon, 82 miles.

☞ Articles of association of the Chicago, Continental and Baltimore Railroad Company were filed in Indianapolis, at the office of the Secretary of State, on the 7th inst. The Indiana portion of the proposed line will run through the counties of Lake, Porter, Laporte, Stark, Marshall, Fulton, Wabash, Kosciusko, Wells and Adams, a distance of 165 miles. Capital $15,000,000.

☞ The Galveston papers announce the sale, on the 1st inst., of the Galveston, Houston and Henderson Railroad, under a decree of the District Court of the United States for the Eastern district of Texas. The purchaser was Mr. F. O. James, of New York, and the amount paid $675,000.

☞ Work on the railroad from Freehold to Keyport (N. J.) was commenced at Marlboro, Monmouth county, on the 4th inst. The distance is thirteen miles.

☞ It is the intention of parties interested to build a railroad from the terminus of the Vineland Railroad at Atsion, N. J., to Bordentown—thus giving an all-land route from Delaware Bay to New York.

☞ The Central Railroad Company of New Jersey have declared a quarterly dividend of 2½ per cent, and an extra dividend of 1 per cent, payable January 20, the transfer books closing December 27.

RAILROAD IRON.

300 Tons 56 lb. English Rails, slightly rusted by Salt Water, for sale by

W. H. PETIT,
72 Wall St., N. Y.

RAILROAD IRON.

1,400 Tons 40 lb. Welsh Rails, made by the Rhymney Company, in store for sale by

PERKINS, LIVINGSTON & POST,

I. A. WILLIAMS'

UTICA HEAD LIGHT WORKS,

UTICA, NEW YORK.

Established 1851.

Williams' New Patent Coal Oil Head Light,

WITH BRAZED SAFETY BURNER,

Which will not take *fire* or *explode*, and is adapted to any make of Head Light Chimney. These Head Lights are either of Cylindrical or Square Form, and of first class workmanship. The Silver Plating on the Reflectors is warranted for fifteen years. They are acknowledged by all to be the best Head Light manufactured ,and are used on nearly all principal Railroads in the country.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

Richmond and Danville Railroad.

The 24th annual meeting of the stockholders of the Richmond and Danville Railroad Company was held in Richmond on the 13th inst. The president's report was submitted. Affairs generally are thought to be satisfactory. There is a large increase in the freight business. The lease of the North Carolina Railroad is explained as holding out promise of increase of business to the company. The state's interest in the company's securities has been managed through third parties, who are close and valued friends to the road. The granite quarries now opening near Richmond promise a valuable business, as do also the Midlothian coal fields. The Roanoke Valley Railroad will be built if enough local aid can be secured. The road between Charlotte, N. C., and Atlanta, Ga., which will be completed next year, will give the Richmond and Danville road traffic with an extensive and valuable section of the South on a line 120 miles shorter than any other connection. The total earnings of the road last year were $758,072 40; expenditures $498,044 89, of which ordinary expenses were $413,836 78, leaving net earnings for the year $344,235 62. The report was adopted. Officers were then elected as follows: president, Col. H. S. Buford; directors, A Y. Strokes, H. H. Marshall, John R. Edmonds, W. T. Sutherlin, W. L. Owen; examining committee, W. B. Isaacs, T. D. Neal, Wood Bouldin, Jr., W. T. Scott and R. V. Gaines.

Mexico in 1870.

Under date of Oct. 12, 1871, Senor Ant. Garcia Cubas publishes in "El Federalista," of the City of Mexico, a very valuable series of statistics relating to the Republic. He makes the population 9,176,082, and gives the official valuation of real estate at $341,030,517, asserting at the same time that the actual value thereof is not less than three times such amount. Of the valuation, $148,299,893 is city and $192 730,624 country. The shipping movement in 1869-70 amounted to 542.044 tons, and the exports and imports to $24,000,000 and $28,174,729 respectively. Of the exports $17,479,014 represented the precious metals exported, and the remainder, domestic produce. The railroads in operation have a length of 347.23 Kilometres, or 215.77 English miles; and the length of telegraph in operation is 2,643.28 Kilo-metres, or 1,642.53 English miles. The railroads are as follows:

	Kilo-metres.	Miles.
Mexico to Puebla	186.28	115.78
Vera Cruz to Paso del Macho	75.00	46.59
Vera Cruz to Medelin	12.00	7.45
Vera Cruz to Loma Alta	35 00	21.78
Mexico to Tacubaya	8.00	4.96
Mexico to Tlalpan	24.25	15.06
Mexico to Guadalupe	6.70	415
Total	347.23	215.77

The telegraph lines are stated as follows:

	Kilo-metres.	Miles.
Mexico to Cuernavaca	83.80	52.07
Mexico to Toluca	67.40	41 88
San Luis to Zacatecas	184.36	114,56
Zacatecas to Durango	54.47	46.27
Tehuacan to Oaxaca	272.35	169 24
Vera Cruz to Tampico	288.50	179.27
Mexico to Vera Cruz, Tehuacan, Tlaxcala and Tulancingo	1,047.52	624.35
Leon to Gaudalajara and Manzanillo	645.26	400.96
Total	2,643.28	1,642.53

The population is distributed among the States and territories thus—

Sonora	109,888	Hidalgo	404,207
Chihuahua	179,971	Mexico	650,663
Coahuila	98,897	Morelos	150,384
Nuevo Leon	174 000	Guerrero	300 029
Tamaulipas	108.778	Puebla	697,788
San Luis Potosi	476.500	Tlaxcala	121,665
Zacatecas	397,945	Vera Cruz	459,262
Aguas Calientes	140 630	Oaxaca	646,725
Durango	185,077	Chiapas	193,987
Sinaloa	163,095	Tabasco	83,707
Jalisco	924,580	Campeche	80,366
Colima	63,333	Yucatan	422,365
Michoacan	618.240	Territories:	
Guanajuato	874.043	Baja California	21,645
Queretaro	153,286	Federal District	275,996
Total population			9,176,082

The ports open to foreign commerce are:

On the Gulf—Matamoros, Tampico, Tuxpam, Vera Cruz, Coatzacoalcos, Tabasco, Isla del Carmen, Campeche, and Progresso (Yucatan).

On the Pacific—Guaymas and La Paz (Gulf of Cortes); Mazatlan, San Blas, Manzanillo, Acapulco, Puerto Angel, Ventosa (in Tehuantepec, Tonala and Soconusco, the last named also a frontier post.

Frontier Custom Houses—Matamoros, Reynosa, Camargo, Mier, Monterey, Laredo, Guerrero, Piedras Nigras, Presidio del Norte, Paso del Norte, Fronteras, Babispe. Magdalena, and Altar.

Coast Custom Houses—On the Gulf: Soto la Marina, Tecolutla, Nautla, Santecomapan, Alvarado and Dos Bocas; and on the Pacific: San Quintin, Cabo de San Lucas, San Jose del Cabo, Mulege, Loretto, Libertad, Santa Cruz, Topolcampo, Altata, Navachiste, Navidad and Valle de Banderas, Sibuatanejo and Puerto Escondido.

The coinage at the several mints in the year 1869-70 amounted to $21,019,241 80, of which $19.817,820 10 was silver, $1,182,628 gold, and $18,793 20 copper. Of this amount the mint at Hermosillo produced $730,145; at Alamos $797,082; at Chihuahua $630,252; at Culiacan $1 508,616; at Durango $922,791 · at Zacatecas $4,684,000; at San Luis $,2,267,098; at Gaudalajara $685,864; at Guanajuato $4 000,000,; at Oaxaca $214,143; and at Mexico $4.579 198 80. Copper coins are minted at Mexico solely. The legal exportation of gold and silver from the ports of the republic in 1869-70 is stated at $17,479,014. The federal income in same year amounted to $14,420,-

575 67½, of which $9,029,373 24 was derived from the maritime and frontier custom houses. Such are the official statistics of a nation numbering 9,000,000 souls. No nation is richer in mineral resources, and few can compete with it in soil and climate. Yet of all its agricultural wealth not more than $7,000,000 worth is exported. Indolence and unthrift are here national sins, and as a consequence the great body of the people are steeped in poverty. In only a few of the larger cities are there any manufactures, and with little exception these are of the coarsest description. Whatever is fit for civilized man is brought from foreign countries and paid for in the precious metals.

Old Colony and Newport Railroad.

The income of this road for the four months ending September 30, 1870, and for the twelve months ending September 30, 1871, has been as follows:

	Four months, 1870.	Twelve months, 1870-'71.
From passengers	$417,528 16	$1,020,573 16

Balance of income account September 30, 1871		$486,956 33

The dividend of January 1, 1872, is to be taken in part from this balance.

By a recent law of the Commonwealth, all returns by Railroad Corporations are required to be made up to September 30 in each year.

As it would be attended with great inconvenience and considerable expense to keep two separate sets of accounts, one for stockholders, and the other for the Commonwealth, it was decided at the Annual Meeting of 1870 to change the By-Laws so as to allow the accounts of the Company to be made up to the first days of April and October, and to defer the Annual Meeting until the last Tuesday in November.

The foregoing Report, therefore, covers a period of one year and four months, from May 31, 1870, to October 1, 1871, embracing the four summer months of two years, during which months the gross receipts are much larger than for equal periods in the remaining portion of the year. This in some degree accounts for the large balance of net profits shown by the foregoing statement.

During the severe competition in the years 1867 and 1868, for the New York business in connection with the boats, it was found necessary to loan money to the Boston, Newport, and New York Steamboat Company, and in the final settlement made in 1869, by which the Newport Line was withdrawn and new connections were made by this Company with the Narragansett Steamship Company, it was agreed to contribute a certain proportion of the prospective profits of the new line to the Boston, Newport, and New York Steamboat Company, which held an exclusive contract for ten years, to form with us a New Line.

This amount, charged to contracts on our books, stood at the commencement of the year at $100,000, and as the balance of net profits seemed to justify, the directors have deemed it best to dispose of the matter now, by charging off this sum from our accounts in the manner indicated in this Report.

The Gross Receipts of the road were, for the year ending Sept. 30, 1871	$1,671,478 51
For the year ending May 31, 1870	1,536,895 24
Increase in receipts	$135,083 27
The working expenses for the year ending Sept 30, 1871	$995,841 90
For the year ending May 31, 1870	899,359 74
Increase in working expenses	$96,482 16
The amount paid for interest and taxes, not including tax on dividends, was, for the year ending Sept. 30 1871	$267,224 09
For the year ending May 31, 1870	277,412 26
Decrease	$10,188 17
The net earnings, after paying interest and taxes, were, for the year ending Sept. 30, 1871	$408,412 52
For the year ending May 31, 1870	359,623 24
Increase	$48 789 28

The increase from passengers was $69,000 48; the increase in the number of passengers carried was 598,781.

The increase of receipts from freight was $48,128 05; the increase of tons carried was 51,383.

Of the increase from passenger receipts, $46,323 21 was from the local business. The local freight receipts have increased $45,017 71. And those from connecting lines decreased $1,889 66.

Two new locomotives, six passenger-cars, forty-eight freight-cars, and nineteen coal-cars have been added to the rolling-stock.

Five locomotives, two passenger-cars, twenty freight-cars, and fifteen gravel-cars have been rebuilt.

About 800 tons of new iron, and 500 tons of steel rails, and 39,000 new sleepers have been used in repairing the track, and 2,000 tons of rails have been taken up, repaired, and relaid.

Land has been filled up at South Boston to increase our yard room. A paint-shop in Boston, and a new engine-house and turn-table have been built at Fall River, at an expense in all of about 18,000.

All the above additions, renewals, and repairs have been charged to expense account, and paid for out of our earnings the past year.

The road, equipment, and property is in good and efficient condition.

The foregoing statement shows a healthy growth in the business of the Company.

There appears to be an increase of $96,482 16 in the expenditures of the Company during the year, over the year ending May 31, 1870, caused in part by an increase of 68,264 in the mileage of trains. This increase is further accounted for in the following items:—

Increased cost of iron (500 tons steel rails laid)	$18,000 00
Increase in side tracks	8,000 00
Increase in expenditure on equipment charged to expense	67,394 76
	$93,394 76

During the past year, the Granite Branch has been completed to West Quincy, at a cost of about $100,000, and is now open for public use. A large business in the transportation of stone from the quarries in Quincy is anticipated over this road in connection with other portions of our line.

The Duxbury and Cohasset Railroad has also been completed during the year, and is now open for use. This Company has aided the South Shore Railroad Company in providing means for payment of its subscriptions to the stock of the Duxbury and Cohasset Railroad, by guaranteeing its bonds to the amount of $125,000.

A business contract has been made between this Company and the South Shore Railroad Company, and Duxbury and Cohasset Railroad Company. The business done in connection with this line has exceeded the anticipation of the directors.

The directors have recently made arrangements for the construction by this Company of the Shawmut Branch Railroad, in the sixteenth ward of the City of Boston, under the provisions of Chapter 325 of the Acts of 1871. This branch commences near the Granite Bridge Station of the Dorchester and Milton Railroad, and runs northerly through the centre of the ward to its intersection with our main line, near Commerical Street, a distance of 2¼ miles. The territory through which it passes contains some of the most desirable building sites within the city limits, and is now in process of rapid development. The larger portion of the land damages upon the line will be settled without expense to the Company. In the hands of a rival or independent company, it would have proved a serious annoyance to us. The estimated cost of the branch is $150,000. When completed, the directors are confident it will make a fair return upon its cost.

The citizens of Plymouth and the adjoining towns obtained from the Legislature at its last session a charter for a Railroad from Plymouth to Sandwich, and have asked aid from us in the construction of this road. As the route proposed for this road for one third of the distance, southerly from our terminus to Plymouth, passes near considerable manufacturing establishments, and the summer resorts at Chiltonville, Manomet, and Cedarville, and would probably increase the business over our road, the directors, for these reasons, think it for the interest of this Company to furnish not exceeding $133 000, being one third the cost of said road, when its friends shall have provided the balance necessary for its construction. This they are sanguine of accomplishing.

The directors have thought it best to ask of the Legislature authority to increase the capital stock, for the purpose of reducing the funded debt of the Company whenever the stockholders may vote to do so. Acts have been passed authorizing an increase of the capital of the Company to $6,600,000.

The directors recommend to the stockholders he acceptance of the Act, Chapter 54 of the Acts of 1871, but do not advise the issue of any more stock at this time.

They also recommend that Chapters 257, 288 and 325, of the Acts of 1871, be accepted, and that the directors be empowered to take action in the premises.

During the past year, a business contract has been entered into with the Boston and Providence Railroad Corporation, the Taunton Branch Railroad Corporation, and the New Bedford and Taunton Railroad Corporation, for the transaction of that portion of the business of the respective lines in which they have conflicting interests. Under this arrangement, trains are now run between New Bedford and Boston, over our line, without change of cars, thus bringing new business upon the road. The connection has thus far proved mutually satisfactory to all parties in interest.

The arrangement made in 1869 with the Narragansett Steamship Company continues to work well, with satisfactory receipts.

Considerable reduction has been made during the year in the local fares and freights, especially in the district within fifteen miles from Boston. This has resulted in an immediate increase in our business; and the development of the towns and villages along the line of the road promises a greater increase in the future.

We believe that our train arrangements and the rates of fares and freights are generally satisfactory to the patrons of the road, who seem to appreciate our endeavors to accommodate and build up the business on the line, by the increased patronage they have given us.

Some of the depots upon the road must soon be enlarged, and additional equipment provided. The directors believe that this can be accomplished out of the earnings of the road, and still pay reasonable dividends to the stockholders.

The equipment of the road is as follows: 28 passenger and 12 freight locomotives; 76 passenger, 20 baggage, 117 long box, 229 long platform, 9 cattle, 25 stone, 20 short platform and 109 coal and gravel cars. Number of miles run by passenger trains, 664,179; by freight trains, 285,584; by gravel trains, etc., 40,899—total miles run one year to September 30, 1871, 990,662, an increase over the year ending May 31, 1870, of 68,264 miles. Number of passengers carried the past year, 3,332,750; do., carried one mile, 45,437,286. Tons of merchandise carried the past year, 395,157; do., carried one mile, 10,845,206.

President.—HON. ONSLOW STEARNS.

Directors.—Onslow Stearns, Uriel Crocker, Benjamin Finch, Charles F. Choate, Oliver Ames, Samuel L. Crocker, John S. Brayton, Jacob H. Loud, and Royal W. Turner.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—W. H. BULLOCK.

☞ Ground was broken at Dunstable, Mass., on the 11th inst., on the Nashua, Acton and Boston Railroad.

Little Rock, Pine Bluff and New Orleans Railroad.

Col. Jas. M. Lewis, President:

In response to your inquiries, I have the honor to submit the following statement:

On the Little Rock, Pine Bluff and New Orleans railroad, eighty miles are graded, bridged and furnished with cross ties. The road, as regards the grades, curvature, width of road-bed, bridges, and quality of cross-ties, is fully up to the requirements of a first class railroad.

As you are aware, the overflow of last spring broke through and swept away some portions of our embankments along the Mississippi front, carrying away in all about three fourths of a mile of levee embankment. These gaps are nearly closed, and the entire road-bed, for a distance of seven miles, is now under the direction of the state engineer, being raised so as to place the grade line of the embankments three-and-a-half feet above the highest flood marks, and secure, as it is believed, against all possible hazards in the future. The present condition and progress of this work—which I am only just relieved from a personal inspection of—enables me to state that the section will be again ready for the rails by the first of January next.

The cost of the work done, and materials and equipments furnished to this time is as follows:

Grading, bridging, ties of eighty-two miles (including sidings)	$760,000
Eighteen and a half miles track	148,000
Equipment	40,000
Buildings	15,000
Interest paid on state or first mortgage bonds	110,000
Engineering, right of way and contingencies	85,000
Total	$1,008,000

The above amount pays for eighty-two miles of road-bed, eighteen and a half miles of track, one locomotive and thirty cars (including passenger, express, box and flat cars) three buildings and sundry machinery. The company has no indebtedness. Respectfully,

J. E. SICKELS,
Chief Engineer, etc.

Little Rock, December 1, 1871.

Mississippi, Ouachita and Red River R. R.

Col. Jas. M. Lewis, President:

Sir—Work was begun on the Mississippi, Ouachita and Red River railroad in the month of June, 1871. To this date forty-two miles of road have been graded, bridged and furnished with cross-ties, and twenty-one miles of track—westward from Eunice—have been laid. The road is well equipped with engines and cars, and has all the necessary buildings, warehouses, water tanks, etc. It is now doing a prosperous business, transporting daily over 200 bales of cotton. This business will be largely increased by carrying the track six miles farther westward, where a temporary terminus will be established until the Saline river is bridged, and the road bed shall be completed to the town of Warren—a point sixty miles west from the Mississippi river.

The expenditures for construction, and materials, etc., have been as follows:

Grading, bridging and cross-ties	$237,000
Twenty miles track	170,000
Locomotives and cars	49,800
Buildings, tools and machinery	24,000
Interest paid on state or first mortgage bonds	85,000
Engineering, salaries and incidental expenses	45,000
Total	$610,800

The company's indebtedness will fall short of $100,000—at the same time there is due to the company nearly double this amount. Respectfully,

J. E. SICKELS,
Sup't and Chief Engineer.

Little Rock, December 1, 1871.

International (Texas) Railroad.

This road crosses the Houston and Texas Central Railway at Hearne, in Robertson County, 120 miles north of Houston, and is now completed fifty miles, passing through the towns of Englewood and Lake, in Robertson County, and Marquez and Jorrott in Leon County. Englewood, Lake, Marquez and Jorrott are situated 15 miles, 24 miles, 36 miles, and 50 miles, respectively, east of Hearne. Telegraphic communication will be opened to these places, and the mails distributed from them.

The road is being rapidly built, and will be opened for business at the successive terminal stations as fast as completed.

Passenger and Freight trains will be run daily, Sundays excepted, in connection with the Houston and Texas Central Railway, and will connect at Jorrott with Johnson and Mitchell's Stage Line for Butler, Fairfield, Palestine and points east.

The Trinity River will be reached by the 1st of February next.

Through bills of Lading will be given for freight to Houston, Galveston, and all points on the Houston and Texas Central Railway, and connections.

Property in the towns of Englewood, Lake, Marquez and Jorrott is now being sold at low prices, and every facility will be extended both to immigrants and shippers.

For information relative to Passenger and Freight business, apply to H. M. HOXIE, General Superintendent, Hearne, Texas.

Richmond, Fredericksburg and Potomac Railroad.

The negotiations in progress for some time have at last been completed, and the Pennsylvania R. R. Co. is about to come into immediate possession of the Richmond, Fredericksburg and Potomac railroad, which, in connection with the Alexandria and Fredericksburg railroad, will give them an air line from Washington to Richmond, and complete their system into the heart of the cotton States, for which they so successfully strove last winter. The absorption of the Richmond, Fredericksburg and Potomac railroad will do away with the necessity of the acceptance on the part of the Pennsylvania R. R. Co. of the charter granted last winter, and therefore release them from the various provisions to endorse the bonds (including the Piedmont and Potomac) of several contemplated roads in the State, which, it will be remembered, were incorporated into the amended charter of the Alexandria and Fredericksburg Railroad Company. The result has been anticipated for some time. Mr. Daniel, president of the Richmond, Fredericksburg and Potomac railroad, has resigned that position, and is succeeded, temporarily, by Mr. J. M. Robinson, president of the Seaboard and Roanoke Railroad Company, and son of Mr. Moncure Robinson.—*Richmond Cor. Alexandria (Va.) Gazette.*

☞ The Cape Girardeau (Mo.) *Argus* says that the cars on the Cape Girardeau and State Line Railroad will be running to the Iron Mountain Railroad by the 1st of January. It is intended to connect at the Arkansas State line, 87 miles from Cape Girardeau, with the Cairo and Fulton Railroad.

☞ The New-Jersey West Line Railroad Company has its track all laid from Summit to Bernardsville. A few days ago the engine passed over the whole distance. The passenger trains will be running about the 1st of next month.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, December 23, 1871.

Stock Exchange and Money Market.

There has been an unusual stringency in the Money line throughout the week, due in good part to speculative manipulations. The city banks have been less liberal of aid, and private lenders have been offering capital, particularly in a temporary form, with much less freedom. The city bank troubles, of which mention was made in our last, tended to aggravate the pressure, by disturbing confidence. The circulation of the broken Banks, however is secure beyond question or anxiety. The United States Treasurer will redeem every dollar issued by either Bank, having ample pledge of the Public Stocks of the United States in his own keeping, to do so. The demand for accommodation from the Stock firms has been more urgent, and extreme rates have been exacted, from 7 per cent. in gold, to as high as $\frac{2}{10}$ of one per cent. for carrying stocks over from one day to another. Only the large Government houses have had their wants provided for, on call, at the legal rate in currency. In the discount line there has been very little movement, and it has been difficult to place even choice grades of business paper, in any considerable amounts, at the nominal ruling figures, ranging from 8@12 per cent per annum.

The city banks, in their latest return, show a reduction of $1,135,000 of legal tender notes, with an increase of $2,565 000 of specie, and a falling off of $4,515,000 of deposits; also a decrease of $10,908,700 in their loan and discount averages, and $1,089,000 in their item of circulation. The city bank exchanges, last week, averaged $117,496 974; and thus far, this week, 130 millions daily. The banks now hold $8 552,125 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The Comptroller of the Currency has called upon the national banks for reports of their condition at the close of business on the 16th inst.

The specie reserve of the city banks according to the latest return is $25.751.100, against $17,-980,573 same time last year. The city bank deposits are now $217,891,300 against $192,024,391 week ending Dec. 17th, 1870 The legal tender reserve amounts to $44.532,400 against $47,442,080 same time last year. The circulation now stands at $29,033 800 against $32,154,358, same time last year. The loans are now $283,179,700, against $266,378,918 at this date last year.

The U. S. Sub Treasury increased its currency balance $1.832,634 and its coin reserve $73.981, as the result of the week's business. The receipts of the office were $9,199,640 in coin, and $4,170 940 in currency; payments, $9,125,-659 in coin, and $2,338,306 in currency. The office received $1,987,000 in coin or its equivalent, from customs; and disbursed $505,655 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,-724,491 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $369,534,500; and as security for deposits of public money, United States bonds for $15,249,000. The aggregate of the outstanding circulation of the National Banks of the country is $329,265,566.

Government revenues have been on a moderate scale, since our last. The excises yielded last week about three millions, and thus far since July 1, about 62⅜ millions. The customs at the port of New York, last week were $1,912,491; and at the outports, equal to about $650,000 more, all in coin or coin certificates.

The specie shipments from San Francisco, from Jan. 1, to Nov. 29, were $15,026,946.

Gold has been further depressed in price, by increased offerings. The demand from all sources has been comparatively moderate. Speculation has been kept in check by the Money pressure. The export drain has been light. The customs call has been limited. The range of the price during the week has been from 108¾@109⅜ and the closing quotation on Wednesday was 108⅞ against 109⅜ the preceding Wednesday. The specie outflow, last week, was $731,645; The Gold Exchange Bank clearances have averaged nearly 34½ millions a day during the week.

The specie export on Wednesday was $208,-000.

The customs demand for Gold last week, averaged $331,167 a day; thus far, this week, it has averaged $320,000 a day, or equal to a

weekly aggregate of $1,920,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $120,879, and since Jan. 1, 1871, $8,582,209 against $11,538,494 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $150,405,901 against $136,144,673 same time in 1870.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Dec. 16, 1871 $82,084,694, against $85,618,464 same time in 1870.

The export drain of specie was $731,645 last week, against $265,929, same week preceding year. The shipments since January 1, 1871, have been $63,242,985, against $57,602 220 same time in 1870.

The Assistant Treasurer at this post has paid paid out $21,130,000 gold on account of Five-Twenties redeemed altogether.

The Treasury Department on Monday held a coin reserve of $108,393,919, and a currency balance of $8,125,171.

Since December 1st, the Treasury operations have added $7.677,000 to the New York Bank averages of Gold Notes. To the outstanding Gold Notes, altogether, they have added $9,959,000. But by the deposit of Gold to the credit of the Treasury in London and in New York, by the Syndicates to the New Loan, the Coin balances have been increased from $96,256,000 to $108,393,000; so that the Secretary is now quite as strong in his Gold surplus as at the close of November.

Foreign Exchange has been quoted higher, and in fair demand, but it closes less buoyantly. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, 109¾@110.

The produce exports from this port, week ending with Dec. 20, were to the currency value of $5,338,566.

Government securities have held their own remarkably well, as to price, in the face of declining Gold, and a very tight Money market, but the dealings in all issues have been on a comparatively limited scale. The bulk of the business has been transacted through the commission houses, and for investment purposes.

Under the December programme of the Treasuary Department, Government proposes to sell gold, during the month, as follows: Thursday, Dec. 28, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday, Dec. 27, $1,000,000.

On Wednesday, Government bought in only $81,000 of Five-Twenties at 108 74@108 74¾. The amount of bonds offered was $305,100 at from 108 74@109 10.

Government it is reported will commence the prepayment of the January interest on the Public Debt, on Tuesday next, Dec. 26.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117¼@117½; U. S. Five-Twenties of 1862, (other than the bonds called in) 109½@109¾; U. S. Five-Twenties of 1864 at 109⅝@109⅞; U. S. Five-Twenties of 1865, 111@111¼; U. S. Five-Twenties of 1865 consolidated, 114@114½; U. S. Five Twenties of 1867, 115⅛@115⅜; U. S. Five-Twenties of 1868, 115¼@115½; U. S. Ten-forties at 109⅛@109⅜; U. S. Fives of 1881 (Funding Loan) 109@109¼. Six per cent. currency bonds, 118⅛@118¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 6.	Dec. 13.	Dec. 20.
Consols	92⅛	92¼	92⅛
U. S. 5-20's of 1862	92⅜	92⅜	92¼

" 1867	95⅛	96⅛	*93¾
" 10-40s	90¾	91⅛	91⅞
Erie	26¼	27⅛	27½

* Less the January coupon.

The new Funding Five per cent. Loan was quoted in London on Wednesday at 91@91¼.

State bonds have been depressed and lower, on a restricted business.

Railway bonds fair investment demand, and the more popular loans have been quite firm in price. Central Pacific Sixes have been quite scarce, and in request, closing at 102⅞@103. The Chesapeake and Ohio Sixes have been taken to a fair extent, chiefly for home investment purposes, at 94 per cent. and accrued interest.

Railway and miscellaneous share property has been less active, under the Money stringency, and prices have been quite irregular.

General business has been comparatively quiet since our last, as is usual near the close of the year. Breadstuff values have been weak and yielding. Provisions, quoted firm, as a rule. Middling upland cotton closed on Wednesday at 20 cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,186,258 bales, against 1,448,587 bales same time in the preceding year; exports 558,275 bales, against 734,997 bales in the previous year; stock at the ports at latest dates, 404,800 bales, against 473,111 bales same date 1870.

At the Live Stock Markets, Beeves have been in more demand and firmer at from 7½@16 cts.; Veals at 5@10 cts.; Sheep at 3¾@3½ cts.; Lambs at 6@9 cts.; Swine, at 4¾@5 cts. per lb., all live weight. The week's receipts were 6,445 Beeves, 616 Veal Calves, 29,692 Sheep and Lambs; and 52,218 Swine.

Foreign goods continue in moderate request at about previous rates. The week's imports of foreign goods reached $5,861,617, including $2,018,889 of dry goods.

Ocean freights have been moderately active for the season with rates quoted easier for grain, and about steady for other kinds of produce.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Erie Railway.

The gross earnings from all sources of the Erie Railway Company for the year ending September 30, 1871, were $17,168,005 16; and the operating expenses (being 72½ per cent of the earnings) $12,446,355 87—leaving the net earnings $4,721,649 29; from which deduct interest on mortgage debt, rents, taxes, insurance, etc., $3,908 603 93—leaving a balance of $813,045 36; less loss operating the Atlantic and Great Western Railway, $694,780 71—leaving a net profit of $118,264 65. It is claimed that there will be no loss the coming year by operating the Atlantic and Great Western Railway, that road having reverted to the lessors September 1, 1871; it is also stated that on account of the great coal strike, which lasted from December 19, 1870, to May 25, 1871, the company lost $973,000 on the coal account.

Georgia State Bonds.

The Legislature of Georgia, on the 9th instant, finally passed a bill over the veto of Gov. Conley, (who vetoed it upon the ground that in his opinion it was calculated to unfavorably affect the State credit) providing a committee of three, to meet in Atlanta March 1st, 1872, and sit until May 1st, to ascertain the number and amount of State bonds which have been issued, by whom sold, for what purposes negotiated, and all other facts of their history. Also that holders of such bonds, or of those having the State indorsement, issued since July, 1868, shall report the same to said committee for registration prior to April 1st, or the same shall be deemed (*prima facie*) fraudulent. The State Treasurer is prohibited from paying any interest on bonds issued and endorsed since July 4, 1868, until the said committee shall have made their report.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for October, 1871, were $777,362 96; and the expenses, $395,322 31—leaving net earnings $382,040 65, an increase over the month of October, 1870, of $8,947 13. From January 1, to October 31, 1871, the earnings were $6,343,608 43; and the expenses, $2,998,158 95—leaving net earnings, $3,345,449 48, an increase over the corresponding period of the previous year of $902,485 83. For the first fiscal year May, 10, 1869, to April 30, 1870, the earnings were $8,364,592 50; and the expenses. $5,797,098 56—leaving net earnings, $2,567,493 94. For the second fiscal year, May, 1, 1870. to April 30, 1871, the earnings were $7,333,961 35; and the expenses $3,898,724 26—leaving net earnings, $3,435,257 09. For six months of the third fiscal year, May 1, to October 31, 1871, the earnings were $4.385,964 20. the expenses $1,935,744 26, and the net earnings $2,450,219 94.

Suspension of the Virginia Funding Act.

The funding act of the late Legislature of Virginia, under which $29,000,000, or about two thirds of the State debt have already been funded, seems destined to become a bone of contention in the present Assembly of that State. The following concurrent resolutions were passed in the House of Delegates on the 16th inst:

Resolved, That until proper steps have been taken to ascertain the entire amount that will be required to pay the current expenses of the State government, and the interest on the State debt as provided for by the funding act, and the increased rate of taxation it may necessitate should the whole debt be funded, the second auditor should, and he is hereby instructed to, discontinue any further use of the new bonds until such time as these facts can be ascertained and such legislature be perfected in the premises, should any be necessary, as the public good may require.

The Senate, it is stated, will probably concur in this resolution.

☞ The Winnebago *Press* says that the Wisconsin Central Railroad, notwithstanding its efforts and rapidly accumulating rolling-stock, fails to meet the public demand in transmitting the immense quantity of goods constantly accumulating at her freight-houses in this place.

Twenty-two car loads rolled westward yesterday and several more, filled to their utmost capacity, remained behind. This is a business far in excess of the most sanguine expectations of the most visionary. But let it come, as no efforts are being spared on the part of the company to secure the immediate and prompt accommodation of all patrons.

☞ The Lancaster Railroad, from Hudson to South Lancaster (Mass.) is to be built immediately. Twenty per cent. of the stock has been paid and the contract is closed.

☞ The Boston *Journal* says that it has been definitely settled that Mr. Bullock is to retire from the position of Superintendent of the Old Colony and Newport Railroad, and that Mr. James Kendrick is to be his successor.

☞ Intelligence has been received by the financial agents of the Northern Pacific Railroad at Philadelphia, that the track of that road reached Red River at 4 o'clock in the afternoon of the 18th of December.

FIVE-TWENTY BONDS OF 1862. SECOND SERIES.

We offer and recommend the SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY as among the **safest and most desirable securities to be had in the market for the secure investment of capital.**

A small proportion only of the loan now remains unsold, and the reinvestment of the proceeds of redeemed Five-twenties should absorb them within a short time.

Present price, 94 and accrued interest.

Interest and principal payable in gold in New York City. Interest May 1 and November 1. Denominations, $1,000, $500, and $100, coupon or registered.

We buy and sell, as usual, Government and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS. Accounts of Banks, Bankers, and others received, on which we allow interest. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

HARVEY FISK. FISK & HATCH.
A. S. HATCH.

☞ At a recent meeting of the directors of the Peach Bottom railroad, (Oxford to Hanover Junction, narrow gauge,) a resolution was passed authorizing and favoring the construction of a branch road from King's bridge on the west branch of the Octoraro to Quarryville, also pledging the subscription raised between these points to the construction of this branch.

☞ John W. Garrett, Esq., has been unanimously re-elected President of the Baltimore and Ohio Railroad Company. It is stated that this company has leased for twenty years the Newark, Somerset and Straitsville railroad, extending from Newark, Ohio, the junction of the Central Ohio and the Lake Erie divisions of the Baltimore and Ohio, southward 42 miles to Straitsville, where there are important coal mines.

☞ The Providence (R. I.) *Journal* says there is a very reasonable prospect that the subscriptions to the capital stock of the Woonasquatucket Railroad will be so speedily made, and to such amount that the work will be commenced at an early day.

☞ The completion of the Lake Shore and Tuscarawas Valley Railroad to Medina, thereby connecting that town with Cleveland by rail, was celebrated on the 15th ult. The road will be completed to Dennison by the 1st of October, 1872.

☞ It is said to be the intention of the Old Colony and Newport Railway Company next spring to make North Bridgewater or Campello the southern terminus of all the special trains now running between Boston and South Braintree.

☞ The first section of the narrow gauge railroad from Leavenworth, Kansas, to Denver is nearly completed, and will be in operation before the close of December.

☞ The building of the Wolfeborough (N. H.) Railroad was let to Messrs. Wilson, Tevant & Co., of Portland, Maine.

Journal of Railroad Law.

RAILROAD COMPANIES—DELIVERY OF BILL OF LADING WITH INTENT TO PASS THE TITLE HAS THAT EFFECT, ALTHOUGH THE BILL IS DRAWN TO ORDER AND IS NOT INDORSED.

The facts in the recent case of The City Bank *vs.* The Rome, Watertown and Ogdensburgh Railroad Company, (44 N. Y., 136,) are fully and clearly stated in the following opinion by—

HUNT, C.—Many points were raised upon the trial, and argued in the Court below, that are not now insisted upon. The determination of the questions of fact was of more difficulty than the disposition of the questions of law. The latter are all that are presented for our consideration. I will take up, in their order, the objections to the recovery now presented by the counsel for the appellants.

It is alleged that the plaintiff failed to establish any title to the wheat in question, because the bill of lading was not indorsed to the plaintiff, but to C. P. Egert. If I understand the implication of the appellant's points, it is substantially conceded that the transaction amounted to an hypothecation of the wheat as security for the payment of the debt in the event that Egert failed to accept and pay the draft. In the defendant's supplemental points, it is expressly conceded that a special property in the wheat passed to the plaintiff. Three cases are cited to show that a special property will not authorize an action for its recovery. (Rawles *vs.* Deshler, 3 Keys, 572. Wait *vs* Green, 36 N. Y., 556. Ballard *vs.* Burget, 40 N. Y. 314). These cases do not sustain the position. The contrary has been held in this State many times (Dezell *vs.* Odell, 3 Hill, 215. Miller *vs.* Adsit, 16 Wend., 335. Wheeler *vs.* McFarland, 10 Wend., 318.) This title is sufficient to justify the plaintiff's claim and sustain their recovery of the value of the wheat.

I suppose, however, that the title to the wheat passed to the plaintiff by the delivery of the bill of lading. The delivery of a bill of lading with intent to pass the title has that effect, although it be not payable to "Assigns," or although if so payable, it be not indorsed. (Par. Merc. Law, 346.) The Bank of Rochester *vs.* Jones (4 Com., 47), is quite in point to this question. One Foster shipped two hundred barrels of flour from Rochester to B. P. Jones in Albany, taking from the master of the boat a simple receipt in these words:

"Received, Rochester, July 15th, 1843, of W. C. Foster, two hundred barrels of flour to be forwarded to B. P. Jones, Albany, in good order without delay, subject to forty five cents freight.

" R. D. Hannah."

To enable Foster to buy and ship this flour, it was agreed between him and the plaintiff, that the plaintiff would advance $950 for the purpose, Foster to procure the forwarder's receipt of the flour to be purchased, and leave such receipt at the bank as security for the acceptance of a draft to be drawn on Jones, the defendant. Foster delivered the draft and receipt to the bank and received the money on the draft. It was a part of the parol agreement that the flour should be held by the bank as security; that Jones should accept the draft, the bank to have the right to hold and sell the flour. If accepted, the receipt was to be for Jone's security, and the bank was to look to him. The Bank forwarded the draft for acceptance with the receipt pinned to it, which was presented to the defendant Jones, for acceptance. Jones took off the receipt, retained it and refused to accept the draft. He then sent his clerk to Utica, who there met the flour and sold it. It was held, 1. That Jones obtained no title to the flour. 2. That the discount of the draft by the plaintiff, and the delivery to it of the receipt, amounted to a transfer of the flour to the bank in trust to deliver it to the defendant in case he accepted the draft, or in case of his refusal, in trust to sell the flour and pay the draft.

It will be observed that the receipt in that case was in the name of Jones alone as consignee, with no words of negotiability, and that there was no indorsment by him. Still the mere delivery of the receipt to the bank under the circumstances transferred the title to the flour, and the bank recovered against Jones. In the case before us, it is expressly found as a fact that the bills of lading were delivered to the plaintiff as collateral security for the payment of the draft.

The appellant insists, secondly, that if the plaintiff did acquire the title to the wheat or a special property therein, it so conducted itself as to forfeit its rights as against subsequent innocent purchasers for value. This argument is based upon bringing in juxtaposition two of the findings of fact by the judge, viz: That the purchasers of the wheat paid for the same in good faith without notice of any claim thereon, and the further finding that Groundwater had from the plaintiff an implied authority to dispose of the wheat in such way, consistent with the rights of the plaintiff therein, as would enable Groundwater to raise the money to pay the drafts; but that he had no authority to dispose of it, except subject to the plaintiff's lien, and that such lien would not be discharged until the drafts were paid. The appellant argues that this is a finding to the effect that the sale was to be valid, if the proceeds were paid to the plaintiff, and void if not. He omits to consider the further finding that the plaintiff did not know that Groundwater intended to make any other disposition of the wheat than to deliver it to Egert or Burt & Co., on acceptance of the drafts, nor was Groundwater authorized by the plaintiff to make any other disposition of the wheat. Even in this limited view of the findings it is difficult to see where would be the illegality, when we remember that it is a finding not of law, but of fact, and that the findings of fact are conclusive upon us. Although such an agreement would be extraordinary, it would not be illegal. Any restrictions, negative or affirmative, may be placed upon the power of a limited and special agent. If he sells in violation of it, his principal is not bound and no title passes. But the judge finds as a further fact, that these purchasers knew that the wheat had been discharged from vessels at Cape Vincent, and they did not make inquiry for bills of lading. How could they be protected, when guilty of such neglect?

It is difficult, however, to see in what way the point insisted upon is available to the defendant. The defendent was a warehouseman, who retained and refused to deliver the wheat after notice of the plaintiff's claim, and then actually delivered it to other parties. It is the law that a carrier or a warehouseman is bound to ascertain whether a bill of lading was delivered to the shipper, and if delivered he must retain the property until it is demanded by one claiming under that title. If the purchasers or the defendants had inquired of the master of the vessel they would have learned that a formal bill of lading had been issued. They could scarcely have failed, in fact, to know what the law inferred, that the title to the goods had passed under it, and was then in some party other than the shipper.

The defendent was not a *bona fide* purchaser, nor were the purchasers *bona fide* purchasers in law. The defendant's duty as a wherehouseman, to deliver only to the party holding the bill of lading, was equally clear.

The knowledge that the title followed the bill of lading affected all parties. The absence of this document at Cape Vincent, and the failure of the purchaser to inquire for it, are conclusive that no title passed to them by Groundwater's sale.

The appellant insists, in the third place, that the leaving with the plaintiff the drafts given to Groundwater on the sale of the wheat, to be applied on his demand and their surrender by the plaintiff without consideration, together with the other facts in the case, operate as an estoppel on the plaintiff in asserting a claim to the wheat in question, as against the *bona fide* purchaser. This point in the form that the plaintiff knew that Groundwater was going to Cape Vincent to sell the wheat, and that the plaintiff consented to its sale, was urged on the trial as a matter of fact, and is discussed in the opinion below. It is not an estoppel if at all, by record or deed, creating an estoppel in law. In any event it was a question of fact, and should have been submitted as a question of fact on the trial. I do not perceive that it was presented in such form to the judge, nor do I see how he could have held it an estoppel consistently with his other findings, that the plaintiff did not know that the drafts were the proceeds of the wheat sold discharged of their lien. If the plaintiff surrendered certain drafts in ignorance of the fact that they were connected with their lien, or that they were the proceeds of the wheat, discharged of their lien, it is difficult to see how it can be, in fact or in law, a discharge of their lien.

The defendant has not the necessary facts before the Court, on which to base his argument.

The only remaining point made by the appellant's brief, is that the railroad company had not the possession of the wheat when the plaintiff demanded it. This too, is a question of fact, which does not arise upon the case before us.

Many other questions, some of them of much interest, were argued in the Court below, and passed upon in the opinion of the Supreme Court Judges, accompanying the case. They are not now insisted upon, and we are not called upon to discuss them.

The judgment should be affirmed.

Judgment affirmed.

☞ The Scranton *Republican* states that the Delaware, Lackawanna and Western Railroad Company is engaged at present in making a survey along the south side of the Susquehanna river at Binghamton, for a line of Railroad to connect the main trunk of their road at Binghamton with the Cayuga division at Oswego. The work of build-

ing the road will be undertaken as soon as the survey is completed.

Abstract of the Report of the Postmaster General.

The ordinary revenues of this department for the fiscal year ended June 30, 1871, were $20,027,045 42, and the expenditures of all kinds $24,890,104 08. The increase of revenue for the year 1871 over the year 1870 was $1,157,667 77, or 6.13 per cent., and the increase of expenditures $1,041.266 45, or 4.45 per cent., showing a net increase in revenue of $116,401 32.

The estimated expenditures for the year ending June 30, 1872, are $27,489,750; the revenues, estimated at 10 per cent. increase over last year, $22,040,749; standing appropriations for free matter, $700,000; making a total of revenue of $22,740,749, and leaving a deficiency of $4,749,001. The foregoing estimates do not include the following special appropriations in the nature of subsidies: For mail steamship service between San Francisco and Japan and China, $500,000; for like service between the United States and Brazil, $150,000; for like service between San Francisco and Sandwich Islands, $75,000; making a total of $725,000.

The number of adhesive postage stamps issued during the year was 498,126,175, representing $14,630,715. Stamped envelopes, plain, 49,954,625, representing $1,432,474 75. Stamped envelopes, "request," 48,111,650, representing $1,434,181 50. Newspaper wrappers, 6,609,000, representing $132,180. The whole number of stamps, envelopes and newspaper wrappers was 602,801,450, of the aggregate value of $17,629,551 25.

Of mail routes in operation there were 8,951, aggregating in length (exclusive of special routes) 238,359 miles, in annual transportation 107,572,794 miles, and in annual cost $11,529,895. Adding the compensation of railway post-office clerks, route agents, local agents, mail messengers, mail route messengers and baggage masters in charge of registered packages, amounting to $1,875,526, the aggregate annual cost was $13,404,921.

The service was divided as follows: Railroad routes—Length, 49,834 miles; annual transportation, 55,557 048 miles; annual cost, $5,724,979—about 10 30 cents per mile. Steamboat routes—Length, 20,334 miles; annual transportation, 4,684,778 miles; annual cost, $776,943—about 16.58 cents per mile. Other routes, on which the mails are required to be conveyed with "celerity, certainty and security"—Length, 168,191 miles; annual transportation, 47,330,968 miles; annual cost, $5,027,473—about 10.62 cts. per mile. There was an increase over the preceding year in length of routes of 7,127 miles, in annual transportation 10,547,798 miles, and in cost $644,742. Adding the increased cost for railway post-office clerks, route, local and other agents, $404,636, the total increase in cost was $1,049,378.

The foregoing statements of distance and cost do not include services for "special" offices. There were at the close of the year 2,115 of these, each with a mail carrier, whose pay from the department is not allowed to exceed the net postal yield of the office. "Special" routes and their carriers are included however, in the number of contractors and routes as given above.

The new railroad routes put in operation durthe year 1871 amounted to 6,107 miles; during 1870, to 4,190 miles; and during 1869, to 8 519 miles—making in the aggregate an addition in three years of 18,816 miles to the 36,018 miles in operation on July 1,1868. The increase in three years exceeds 38 per cent., and in the last year alone it reached the unparalleled proportion of 17 per cent.

On the route to San Francisco and back, the gratifying regularity noted in the last annual report has been fully maintained. Of 644 mails carried through, during the year ended with the month of September, 1871, to San Francisco from New York, 569 were conveyed in schedule time, and only 75 behind time, against 578 in time and 145 behind time the preceding year. Of 364 mails carried through to New York from San Francisco, 321 were conveyed in schedule time, and only 43 behind time, against 280 in time and 72 behind time the preceding year. The average time, going west, was 173 hours, or 7 days, 5 hours—nearly 3 hours less than the average the preceding year. The average time, going east, was 169 hours, 45 minutes, or 7 days, 1 hour, and 45 minutes—nearly 3 hours less than the average the preceding year. The shortest time, going west, was 162 hours; going east, 167 hours; against 144 hours, 40 minutes, going west, and 159 hours, 10 minutes, going east, the preceding year.

Between New York and New Orleans one mail a day is still sent in each direction over the Southwestern route, via Washington, Lynchburgh, Knoxville, Chattanooga, and Grand Junction, and one over the Western route via Cincinnati, Louisville, Humboldt and Grand Junction, at which last mentioned point the two routes unite and run on the same road to New Orleans. Of 357 mails carried through, during the year ended with the month of September, 1871, by the Southwestern route, to New Orleans from New York, 236 were conveyed in schedule time, and 121 behind time, against 214 in time and 149 behind time the preceding year; the average time being 93 hours 9 minutes, 29 minutes more than the average the preceding year. Of 357 mails carried through by the same route to New York from New Orleans, 224 were conveyed in schedule time and 133 behind time, against 221 in time and 142 behind time the preceding year; the average time being 95 hours 36 minutes—54 minutes less than the average the preceding year. The shortest time, going south, was 85 hours 29 minutes; going north, 85 hours; against 84 hours 54 minutes, going south, and 85 hours 30 minutes, going north, the preceding year.

Of 335 mails carried through, by the Western route, to New Orleans from New York, only 127 were conveyed in schedule time, and 228 behind time, against 121 in time and 235 behind time the preceding year; the average time being 89 hours, 45 minutes—5 minutes more than the average the preceding year. Of 304 mails carried through by the same route, to New York from New Orleans, only 70 were conveyed in schedule time, and 234 behind time, against 126 in time, and 182 behind time the preceding year, the average being 93 hours 24 minutes—5 hours, 8 minutes more than the average the preceding year. The shortest time going south was 77 hours, 30 minutes; going north, 77 hours; against 75 hours, 45 minutes, going south, and 77 hours, going north, the preceding year. These figures show a slight improvement of the service on the Southern route, and on the Western a deterioration, yet not so great as wholly to destroy its usefulness as an adjunct to the other route, on a portion of which between Washington and Chattanooga, until recently, only a single train a day was run. Arrangements are now in progress for the transmission of double daily through mails over the Southwestern route.

The number of complaints of missing letters during the year is 4,600, of which 2,057 were registered and 2,543 unregistered, containing bonds, drafts and currency, to the nominal amount of $418,748 92. Of registered letters, 659 were accounted for as received at their destination, and only 283 have been reported as actually lost. The remaining cases are in the hands of special agents for investigation.

The number of railway post-office lines in operation on the 30th day of June, 1871, was 49, extending in the aggregate over 14,208 miles of railroad and steamboat routes. Upon 8,660 miles the service is performed daily, upon 2,527 miles twice daily, and upon 21 miles four times daily, equivalent in all to 13,798 miles each way daily. Counting all the lines both ways, the aggregate service is 27,596 miles daily, and 10,072,540 miles annually. The number of clerks employed was 513, at an annual cost of $649,400, against 375 clerks, at a cost of $442,600, for the previous year, showing the increased cost for the fiscal year to be $206,800.

The total number of letters exchanged during the year, with foreign countries, was 20,295,998, an increase of 1,936,620 over the number reported for 1870. Of this number, 10,461,868 were sent from and 9,834,130 were received in the United States. The number of letters (single rate) exchanged in the mails with European countries was 14,113,560, an increase of 912 114 over the number reported for 1870. The total postages on the letters exchanged with foreign countries amounted to $1,735,266 82, being $229 298 16 less than the amount reported for 1870. The aggregate amount of postage (sea, inland and foreign) on the letter-mails exchanged with the United Kingdom of Great Britian and Ireland, Germany, Switzerland, Italy, The Netherlands, Belgium and France, was $1,181,057 41, being $264,885 19 less than the amount reported for 1870. The postage on letters sent exceeded the postages on letters received from the same countries in the sum of $5,802 15, being less than one-half of one per cent. of the aggregate amount. The postages collected in the United States amounted to $755,724 39, and in Europe to $425,333 02, the excess of collections in the United States being $330,391 37, or 28 per cent. of the entire postage receipts. Comparing the year 1871 with the year 1870, the rates of increase in the total number of letters exchanged in the mails with foreign countries was 10¼ per cent., and the rates of decrease in the amount of postages thereon was 11¼ per cent.

The cost of the United States transatlantic mail steamship service for the year 1871 was $174,138 39, being $148,153 48 less than the cost of the same service during the year 1870. The steamships employed under contract with the Post-office Department received the sea postages of six cts. an ounce on letter-mails, and six cents a pound on other matter as full compensation for the service. The earnings of the respective lines were as follows, viz:—The Liverpool and Great Western line, for 53 trips, from New York to Queenstown, $60,805 38; the Inman line, for 53 trips, from New York to Queenstown and Liverpool, $49,587 35; the Cunard line, for 49 trips, from New York to Queenstown and Liverpool, $22,178 81; the Humburg American Packet Co., for 29 trips, from New York to Plymouth and Hamburg, $20,415 69; the North German Lloyd, of Bremen, for 48 trips, from New York to Southampton and Bremen, $15,676 32; the Canadian line, for 52 trips, to Liverpool, $5,524 84, making a total of $174,138 99.

The United State postages on the mails conveyed to and from the West Indies, Mexico, Panama, South Pacific, Belize, (Honduras) Nova Scotia, Newfoundland, and Bermuda, amounted to $125,780 93, and the cost of the sea conveyance thereof was $76,857 32. The United States postage on the mails exchanged with Brazil, Japan and China, the Sandwich Islands, New Zealand, and Australia, by means of the subsidized lines of direct mail steamers, amounted to $46,993 52. The total cost of the United States ocean mail steamship service for the year 1871 (including $725,000 paid from special appropriations for steamship service to Japan and China, to Brazil, and to the Hawaiian Islands), was $975,995 71.

The report of the Appointment Office gives the following statistics: Post offices established during the year, 2407; Post-offices discontinued, 854; increase, 1553; Post-offices in operation on June 30, 1870, 28 492; Post offices in operation on June 30, 1871, 30 045; Of these 30,045 post-offices 1172 are filled by appointments of the President, and 28,873 by appointments of the Postmaster-General.

The free-delivery system of letters has been in operation during the year in 52 of the principal cities, with the following aggregate results: number of letter-carriers, 1419; mail letters delivered, 112,612,693; local letters delivered 27,045,760; newspapers delivered, 32,010,358; letters collected, 113,287,602; amount paid carriers, including incidental expenses, $1,353,923 28; postage on local matter, $758,120 78.

The number of employes in the Post-office Department on June 30th, 1871, were: departmental clerks, 331; postmasters, 30,045, and other officers, 13,045; making a total of 43,954.

The number of letters, domestic and foreign, received at the dead letter office during the year ending June 30th, 1871, amounted to 4,194,748 of which 221,673 were foreign.

Of domestic letters not registered, 16,218 contained money amounting to $59,608 37, in sums of one dollar and upward; and of the registered letters, 2359 contained $19,294 61, making a total of 18,577 letters, containing $78,812 98. Of these 17,082, containing $74,420 90, were delivered to the writers or persons addressed; 2902, containing $10,397 02, which could not be returned to the owners, were filed for reclamation; and 1495, containing $4392 08, were outstanding. The number inclosing sums less than one dollar was 14,956, containing $3808 92; of which 12,413, containing 3094 90, were delivered to the writers, and 2543, containing $714 02, were filed for reclamation.

The number of letters containing bank checks, drafts, deeds, &c., was 19,193, of the nominal value of $3 075,869 28; of which 17,905, of the nominal value of $2,855,030 31, were delivered to the owners, and 1288, of the nominal value of $220,838 92, were outstanding or filed for reclamation. The number of packages and letters containing jewelry, books, and other property was 6498, of which 4298 were delivered, and 2200 were filed for reclamation. The number containing photographs was 42,119, of which 36,544 were delivered and 5575 were filed. The number containing receipts bills of lading, &c., was 28,196, of which 27,081 were delivered, and 1115 were filed. The number containing postage and revenue stamps and articles of small value was 40,749, of which 37,889 were delivered, and 2860 were filed. The number of letters without inclosures remailed to the writers was 1,628,803, of which 1,334,303 were delivered, and 1 294 500 were returned to the office and destroyed. The number in which the writer's name and local address were omitted or were illegible, and of letters containing circulars, &c., and consequently destroyed, was 2,178,984.

Of the unmailable letters, 301,472 were detained for postage, not being prepaid as required by law. They were either wholly unpaid, were not prepaid one full rate, or were stamped with illegal or revenue stamps; 68,373 were misdirected, the postoffice, State, or some necessary part of the address being omitted; and 3518 had no address whatever.

During the last fiscal year the number of postal money-order offices in operation was 2076. On the 31st of July 1871, 376 additional money-order offices were established, so that the whole number of such offices is at present 2452.

The number of domestic money-orders issued during the year was 2,151,794, the aggregate value of which was $42,164,118 03; the number of such orders paid was 2,121,664, amounting in value to $41,705,667 03; to this sum is to be added the amount of orders repaid to the purchasers, $321 669 28, making a total of payments of $42,027,336 34, and leaving an excess of issue over payments of $136,781 72. The average amount of the money-orders issued during the year was $19 59. This amount varies but little from year to year, not having fallen below $19 for the last five years, and having only once slightly exceeded $20.

The receipts and expenditures of the last year, as adjusted and reported by the Auditor, were as follows, viz:

Receipts—Fees received for money-orders issued, $295,286 15; Amount received for premium on drafts, $277 23—making a total of $295,563 38.

Exipenditures—Commissions to postmasters and allowances for clerk hire, $177,778 56; Allowances for remittances lost in transmission by mail, $7715 00; Incidental expenses for stationery and fixtures, $8893 04—making a total of $194,881-60, and being an excess of receipts over expenditures, being revenue derived from the transaction of the money-order business, $101,181 78.

The International Postal Convention between the United States and Switzerland has been in operation since September 1st, 1869, and from that date until June 30th, 1871, a period of twenty two months, the amount of orders issued by the United States offices for payment in Switzerland, was $60-679 26, and the amount of orders paid on account of remittances from Switzerland was $32,454 45. After payment of the entire balance due Switzerland on account of this exchange, a net profit of $4521 21 accrued to the United States. The expenses proper, exclusive of the premiums paid for gold, which cost $2623 17, amounted only to $51 87.

An international system of postal money orders between the United States and Great Britain, in pursuance of a convention between the two governments, went into operation on October 24, 1871, and from that date to October 28th, a period of four weeks, the amount of orders remitted from this country to Great Britian was $63,061 18, and of orders in the opposite direction, $14 684 19.

A postal money order convention between the United States and the German Empire was signed at Berlin, July 22d, 1871, and now awaits complete ratification. By the terms of this convention, the money-order business between the two countries is to commence on October 1st, 1872.

The Postmaster General enters into a long argument in favor of the establishment of a Government postal telegraph system, and supports his positions by facts and figures derived from the experience of Great Britain since the purchase and working of the electric telegraphs by the English Government. The Postmaster General also advocates the establishment of post office savings banks, and gives tables showing to what extent the people of Great Britain, since 1861, have entrusted their money to the Government. Being convinced of the wisdom of establishing the postal telegraph and the post-office savings banks in the United States, the Postmaster General earnest y recommends the passage by Congress of the laws necessary therefor.

The Postmaster General renews his recommendation for the repeal of the franking privilege, the existence of which, he says, is utterly incompatible with an economical administration of postal affairs. He asserts that flagrant frauds have been practised during the past year, and will continue to be practised, under cover of the franking privilege, so long as it is protected by law. He also recommends the immediate passage by Congress of the bill "to revise, consolidate and amend the statutes relating to the Post-office Department," commonly known as "the Postal Code."

Debt of California.

The following statement in reference to the financial condition of California is from the Message of the Governor:

The total funded debt on the 1st day of December, 1867, was stated by my predecessor at $5,126,500. This statement, however, overlooked an item of $20.000, which would have made the total funded debt $5,146,500, independently of Indian war bonds, of which $668 78 have been paid since that date. Bonds to the amount of $250,000 were issued for the completion of the State Capitol, under the act of the last session. The present funded debt is $3,462,000, and of this amount $1,133,500 are held by the State in the School Fund, and $57,500 in the University Fund. The amount of bonds redeemed since the 1st day of July, A. D. 1869, is $856,000.

There is in the treasury at present, applicable to the redemption of bonds, the sum of $149,500, so that the funded debt of the State, after deducting the amount of cash on hand devoted to the redemption of bonds, is $3,312,500, a reduction of $1,834 000 within the past four years. At the present rate of redemption the funded debt, aside from bonds in the School Fund, would be extinguised within the next four years.

☞ The rails on the Portsmouth, Great Falls and Conway Railroad have been laid to Conway Corner.

☞ It is stated that the Pennsylvania Railroad company has leased the Memphis and Charleston Railroad for forty-five years, guaranteeing 3 per cent. annual interest for the first five years and then 6 per cent. The question of lease will be submitted to the stockholders.

☞ Subscriptions to the stock of the Woonasquatucket (R. I.) Railroad are being made so speedily that work will be begun early in the spring.

RAILROAD IRON.

300 Tons 56 lb. English Rails, slightly rusted by Salt Water, for sale by

W. H. PETIT,
72 Wall St., N. Y.

I. A. WILLIAMS'
UTICA HEAD LIGHT WORKS,
UTICA, NEW YORK.

Established 1851.

Williams' New Patent Coal Oil Head Light,
WITH BRAZED SAFETY BURNER,

Which will not take *fire* or *explode*, and is adapted to any make of Head Light Chimney. These Head Lights are either of Cylindrical or Square Form, and of first class workmanship. The Silver Plating on the Reflectors is warranted for fifteen years. They are acknowledged by all to be the best Head Light manufactured ,and are used on nearly all principal Railroads in the country.

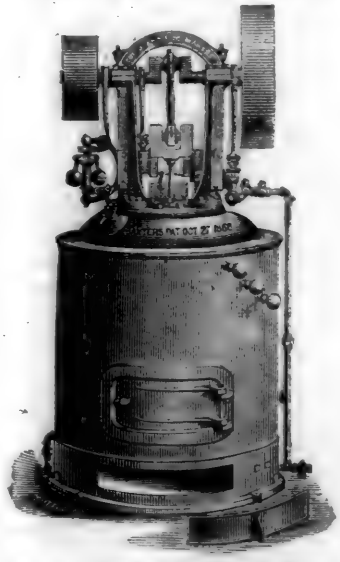
THE AMERICAN
DIAMOND DRILL CO.
ARE MANUFACTURING
Under the celebrated Leschot Patents, with important improvements,

DIAMOND-POINTED STEAM DRILLS.

ESPECIALLY ADAPTED TO

Rock Drilling
OF EVERY VARIETY.



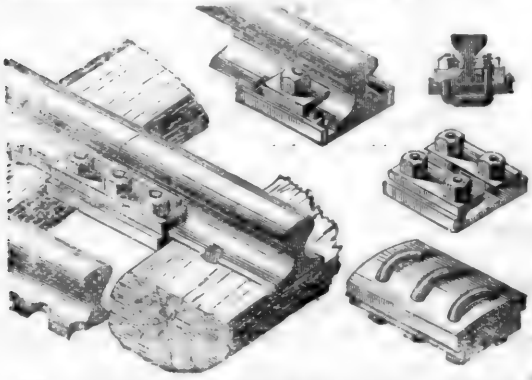
Tunneling, Open Cut and Side Work in
RAILROAD IMPROVEMENTS.

They are Driven by Compressed Air or Steam, and Bore at a Uniformly rapid rate, making a perfectly cylindrical hole, of the same size top and bottom in the hardest rock.

The economy of these Drills and their entire efficiency have been abundantly established, and the advantage of the rotary over the percussive operation very generally allowed. NO SHARPENING REQUIRED. The Drills are also adapted [in different sizes and styles,] to *Channelling, Gadding and Shafting*; also to *Deep Boring for testing the value of Mines and Quarries*. Catalogues sent upon application. Manufactured by

The American Diamond Drill Co.,
No. 61 LIBERTY ST.,
NEW YORK.

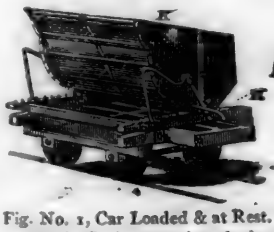
THE
Baxter Steam-Engine,
MANUFACTURED BY
COLT'S PATENT FIRE-ARMS M'F'G CO.,
HARTFORD, CONN.,



IS A SELF-CONTAINED MACHINE,
COMPACT, SIMPLE, SAFE, ECONOMICAL,
FULLY GUARANTEED.
SIZES, 2, 3, 5, 8, AND 10 HORSE POWERS.
For Circular and Price List address
The Baxter Steam-Engine Co.,
18 Park Place, New York.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.



FISHER'S PATENT
Wrought Iron
RAIL JOINTS,
MADE BY
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

DANAS & LITCHFIELD,
No. 18 William Street, New-York,
RAILROAD IRON,
of best AMERICAN, ENGLISH and WELSH make, of ORDINARY or SUPERIOR QUALITY, and of any size, weight and pattern, from WORKS, YARD or EUROPEAN Shipping port, or delivered at ports in the United States or Canadas.
and Puddled Steel Rails, Chairs, Spikes, &c.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY
A. W. RHOADS & CO.,
Wilkes-Barre, Pa.
A. W. RHOADS, N. H. CAMP.

Fig. No. 1, Car Loaded & at Rest. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

PACIFIC MAIL
Steamship Company's
LINE TO
California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
KINGSTON, JAMAICA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Dec. 30, steamer HENRY CHAUNCEY, Capt. A. G. GRAY, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall direct connecting at Panama with steamer CONSTITUTION, Capt. ———, also connecting for all Central American and South Pacific ports

Freight for last-named ports received until 4 P. M. of Dec. 28.

Steamer GREAT REPUBLIC will leave San Francisco, Jan. 1, 1872, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

Krupp's Works at Essen.

The following is an abstract of a paper read before the American Institute of Mining Engineers, by Professor Thos. Egleston :

The celebrated steel works of F. Krupp, at Essen, in Germany, cover about one square mile, one-fourth of which space is under cover. Mr. Krupp employs 10,000 workmen, 8,000 in the steel works and the rest in mines and blast furnaces. Nothing but steel is made at Essen. The cementation process is used to make steel for fine tools, but for all other purposes the Bessemer and puddling processes are employed. Ten or twelve ton ingots of cast-steel, usually considered very large are trifles here. Krupp has cast 40 tons in one ingot. The great abundance and ingenious arrangement of steam-cranes overcome the difficulty of handling such large masses.

The puddled steel is melted in the crucibles with iron made from peculiar ores, to obtain an adequate supply of which mines and furnaces have been bought in all parts of Germany. The crucibles are made by machinery, and never used more than once. In the tempering house, 100,000 of these are always on hand, in sizes to contain 20, 30, or 40 kilogrammes. Each furnace will receive 4, 8, or 12 crucibles; and the casting house may contain at one time 1,200 crucibles in furnaces. The moulds are all circular, for 60 lb. to 40 ton castings, and all served with steam cranes.

The operation of making a heavy cast is carried on with military precision, generally by signals. The place for the mould is selected and the canals are placed. At the first signal the furnaces are uncovered and the coal is taken out. At another signal, two men at each furnace seize a crucible with tongs, hook it to a bar, by which it is lifted out and set down in front of the furnace; another pair of workmen seize it and carry it horizontally to the troughs. The workmen arrive in such rapid and precise succession that as they pour the molten steel into the troughs it constitutes a continuous stream. The troughs end in a basin of reception. This work requires much nerve and a high degree of discipline in the execution of the manœuvres. Out of 100 picked men promoted to it, 40 give it up as too much for them. Castings are always made in the morning. The ingots are not allowed to cool, but stored in stalls and covered with fine coal. There was at the time of my visit, $800,000 worth of steel in ingots, more or less worked, thus stored.

The works contain over 50 steam hammers, from 120 lbs. weight up to 50 tons; there are several of 25 and 15 tons. The great 50-ton hammer is the largest in the world; it cost $580,000. The foundations are 100 feet deep in three parts, of masonry, large oak trunks and iron cylinders, bolted together. The anvil and frame rest on these, the rest of the hammer having separate foundations to save the jar. The anvil is occasionally changed or broken. The frame is of cast iron, 8 inches thick, 6 feet in diameter, 5 meters high and 7 meters wide, forming an arch above and below. An opening 1 meter in diameter leads to a staircase by which the foundations may be visited and inspected. The engine is supported by columns on the separate, surrounding foundation. The hammer head is 3.7 meters long, 1.59 meters wide and 1.25 meters thick—making 7.5 cubic meters, and weighing a little over 50 tons. The stroke is 3 meters. The lower part is cast-steel, the upper part cast-iron, poured upon the molten steel. The diameter of the steam cylinder is 1.80 meters. Everything is kept in duplicate or triplicate, to prevent detention from breakages. The head once cracked in the upper part; and the anvil frequently breaks. Four cranes, each capable of bearing 200 tons, at the four corners of the hammer, serve it with red hot masses. Krupp intends to build a hammer of 100 tons.

Before each of these cranes is a reheating furnace. These are made with hearths on wheels, so that the heavy ingots can be trundled out, the side being partly torn away for the purpose. A 40 ton ingot, for instance, is moved by chains and long rods, it being impossible to approach it nearer than six feet. All the buildings about the hammer are made extra strong. Whatever else is going on, the hammer is heard over all.

In making tyres, a six-ton ingot is cut lengthwise, then across, flattened, punched in the center, hammered round on the nose of the anvil, and turned in an ordinary tyre-mill or Ramsbottom machine. They weigh 140 to 400 lbs., and are guaranteed to run 120,000 kilometers, or about 64,000 miles. One of these tyres ran 46,000 miles before being turned off the first time. Pump-rods have been turned here 65 feet long, in one piece.

There are several cupolas in the works capable of melting 50 tons at once. A cast-iron block weighing 250 tons was made from four cupolas in eight hours.

Krupp's Bessemer department is not shown to any body. The number of convertors is variously stated. It may be eight or twelve. They are in a straight line, and served with steam cranes.

Of the remarkable excellence of Krupp's cast-steel nothing need be said.

Wilmington, Columbia and Augusta R. R.

The completion of this road to Columbia, S. C., now offers a new and more direct route, seventeen miles shorter, via Weldon, Wilmington and Columbia, to Augusta, Atlanta, Macon, Montgomery, Mobile, New Orleans and all the principal cities in the South Atlantic and Gulf States. The new road has been constructed in the most superior manner, diverges from the old route at Sumter, S. C., and extends to Columbia, a distance of 42 miles, making the entire distance from Weldon, N. C., to Augusta, Ga., 435 miles. The Wilmington and Weldon and Wilmington, Columbia and Augusta Railroads, one of the connecting links of the great through passenger route between the North and South, has been recently reorganized, and is now under one management—Hon. R. R. Bridgers, of Wilmington, N. C., president, and B. F. Newcomer, Esq., of Baltimore, vice president. To meet the reduirements of the Postoffice Department for the conveyance of the great through mails, a new double daily fast schedule will at once be put in operation, and the time between Baltimore and New Orleans greatly reduced. New passenger and drawing room coaches have been ordered, and altogether a complete reorganization of all the details of transportation has been made throughout the entire line, thus insuring to the traveling public a route unsurpassed in all its essentials of speed, safety and certain connections.

☞ The track on the Chicago and North-Western Railroad Extension is laid four miles beyond Peshtigo. The Construction Company are running a daily mixed train between Oconto and Peshtigo, to accommodate travel and freight. Over

thirty miles of track have thus far been laid on the Green Bay and Lake Pepin Railway. The citizens of Green Bay propose having a railroad celebration when the Lake Pepin Railroad is completed to New London, and the Northwestern extension to Menominee—which will be about the same time.

Pacific Railroad of Missouri.

The earnings of this road for the years ending February 28, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$1,844,661 58	$1 855,C01 77
" freight	1,699,016 83	2,021,073 47
" express	62,640 85	62,600 00
" mail	52,037 52	57.450 00
" miscellaneous	....	4,105 60
	$3,158,356 78	$3,500,230 84

The operating expenses and repairs in 1870–'71, (including $75,643 21 Eureka accident) were:

Running expenses	$1,150,404 50	
Maintenance of road and buildings	983,479 21	
Maintenance of rolling stock and machinery	438,025 76	
General expenses	32,931 98	
		2,564,841 45
Net earnings		$945,389 39

The Eureka accident, while it is properly chargeable as a loss to the contingencies of operating the road, yet is exceptional in its nature. If this be deducted from the running expenses the account would stand: total gross earnings, $3,500,-230 84; total expenses and repairs, $2,479,198 60—net earnings, $1,021,032 60. The total earnings for the previous year were $3,158,856 78; the operating expenses and repairs were $2,371,-447 94—net earnings, $776,908 84; an increase in gross earnings of $341,874 06, and in net earnings of $244 123 76. During the past year the operating expenses and repairs were 70.83 per cent. of gross earnings, and during the previous year 75.08 per cent. The amounts chargeable to the operation of the road during the past year have been due in a large measure to the expenditure in the renewal of the track and the maintenance of the roadway—expenditures which will tend to the material reduction of the cost of operating the road in several respects during some years to come. The President in his report says:

During the preceding year much had been done to improve the efficiency of the road and to provide a suitable equipment, but the change of gauge had absorbed the chief attention, and this combined with other causes, had strained the credit of the Company to the utmost, and much still remained to be done. A very large amount of new iron was imperatively required in the track, not less on the score of economy than of safety in the management of its trains, whilst new and extended side-tracks at more convenient distances were also required. Forty-one locomotives of the old gauge remained to be rebuilt and adapted to the requirements of the new gauge. The rolling stock, the full and complete repair of which had been postponed to the more pressing demands of the change of gauge, needed thorough overhauling. Many of the bridges required immediate renewal. Additional cars were demanded both in the freight and passenger departments, and the road bed itself was in need of extensive repairs of a permanent character.

Amongst the many disadvantages with which the operation of the road had been conducted, the large floating debt of the Company has been the chief. At the commencement of the year its unfunded liabilities amounted to over $1,350,000, existing in the form of a large number of notes and outstanding accounts, ranging from several hundred to many thousands—many of them contracted in the purchase of supplies, with the understanding, or at least expectation, of entire or partial renewal. The necessity of purchasing all supplies on credit compelled the payment of outside prices, whilst the daily irregular maturity of notes required extraordinary provisions for their payment of arrangement.

In the face of these requirements, the problem was presented of pursuing the temporizing system—which, whilst it might speciously exhibit a great saving of expenditure for any single year, must in the end prove poor economy—or a policy which looked to the permanent character of the work done, and its absolute value to the road, having reference to the future, not less than the immediate present.

Your Board did not hesitate to adopt the latter course, and in what has been done they have kept constantly in view the principle, which is especially true in the administration of public works, that that which is permanently done in the first instance is the best economy. Such a policy will only find its full realization when rails of steel, bridges of stone or iron and fire-proof depots take the place of the perishable materials which the necessities rather than the choice of our Western railways have imposed upon them.

Doubts existing as to the right of the Company to fund its debt by second mortgage under existing laws (since removed by legislation), your Board took immediate steps to consolidate the floating debt into larger obligations maturing at convenient periods, and to provide the means of making all purchases for cash, thereby enabling purchases to be made at the lowest cash rates—a policy which enabled your Board to carry the entire debt of the Company at an average rate of less than eight per cent.; and notwithstanding the increase of the debt occasioned by extended improvements, the total interest liability of the Company for the year is $95,411 less than on the preceding year.

The following roads are operated, or under contract to be operated, by this Company:

The Missouri River Railroad; the Leavenworth Atchison and Northwestern; the Osage Valley and Southern Kansas (Boonville); the Lexington and St. Louis; the St. Louis, Lawrence and Denver.

At the last annual meeting the matter of the leases then newly made with the Missouri River (Kansas City to Leavenworth) and the Leavenworth, Atchison and Northwestern (Leavenworth to Atchison) companies, was brought to their attention and their investigation ordered by a committee of stockholders. Having reported at a subsequent meeting of the stockholders held on the 18th of April, the whole matter was referred to the Board, "with power to take such action as they might deem best for the stockholders and the public."

Under the leases referred to (not submitted to the stockholders), the Board had obligated this Company to pay to the Missouri River Railroad Company a guaranteed annual value of $50,000 for the first five years, $70,000 for the third five years, and $80,000 for the fourth five years.

It is unnecessary to detail the entire negotiation with reference to these leases. Believing them to be exceedingly burdensome to this company and illegal (having never been ratified by the stockholders), your Board, whilst willing to make very reasonable concessions refused to act under them unless large concessions were made. The result of the course of the Board was such that material modifications were secured, reducing the guaranteed rental of the Missouri River Railroad to $50,000 per annum, and the guaranteed rental of the Leavenworth, Atchison and Northwestern to $42,500, besides securing other important modifications in the details. The leases as modified were, on recommendation of your Board, ratified by the stockholders on the 14th of June, 1870.

OSAGE VALLEY AND SOUTHERN KANSAS.

This road, better known as the Boonville Branch, has been successfully operated during the year, and its business and earnings have materially increased over those of any preceding year. During the year arrangements have been made by that company to extend their road Southwardly to Versailles in Morgan County, and thence Westwardly towards and through the Osage valley. This company has no connection with such extension.

LEXINGTON AND ST. LOUIS RAILROAD.

Extensive modifications were also secured in the leases of the Lexington and St. Louis, and the St. Louis, Lawrence and Denver Railroads, both of which are under construction, and will, when completed, be operated by this company.

Owing to financial and other difficulties, the work upon the Lexington and St. Louis Railroad has made but little progress during the year. The road-bed is almost entirely completed, and its debts nearly paid. The experience of the past having created the greatest distrust on the part of the stockholders in any contractor, an earnest application was made to this company to undertake the completion of the road.

Inasmuch as the road was to be operated by this company, and the completeness and thoroughness of the work became vitally important considerations, a conditional arrangement was made with this company to iron and finish the road upon the following terms:

The Lexington and St. Louis Railroad Company are to pay all outstanding indebtedness of the company (except one note of $93,000, secured by their first mortgage bonds), to turn over all their ties and other property, and to furnish in cash the sum of $48,000, that being the amount necessary to complete the grading of the road.

The Pacific Company then agreeing to receive the 900,000 first mortgage construction bonds of the company at seventy cents, to pay the $93,000 above referred to, and to iron and complete the road, receiving for any deficiency (if any) the second mortgage bonds of the company at forty cents. Efforts are now being made to raise the amount required to pay the $48,000 required to complete the grading and to pay the outstanding claims, in all about $130,C00, and it is believed these efforts will be successful. This road passes through the rich counties of Pettis, Saline and Lafayette, and, should arrangements be made for a convenient transfer or other connection, will furnish a route to St. Joseph and the Northwest equal to any other. It is believed that before the close of the present year the road will be in successful operation.

THE ST. LOUIS, LAWRENCE AND DENVER RAILROAD.

Owing to various causes, a modification of the terms of this lease was deemed desirable by both parties, and a new lease effected, by which the rental was reduced from $100,000 to $75,000 per annum. This lease was ratified by the stockholders on the 14th day of June, 1870.

The whole work of grading is under contract to be completed at an early period. The iron has been secured, and before the year closes it will doubtless be completed, giving our city a direct connection with Lawrence, and with the whole system of railways leading from that point to the South and Southwest, thus opening between St. Louis and Kansas another avenue of commerce and trade, and drawing closer the bonds of friendship with our young and vigorous sister State, whose future is so closely allied with ours. The construction of that link between Pleasant Hill and Lawrence will tend to shorten the line between St. Louis and Denver, and it is believed will eventually be of great value to the general business of the road.

The Board have not entered into any new leases during the past year, their entire action having been confined to the reformation and modification of those existing at the commencement of the year. Unless in very special and exceptional cases, the entire policy of leasing roads is wrong;

and more often a burden than a benefit to the trunk line. Where roads are necessary, it is better to build or to buy them, thus securing absolute and unrestricted control, and the permanent benefits accruing from extended improvements. When the roads now under construction are completed, it is believed that no occasion can arise in which any extension of this policy will be required. The system of roads then operated by this company will give it at least an equal share of the trade of the Northwest, and it will have decided advantages in the West and Southwest over any of its competitors.

The rapid settlement and growth of the country tributary to this road are matters of congratulation. Washington, Hermann, Jefferson, California, Sedalia, Warrensburg, Pleasant Hill and Holden are rapidly increasing in wealth and trade, whilst rich counties which they supply are being rapidly improved.

Kansas City has taken its rank first among the distributing centers of the West. Scarcely any portion of the State is more prosperous, and it is but just to say that the efforts of the company to promote their prosperity in its own have been appreciated by the community, and a feeling of unexceptionable good-will prevails along the entire line.

At the beginning of the year there were outstanding $555,000 of the bonds issued under the law of 1864, and known as the "Dresden bonds," all of which matured within the first month of the year. To meet those there remained unissued of the first mortgage loan only $500,000. Arrangements were temporarily made to carry the former until the latter could be disposed of. This was accomplished on favorable terms early in the year, and from their proceeds $432,500, with $48,500 from other sources, $481,000 of said Dresden bonds have been paid.

There are now 74,000 of the Dresden bonds outstanding and over-due, payable on demand. These should be provided for at an early day.

With a view to placing the finances of the company in a more satisfactory position, by funding the floating debt, the officers of the company applied to the Legislature for such amendments to the general law as would enable them to accomplish that end. Our efforts in this respect were met in a liberal spirit, and the necessary amendments secured, by which, (with the consent of the stockholders) a second mortgage may be issued. It was obtained too late to be of any service during the past year, but must engage the attention of your Board at an early day. In the opinion of your Board such a mortgage should be at once issued to an amount sufficient to fund the debt and to carry on the work of such permanent improvements as are demanded, and the provision of additional cars. The work in this direction, though carried on to the fullest ability of the company during the past year, is far from complete. Much remains to be done, and if it is to be postponed until the means can be acquired from receipts, your per centage of expenditures must continue large for a considerable period. For the first fifteen miles west of St. Louis a double track is imperatively demanded, and its extension to Franklin (thirty-seven miles) should be made at the earliest practicable moment. Over forty trains daily pass over this portion of the road. The prompt investment of the required amount now, will enable its operations to be conducted at a much reduced rate, and to save the company far more than the interest of any amount required. The highest success of the company as a commercial highway is bound up with that of the great city of the West, and in the encouragement and development of its material interests the company must labor with and often in advance of its immediate business requirements. Sharp competition with rival roads, leading from the producing regions to other business centers, will require a concession of low rates, with profits always small—perhaps at times with none. Under such circumstances the conditions of success are a credit which can command the lowest prices, a thoroughly constructed roadway, efficient machinery, and ample carrying capacity. With these fully attained, a liberal business policy will soon place the property of the company in a condition to remunerate the stockholders, whilst discharging its full obligations to the public

The length of the Pacific Railroad, from St. Louis to State Line, is 283½ miles. The leased lines are: Osage Valley and Southern Kansas, from Tipton to Boonville, 25 miles; Missouri River, from State Line to Leavenworth, 25¼ miles; Leavenworth, Atchison and Northwestern, from Leavenworth to Atchison, 21¼ miles. Total miles operated, 355. Sidings not included in the above, 50 miles.

The company have 97 locomotives, 50 passenger, 4 postal, 19 baggage and express, 42 caboose, 479 box, 304 stock, 244 flat, 61 coal, 2 magazine, 1 paymaster, and 4 tool cars.

Miles run by engines with passenger trains 812,511; with freight trains, 906,259; switching, 325,758; working trains, 168,587—total miles run, 2,213,115, at a cost for repairs of $73,575 75; wages of enginemen and firemen, $128,658 40; cleaning engines, $29,624 50; oil, tallow and waste, $23,631 77; fuel consumed, $309,712 75—total cost of engines, $565,103 17. Av. cost per mile run for fuel, 14 cents engineers and firemen 5.8, cleaning 1.3, oil, waste, etc., 1.1, repairs, 3.3—total cost per mile run, 25.5 cents.

The General Financial Statement of the company up to February 28, 1871, is as follows:

By balance from March 1, 1870, (after adjustment)		$332,953 83
Capital stock—received balance Jackson County subscription		35,000 00
Bills payable		429,329 24
Pacific Railroad bonds sold		500,000 00
Insurance—excess received over premiums paid		622 51
Uncalled for pay-rolls audited this year		8,080 58

Secretary and Treasurer.—J. C. PORTER.

Chief Eng. & Sup't.—THOS. MCKISSOCK.

Redemption of Five-twenty Bonds.

The following notice of the redemption of the Five-twenty bonds of 1862, was issued from the Treasury Department on the 20th inst:

By virtue of the authority given by an act of Congress approved July 14, 1870, entitled an act to authorize the refunding of the national debt, I hereby give notice that the principal and accrued interest of the bonds herein below designated, known as Five twenty bonds, will be paid at the Treasury of the United States, in the city of Washington, on and after the 20th day of March, 1872, and that the interest on said bonds will cease on that day, that is to say coupon bonds known as the second series, act of February 25, 1862, as follows; Coupon, second series, $50, No. 5,461 to No. 10,775, both inclusive; $100, No. 13,094 to No. 25,935, both inclusive; $500, No. 7,965 to No. 16,179, both inclusive; $1,000, No. 11,121 to No. 27,443, both inclusive; total, $16,000,000; registered, $50, No. 698 to 840, both inclusive; $100, No. 5,080 to No. 5 991, both inclusive; $500, No. 2,484 to No. 2 958, both inclusive; $1,000, No. 11,009 to No. 13,150, both inclusive; $5 000, No. 3 403 to No. 4,102, both inclusive; $10,000, No. 3,900 to No. 4,774, both inclusive; total, $4 000,000: grand total, $20,000,000. Of the amount outstanding embraced in the numbers as above $16,000,000 are coupon bonds and $4 000,000 are registered bonds. Coupon bonds of the act of February 25, 1862, were issued in four distinct series. Bonds of the first series, all of which have been previously called in for redemption, do not bear the series designation upon them, while those of the second third and fourth series are distinctly marked on the face of the bonds. United States securities forwarded for redemption should be addressed "Loan Division, Secretary's Office," and all registered bonds should be "assigned to the Secretary of the Treasury for redemption." The bonds specified in the notice of December 7th will be paid upon presentation, together with all interest due.

☞ The earnings of the European and North American Railway in November, 1871, were $25,603 74; in November, 1870, $21,196 75; and in November, 1869, $18,991 06.

American Railroad Journal.

Saturday, December 30, 1871.

Stock Exchange and Money Market.

Money has been unusually active and stringent all through the week. The speculative inquiry has been more urgent, and with lighter offerings in the open market rates have ruled decidedly against the borrowing interest, having been on call toward the close quoted up to from 7 per cent. in gold, to as high as ¼ of one per cent. for carrying stocks over from one day to another. Some few of the large Government houses have had their wants provided for, on call, at the legal rate in currency, but this has been an exceptional feature of the week's business. For mercantile credits, there has been comparatively little currency, at the nominal ruling discount figures, which have been from 8@12 per cent per annum. The various corporations, having January dividends to provide for, have been collecting their funds; and this movement, with the settlements which always attend the closing of the year, caused a good deal of shifting of loans and tended to stimulate the activety in the market. The city banks, in their last weekly exhibit, showed a marked decrease in all their averages, due largely to the fact that several banks, which are not members of the Clearing House Association were not reported in the latest statement, while they were included in the previous week's summary; and it has been announced that they will not be embraced in future returns.

The city banks, in their latest return, show a reduction of $3,314,600 of legal tender notes, $2,986,300 of specie, and $18,544,600 of deposits; also a decrease of $11,796,700 in their loan and discount averages, and $458,200 in their item of circulation. The city bank exchanges, last week, averaged $106,261,542; and thus far, this week, 93¼ millions daily. The banks now hold $7,001,925 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $22,764,700, against $18,389,756 same time last year. The city bank deposits are now $199,346,700 against $188,748,754 week ending Dec. 24th, 1870. The legal tender reserve amounts to $41,217,800 against $46,789,688 same time last year. The circulation now stands at $28,575,600 against $32,183,983, same time last year. The loans are now $271,888,000, against $264,811,129 at this date last year.

The U. S. Sub-Treasury increased its currency balance $1,628,516 and its coin reserve $402,062, as the result of the week's business. The receipts of the office were $3,561,382 in coin, and $4,106,962 in currency; payments, $3,159,320 in coin, and $2,478,446 in currency. The office received $1,625,000 in coin or its equivalent, from customs; and disbursed $2,478,446 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,356,789 of coin certificates, received for customs.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $369,652,500; and as security for deposits of public money, United States bonds for $15,249,000. The aggregate of the outstanding circulation of the National Banks of the country is $327,578,826. National gold bank circulation issued to date, $520,000.

Government revenues have been yielding moderately, since our last. The excises yielded last week about 2¾ millions, and thus far since July 1, about 65 millions. The customs at the port of New York, last week were $1,571,786; and at the outports, equal to about $525,000 more, all in coin, or coin certificates.

Gold has been quoted lower under increasing offerings, and a less confident demand, particularly from speculative sources. The severe pressure in the Money Market has been against active dealings at the Gold, as well as at the Stock Exchange. The customs call has been on a restricted scale, and the export drain, unimportant. The range of the price during the week has been from 108⅜@108⅞ and the closing quotation on Wednesday was 108⅛ against 108⅞ the preceding Wednesday. The specie outflow, last week, was $297,882; The Gold Exchange Bank clearances have averaged about 46 millions a day during the week.

The specie exports on Wednesday were $277,374.

The customs demand for Gold last week, averaged $325,000 a day; thus far, this week, it has averaged $325,000 a day or equal to a

weekly aggregate of $2,150,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $470, and since Jan. 1, 1871, $8,582,679 against $11,550,710 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $152,080,901 against $138,089,755 same time in 1870.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Dec. 23, 1871, $82,084,694, against $85,946,919 same time in 1870.

The export drain of specie was $297,882 last week, against $420,127, same week preceding year. The shipments since January 1, 1871, have been $63,762,719, against $58,246,983 same time in 1870.

The Assistant Treasurer at this port has paid paid out about 22 millions of gold on account of Five-Twenties redeemed altogether.

Foreign Exchange has been held with a fair show of firmness on quite moderate offerings of prime bills, but has been without activity. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109¼; sight bills on London, 109¾@109⅞.

The produce exports from this port, week ending with Dec. 27, were to the currency value of $4,048,894.

Government securities have been offered with unusual reserve, notwithstanding the severity of the Money pressure, and prices have been generally quoted strong and buoyant, with a fair inquiry for the long date bonds.

On Tuesday, the U. S. Assistant Treasurer gave public notice that in conformity with instructions of the Secretary of the Treasury, "called" bonds of the loan of 1862 will hereafter be accepted in any purchases of bonds that may be made at the Government office, subject to the same regulations as govern the purchases of other Five-twenty bonds.

On Wednesday, Government bought in $240,550 of Five-Twenties at 108 30@108 49. The amount of bonds offered was $278,650 at from 108 30@108 75.

Government commenced the prepayment of the January interest on the Public Debt, on Wednesday, Dec. 27.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117½@117⅝; U. S. Five-Twenties of 1862, (other than the bonds called in) 109⅛@109¾; U. S. Five-Twenties of 1864 at 109⅛@109¾; U. S. Five-Twenties of 1865, 111@111¼; U. S. Five-Twenties of 1865 consolidated, 114@114¼; U. S. Five Twenties of 1867, 115⅜@115⅝; U. S. Five-Twenties of 1868, 115⅛@115⅜; U. S. Ten-forties at 109¼@109⅛; U. S. Fives of 1881 (Funding Loan) 109@109¼. Six per cent. currency bonds, 114⅜@114⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 13.	Dec. 20.	Dec. 27.
Consols	92¼	92½	92½
U.S. 5-20's of 1862	92⅜	92½	92
U. S. 5-20s, 1865	93⅛	93⅛	93⅞
" 1867	96½	*93¾	93⅞
" 10-40s	91⅛	91⅞	91¾
Erie	27⅛	27⅛	27⅜

* Less the January coupon.

The new Funding Five per cent. Loan was quoted in London on Wednesday at 91¼@91⅜.

State bonds have been quiet, and irregular in price.

Railway bonds have been attracting more than the usual share of attention from investment buyers; and the more substantial of the older loans have been very firm in price on light offerings. Central Pacific Sixes have been in better request, closing at 103⅛@103¼. For the Chesapeake and Ohio Sixes there has been an improved investment inquiry, and the bonds have been marketing at a rate which promises the early closing out of the small remainder of the Loan (less than two millions). The price is now quoted at 91 per cent. and accrued interest.

Railway and miscellaneous share property has been moderately active, and despite the unusual Money stringency, prices though irregular, closed stronger.

General business has been comparatively tame, and values have generally favored purchasers. Middling upland cotton closed on Wednesday at 20@20⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,306,398 bales, against 1,561,924 bales same time in the preceding year; exports 626,000 bales, against 832,555 bales in the previous year; stock at the ports at latest dates, 429,178 bales, against 489,024 bales same date 1870.

At the Live Stock Markets, Beeves have been in limited demand and at from 7½@13 cts.; Veals at 4@10½ cts.; Sheep at 4@8 cts.; Lambs at 5@9 cts.; Swine, at 4 cts. per lb., all live weight. The week's receipts were 5,425 Beeves, 670 Veal Calves, 18,868 Sheep and Lambs; and 49,753 Swine. The aggregate receipts in 1871 were 374,995 Beeves, 4,377 Cows, 121,171 Calves, 1,316,408 Sheeps and Lambs, and 41,310,280 Swine.

Foreign goods continue in moderate request at about previous rates. The week's imports of foreign goods reached $5,232,039, including $1,470,789 of dry goods.

Ocean freights have been less active with rates quoted easier and irregular.

At the auction sale of Scranton Coal on Wednesday 120,000 tons were disposed of at a further reduction, the range having been from $3 42½@$5, as against $3 85@$5 25 in November.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new, Jan. and July, 24¼; do., Apl. and Oct., 22; North Caroline 6s, special tax, 12½; do. Fund Act, 1866, 24; do., 1868, 20; Louisiana 6s, Levee bonds, 62½; Mil. and St. Paul 1st mort. Railroads in California.

There are now in operation in California 902½ miles of railroad, as follows: Main Central Pacific road (to State line) 293, California and Oregon branch of same (Roseville Junction to Red Bluff) 115, San Joaquin Valley branch of same (Lathrop to Bear Creek) 58, Southern Pacific (to Hollister) 100, Watsonville branch of same 20, California Pacific (Vallejo to Marysville) 95, Napa Valley branch of same to Calister 33, North Pacific (Donahue to Healdsburg) 42, Sacramento Valley road 48, California and Northern (Marysville to Oroville) 26, San Pedro and Los Angeles 21, Stockton and Copperopolis road to Milton 48, San Rafael and San Quentin 3½ miles.

☞ At the recent annual meeting of the Norwich and New York Transportation Co., at Norwich, Conn., a committee was appointed to procure estimates for the building of a large passenger boat, to take the place of the City of New London, recently burned. The officers elected were:—President A. F. Smith, Norwich; general manager, Julius Webb, Norwich; Secretary and treasurer, H. R. Parker, Norwich.

☞ The Commissioners of the Intercolonial Railway have assured the Halifax Chamber of Commerce, that about 85 per cent. of the heaviest work on the line is in a state of great forwardness; that the rest would be rapidly pushed forward, and that the people of Halifax would have the pleasure of passing over the road early next summer.

☞ The total delivery from the mines of the Port Henry Iron Ore Company, and Witherbe, Sherman & Co's mines this season has been about 200,000 tons, which is nearly 50,000 increase on any previous year's delivery.

☞ The Clarke (Va.) *Courier* learns from a reliable source that the work of constructing the Shenandoah Valley railroad would be resumed about the first of January.

Erie Railway.

According to the report of this road for the year ending September 30, 1871, the total amount of capital stock paid in is $86,536,910; funded debt, $26,398,800, (an increase of $3,000,000). The following table shows the cost of the road and equipment:

	By last report.	By present report.
For gradation and masonry.....	$2,427,315 08	$2,480,545 57
For bridges.....	12,666 52	12,666 52
Superstructure, including iron...	3,406,046 54	3,981,773 58
Passenger & fr'ght stations, buildings & fixtures.	1,342,790 25	1,600,328 90
Engine and car-houses, machine shops, machinery and fixtures	1,837,618 83	1,858,095 20
Land, land damages and fences	572,104 03	534,779 03
Locomotives and fixtures, and snow-ploughs.	3,518,095 98	4,087,606 91
Passenger & baggage cars.....	914,023 40	989,456 15
Freight and other cars.....	4,008,468 64	4,783,374 43
Pavonia and 23d street ferries..	532,548 16	549,385 15
New York & Erie Railroad.....	55,443,905 59	86,026,350 78
Total cost of road and equipment.	$73,965,587 02	$106,904,862 22

The following statistics are furnished: Passengers carried, 3,509,208; freight, 4,844,208 tons; average speed (with stops), 20 miles per hour; (in motion), 26 miles; express, 30 and 40 miles; coal carried, 2,199,418 tons; expended for repairs, building, etc., $3,432,948; repairs of machinery, cars, etc., $2,854,644; office expenses, agents, conductors, damage to property, etc., $411,502.

The earnings were $17,168,005—$3,247,667 of which was from passengers and $13,282,235 from freight. The net earnings amounted to $118,264. 182 persons were killed on the road and 131 injured.

☞ The Wilmington and Western Railroad, connecting Wilmington, Del., with Oxford, Chester county, Pa., is progressing, and it is thought the grading will be completed by spring as far as Ladenburg.

☞ The Jacksonport (Ark.) *Statesman* says that the engineers of the Memphis and Kansas City Railroad have made the preliminary survey from Batesville to Jacksonport, and located the bridge just below Paroquette Bluff.

☞ The Directors of the Miramar (Pa.) Railroad Company at a recent meeting resolved to change the name of the corporation to that of the Harrisburg and Potomac Railroad Company.

☞ The trains on the Sunbury and Lewistown Railroad are now making connection with the trains on the Northern Central Road.

☞ The survey of the Berks County (Pa.) Railroad will be completed in about two months, and the work will then be put under contract.

☞ The Pennsylvania and Delaware Railroad, from Pomeroy to Delaware Bay, has now most of the grading and masonry completed,

☞ REDEMPTION OF FIVE-TWENTIES OF 1862.

SECOND SERIES.

Further calls of the second and subsequent series of the Five-twenties of 1862 will doubtless follow during the coming year.

The recent relative market values of called and uncalled Bonds show that HOLDERS CAN REALIZE A BETTER PRICE FOR THEIR BONDS BEFORE THEY ARE CALLED IN THAN AFTERWARD.

Holders of ALL FIVE-TWENTIES OF 1862, and especially of the SECOND SERIES, will therefore do well to consider the subject of reinvestment in a more permanent form without delay.

The amount of really first-class and absolutely safe six per cent. Gold Bonds, which can now be had at anything less than par, is very limited. Prominent among them are the SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY, which we offer and recommend, *believing them to be as absolutely safe as the Bonds of the Government.* Less than $2,000,000 now remain unsold, and they will be rapidly taken up. Present price, 94, and accrued interest. Interest and principal payable in gold in New York City. Interest May 1 and November 1. Denominations, $1,000, $500, and $100—coupon or registered.

We buy and sell, as usual, GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS. Accounts of Banks, Bankers, and others received, on which we allow interest at the rate of four per cent. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

Union Pacific Railroad.

The following is a statement of the Land Department of the Union Pacific Railroad, November 1, 1871:

Total land grant bonds issued....		$10,400,000 00
Less cancelled by land department.....	$908,000	
Less bought by trustees..	201,000	
		1,109,000 00
Bonds outstanding Nov. 1, 1871 ..		$9,291,000 00
Land notes on hand (interest not included) applicable to redemption of bonds.....		944,587 74
Leaving bonds to be provided for out of lands.....		$8,346,412 26
Total sales of lands to Oct. 31, 1871, 480,141 29 acres for.....		$2,030,881 88
Average per acre.....		$4 28
Lands unsold, 11,579,858 71 acres.		

☞ The Southern Ohio Railroad Company has been incorporated with a capital of $3,000,000. This road runs from Huntington on the Ohio River, up Symmes Creek, through Lawrence, Gallia, Jackson, Highland, Pike, Clinton, Warren and Green counties, to Dayton, Ohio, and will be a valuable feeder to the Chesapeake and Ohio trunk line eastward.

☞ The Camden and Amboy Railroad and Delaware and Raritan Canal Companies the New Jersey Railroad and Transportation Company, and the Philadelphia and Trenton Railroad Company have each declared a dividend of seven per cent., payable January 2, 1872.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR DAMAGE DONE BY CINDERS FROM STEAM ENGINE WITHOUT PROPER SCREEN.

The facts in the late case of Bedell vs. The Long Island Railroad Company, (44 N. Y., 367), are as follows:

The action was brought to recover damages for the alleged burning, by the defendant, of the plaintiff's dwelling house, situated in the village of Hempstead in Queens County, on the 23rd day of October 1865.

The defendant, on that day, was running a dummy engine on the Hempstead branch track, that track being the property of the defendant, and connected with its main road. The track runs over Main street, in a northerly direction from Hempstead village. The plaintiff's house was on the northeast corner of Main and Jackson streets on the west side of the railroad, 32½ feet from the track.

On the day in question the engine passed the house on an up trip about 12 o'clock, and a few minutes after the house was discovered to be on fire on the easterly slope of the roof near the eaves.

The house was entirely consumed, together with some of the furniture.

The engine had formerly been guarded by a spark catcher or screen on top of the smoke pipe; this had been removed for some weeks, during which time sparks and ignited cinders of a considerable size had been thrown in profusion from the engine while in motion, setting fire to fences, and on one occasion flying over the top of the house next south of plaintiff's, and setting fire to it on the west side; and on the morning in questions cinders and coals had been thrown upon the stoop of the last named house.

The fuel used in the engine was oak and pine wood.

A day or two after the fire, a screen was put on the smoke pipe, and kept there until coal was substituted for wood.

The fire in the engine was but a few feet from the top of the smoke pipe.

There was no fire in the plaintiff's house, except a moderate one in a stove in the extreme west end of the extension, on the west side of the main house. The other material facts appear from the opinion of the Court.

The jury rendered a verdict for the plaintiff. The defendant appealed to the General Term of the second district, and from affirmance there to this Court.

The following is the opinion of the Court delivered by—

EARL, C.—The only grounds upon which we are asked to reverse that judgment below are, that there was no proof of negligence, and hence that the plaintiff should have been nonsuited; and that improper evidence was received by the judge at the trial, as to the value of the dwelling-house.

1. The mere fact that large sparks were emitted from the engine in such profusion and were carried to such a distance, as to set fire to adjoining fences and buildings, is sufficient to show that there was some carelessness, as common observation and experience show that engines can be and are run through the country without such dangerous consequences. There was, however, evidence that a spark arrester had been used upon the smoke pipe of this engine before and after the accident, and that while thus used there was no damage from the sparks. The spark arrester had been left off for some weeks before the accident, and this furnished some evidence of negligence. It matters not that it were not common to use the spark arrester upon dummy engines. It is enough that the evidence tended to show that this engine could not with safety be run near dwellings without this appendage, and that it could be with it, and hence ordinary prudence required its use. It is sufficient upon this branch of the case that there was some evidence from which the jury could properly infer negligence in the care management or construction of the engine.

2. To the witness Clomes, who was a carpenter, and knew plaintiff's house, had been in the kitchen of it and knew the dimensions, location and general appearance, the following questions were put by plaintiff's counsel: "Assuming the house to have been very plainly finished in the inside, and to have been partly built in 1814, and an addition made to it in 1836, and taking what you know of the condition of the house in your opinion what was the value of the house?"

To the witness Wells, who was a carpenter, assisted plaintiff in building an addition to his house in 1836, and was then all through the house outside daily after that and knew its condition outside but not inside, at the time of the fire, the following question was put by the plaintiff's counsel: "What in your opinion was the fair value of the house just prior to the fire?"

To the witness Brown, a carpenter, who testified that he knew the house, had seen it but little, and that the house was in good condition at the time of the fire, the following question was put. "Supposing the old part to be of oak and the new of pine, lathed and plastered, finished in a plain and substantial manner, and the timber of an ordinary size and amount what was the fair value of the building on the day of the fire?"

To each of these questions there was a mere general objection, without specifying any grounds, by defendant's counsel, and the court overruled the objection and permitted the witnesses to answer.

I do not think these objections furnish any grounds of error.

While the acquaintance of the witnesses with the house was not very minute and exact, yet they had a general acquaintance with the house, and could form some estimate and give some opinion as to its value. There is no rule of law, and there can be none, defining how much a witness shall know of property before he can be permitted to give an opinion of its value. He must have some acquaintance with it, sufficient to enable him to form some estimate of its value, and then it is for the jury to determine how much weight to attach to such estimate. Here the witnesses were carpenters and had a general acquaintance with the house; they knew its shape, location, external appearance, and to some extent, its internal condition; and the court did not err in allowing the opinions of its value to go to the jury for what they were worth.

If it was claimed, as to either of the questions, that it was incompetent for assuming facts not true or not proven, such ground of objection should have been specified, that the requisite proof might be given or the questions modified.

The judgment should be affirmed with costs.

Judgment affirmed.

Utilization of Coal Dust.

The Committee on Science and the Arts, constituted by the Franklin Institute of the State of Pennsylvania, for the Promotion of the Mechanic Arts, to whom was referred for examination specimens of artificial fuel prepared by MR. E. F. LOISEAU, of Philadelphia, report that they have made trials of the samples produced from anthracite and from bituminous coal.

The mode of manufacture, as related by Mr. Loiseau, is as follows:

1st. Anthracite small coal and dust were mixed with seven per cent. of clay, and compressed into cylindrical moulds about 4½ inches in diameter and 4 inches deep, or else into spherical masses, about 3 inches in diameter.

2d. The moulded masses are placed, for a few minutes, in a bath of benzine in which rosin has been dissolved, and from which they are removed and dried by an exposure to a current of air.

The object of coating them with a film of rosin is to prevent the absorption of moisture and consequent softening of the clay; the solution in benzine penetrates the mass of coal and clay to a depth of about ¼ of an inch and so efficiently closes the crevices that samples immersed in water for twelve hours were found dry in the interior when broken up for examination.

Both the anthracite and bituminous fuels were burned in a furnace measuring nine inches in diameter and seven inches in depth, each variety of fuel burned freely and was completely ashed, but the intensity of the combustion was less than that produced by anthracite or bituminous coals of small size burned in the same furnace.

These comparisons were made with a moderate and also with a strong draft.

The average amount of ash obtained from the anthracite artificial fuel was 16 per cent. and from the bituminous artificial fuel was 18.5 per cent.

The heating powers as obtained from trials in Thompson's apparatus are as follows:

One pound of anthracite artificial fuel evaporated	4.30 lbs. of water.
" "	8.50 lbs. of water.
" "	7.86 lbs. of water.
" "	6.76 lbs. of water.
An average of	6.85 lbs. of water.
One pound of bituminous artificial fuel evaporated	9.25 lbs. of water.
" "	11.11 lbs. of water.
" "	12.88 lbs. of water.
" "	10.61 lbs. of water.
An average of	10.99 lbs. of water.

The anthracite average is 7.40 lbs. of water.

The non-uniformity of result is partly due to the imperfect manipulation in mixing the coal and the clay, and partly to the varying amounts of solution of rosin absorbed in the bath to which the material is subjected. The imperfect manipulation can be remedied by the adoption of proper machinery for that part of the process.

The ability of the artificial fuel to bear transportation is less than that of anthracite, or good lump bituminous coals, but the structure is firmer than that of many bituminous and semi-bituminous coals that are carried to market. The masses will generally break up with a fall of three feet, upon a stone pavement, but are strong enough to bear ordinary handling and transportation, and should they become broken would suffer no damage, unless exposed to wet.

The samples of artificial fuel examined are well adapted for use for purposes in which great intensity of combustion is not desired.

For the production of steam in stationary boilers, and for household purposes it can be employed equally as well as any ordinary coal; and whenever the cost of preparation is less than the cost of mining coal, this invention will make

available the immense amounts of small coal now allowed to remain useless at the coal mines. It appears to work far better than the balls or bricks of coal dust and clay and lime that came into vogue in this city many years ago, when anthracite was brought to market without preparation by the coal breaker, which had not then been invented, the balls or bricks thus made not having the protection from wet secured by Mr. Loiseau by his resinous coating.

We consider the method of preparing artificial fuel from waste anthracite and bituminous coals, as presented by Mr. E. F. Loiseau, as ingenious and well adapted to the purpose, and worthy the attention of those interested in the production of a cheap fuel, adapted to a great variety of uses.

Respectfully submitted.

CHARLES M. CRESSON,
WILLIAM H. WAHL,
JOHN WISE,
} Sub-Committee.

Philadelphia, Dec. 19, 1871.

Detroit River Tunnel.

A large coffer dam, about 40 feet square, was constructed. Immense piles were driven down, in double rows, upon which were securely bolted six-inch planks also in double rows, thus making an immense box, or sheathing, of wood, a foot thick. Hard blue clay was then filled in, and a solid pier constructed. Through this newly-made land the shaft is to be sunk.

The shaft itself is a massive one of iron, weighing eight tons. Its diameter is 15 feet, its thickness nearly two feet. The water was found to be about 50 feet deep, and the shaft is to be sunk a distance of over 50 feet before the drainage tunnel will be commenced. It has been placed in position, and upon it the brick work has been built to a height of 10 feet. Owing to the frost and necessity of rendering everything perfectly solid and impervious the bricks are laid in asphalt. A temporary structure has been erected over the whole ground, and within fires are kept up continually that the frost may not penetrate the earth. Some twenty men are constantly employed. The base of the shaft is larger than the top, so as to allow of the passage of the same through the ground. By this there is less friction to overcome, and the earth around the shaft is much more easily loosened and broken.

The great weight of the iron base and the additional weight of the brick work will gradually sink it to the required depth. At what rate of progress this can be done it is impossible to say at present, as the shaft has yet hardly made more than an impression. The sinking is, of course, a comparatively easy matter. The real difficulties commence when the bottom is reached. The first movement, then, is to excavate the drainage tunnel. This will be 25 feet lower than the main tunnels at their respective entrances, and will lie between them. From both the Detroit and Windsor sides this tunnel will approach a gradual elevation to the centre, at which point it will be but slightly below the main tunnels. It will have a diameter of five feet, and be connected with the others by iron pipes.—*Detroit Post.*

Riviere du Loup Railway.

The route of this proposed line is on the eastern side of the River St. John, commencing at St. Mary's, opposite Fredericton, passing through the valley of the Keswick, at a short distance from Woodstock, thence to Grand Falls, with its termination at Little Falls, abont 160 miles from Fredericton, and 228 from St. John, N. B. The Province of Quebec will have some seventy miles to construct from the boundary line to Riviere du Loup, and then there will be a continuous line to St. John, the commercial capital of New Brunswick, from the upper Provinces. The gauge is to be 3 ft 6 in. The company are allowed by the Amendment Act until May, 1873, to make their surveys of the line, and until May, 1874, to commence construction. The time in which the whole railway is to be completed, under the Act is limited to May, 1879. By the terms of the Act of Assembly, passed in April, 1870, to aid the construction of this line, the Government is to give a bonus of 10,000 acres per mile to the company, the first 25,000 acres of which are to be granted when $100,000 shall have been expended in actual work on the railway. The lands to be granted are located in the Counties of York, Carleton and Victoria, and, besides being in themselves of great agricultural and manufacturing value, they will have their worth very much enhanced by the road in aid of which they are to be granted. The city councils of York and Carleton have already granted aid to the amount of $100,000 each, the former taking stock to that amount and the latter giving their grant as a bonus, and the Sessions of Victoria has guaranteed $50,000. The city of Fredericton, and the New Brunswick and Nova Scotia Land Company take $25,000 each in stock. It is quite probable that aid will be asked from the city of St. John, and when the matter, as it now stands, is fully presented to the public, there is little doubt that the proposition will be favorably entertained.—*St. John Telegraph.*

Commerce of New York.

The foreign imports at New York for the month of November, 1870 and 1871, are officially stated as follows:

	1870.	1871.
Entered for consumpt'n.	$14,004,294	$13,123,708
Do. for warehousing	9,886,963	9,371,091
Free goods	1,491,905	1,609,142
Specie and bullion	2,734,075	33,779
Total entered at port	$28,117,237	$24,137,720
Withdrawn fr. wareh'use	6,325,530	9,005,491

The foreign imports at New York for the eleven months from January 1, were:

	1870.	1871.
Entered for consumpt'n.	$158,014,497	$195,643,997
Do. for warehousing	110,186,682	131,039,797
Free goods	12,666,091	26,493,931
Specie and bullion	11,533,106	6,226,407
Total entered at port	$292,400,376	$359,404,132
Withdrawn fr. wareh'se	106,063,953	118,492,610

The revenue from customs at New York for eleven months from January 1, has been as follows:

	1870.	1871.
Six months	$67,581,811 10	$73,692,107 93
In July	10,592,841 37	11,934,957 33
August	15,078,512 90	16,932,839 65
September	14,182,516 12	15,733,891 86
October	11,161,364 60	12,066,671 28
November	9,017,823 32	9,365 044 55
Eleven months	$127,614,869 41	$139,725,512 60

The exports from New York to foreign ports in the month of November, were:

	1870.	1871.
Domestic produce	$24,125,836	$18,603,795
Foreign free goods	1,963	64,464
Do. dutiable	785,553	564,328
Specie and bullion	4,896,257	2,124,539
Total exports	$29,809,609	$21,357,126
Do. exclusive of specie	24,913,352	19,232,587

The exports from New York to foreign ports for eleven months from January 1, were:

	1870.	1871.
Domestic produce	$166,566,411	$206,774,248
Foreign free goods	836,763	1,076.418
Do. dutiable	9,202 238	7,043,587
Specie and bullion	56,240,596	61,831,354
Total exports	$232,346,003	$276,725,607
Do. exclusive of specie	176,105,407	214,894,253

☞ The Midland (Canada) Railway Company ask for tenders for the remainder of their line from Beaverton to Orillia and Midland or Hog Bay on the Georgian Bay. The office of the company is at Port Hope, Ca.

New York Central and Hudson River R.R.

By a despatch from New York we learn that the completion of the Grand Central depot and the facilities it affords, has enabled Vice-President WM. H. Vanderbilt to perfect the organization implied by the consolidation of the Hudson River and New York Central Railroads. Mr. Vanderbilt now becomes the head of the consolidated companies, and hereafter the directing influence will be fixed in New York city. Mr. Edwin D. Worcester, Treasurer of the late Central Railroad, resigns that position and accepts the office of Secretary of the consolidated companies, vice Augustus Schell resigned. By this arrangement, Charles C. Clarke, for many years Treasurer of the Hudson River Railroad, becomes Treasurer of the consolidated companies. Mr. Druliraa continues the General Freight Agent and will remain in this city, as will also Mr. Utter, Comptroller of real estate, rents and taxes. Auxiliary to the New York management, ex-Senator Henry R. Pierson has been invested with the duty of Managing Director at this city. For the present Mr. Tillinghast is charged with the responsible duties of General Superintendent of the division west of this city, while Mr. Toucey has entire charge of the Grand Central depot at New York, its connections and line east of this city, and incidentally of the two bridges spanning the Hudson river here. C. H. Fisher is designated as Chief Engineer. The promotion of Mr. Worcester will be exceedingly gratifying to the numerous Albany friends of that gentleman, while the continuance of Mr. Pierson in his responsible position is a deserved compliment to a worthy and capable officer. Mr. Tillinghast's retention as Superintendent of the Central division is to be expected, as a matter of course. The General Office of the Company will still remain in this city, with which the interests of the road have been so long identified. It has always been fortunate in the selection of its officers, but never more so than now.—*Albany Journal.*

Canada Southern Railroad.

The work of constructing the Canada Southern Railway has been pushed forward during the past season with a remarkable degree of energy. Between Fort Erie and Amherstburg, on the Detroit river, 200 miles of this road will be completed by the 1st of January next. The bridges for the main line are nearly completed, and those for the St. Clair division will be shortly ready for erection. The entire grading and bridging will be completed and the road ready for the track by early spring. The main line is to be laid with the best English steel rails, of sixty pounds weight to the yard, and are to be laid with fish joints and chairs. As soon as navigation opens next spring the steel rails will be delivered, and it is expected that the road will be completed and open for business during 1872.

☞ The Directors of the Northern Extension of the Rochester, Nunda and Pennsylvania Railroad Company, organized in Rochester, will complete a chain of narrow-gauge railroad to extend from that city up the west side of the Genesee Valley, through Scottsville, Caledonia, York, Moscow and Cuyler to Mount Morris, and thence up the Cashequa Creek to Nunda, and thence through Angelica, Belvidere and other towns to Portville, near the Pennsylvania line, where it connects with a road of the same gauge extending sixty miles into the coal regions.

☞ Hon. Sobieski Ross, of Condersport, Perry county, Pa., has after three months' negotiations with the Pennsylvania Railroad Company, secured the transfer of the charter of the Jersey Shore, Pine Creek and Buffalo Railway to parties who have agreed to build the road. Mr. Ross gives assurance that the work will be pushed to a speedy completion.

Oil Creek and Allegheny River Railroad.

A meeting of the stockholders of this company was held in Philadelphia on the 19th inst., for the purpose of considering and acting on articles of consolidation and merger of the Union and Titusville Railroad Company with the Oil Creek and Allegheny River Railway Company. The stockholders adopted the merger by a unanimous vote.

The Oil Creek and Allegheny River Railway runs from Union along the Allegheny river to Oil City, from there to Petroleum Centre and up Oil Creek to Titusville, and thence to Corry.

The Union and Titusville Road runs from Titusville to Union, a distance of twenty-five miles, and there connects with the Atlantic and Great Western and Philadelphia and Erie Railroads, the road having three rails, thereby accommodating the wide and narrow gauges.

The acquisition of the Union and Titusville Railroad, it is said, will enable the Company to do business fifty per cent. cheaper than over the branch to Corry. The Pittsburgh connections with Buffalo occupy the Corry branch. The Union connection affords direct communication with Erie and the Lakes. The maximum grade is some forty feet to the mile less than the one running to Corry.

The capital stock of the Union and Titusville Railroad is $700,000, bonded for $500,000. The dividends are to be the same as the Oil Creek Company, viz: ten per cent.

This gives the Oil Creek Company nearly two hundred miles of single track. The passenger traffic on their road is $1 000 a day.

Baltimore and Drum Point Railroad.

The Calvert *Journal* says that the engineers are pushing the survey of this road through the Second and Eighth Election Districts of Anne Arundel county. In passing through the thickly wooded parts of the country they experienced some difficulty, but they have now reached a more open country and are advancing rapidly towards the Calvert line. They pronounce the country through which they have passed advantageous for grading and the construction of a cheap road. On the completion of this road connections will be formed by ferry steamers with several of the Eastern Shore railroads, thus making Anne Arundel county the great thoroughfare of travel for all the lower Eastern Shore counties to Baltimore.

Union Pacific Railroad Terminus.

The Executive Committee of the Union Pacific Railroad Company have, in consideration of the delivery of certain Douglass County bonds and depot grounds at Omaha, on the 1st day of January, by that city, resolved to make that place the actual terminus of the Union Pacific Railroad, to make up all trains bound West at that point, to build and retain all the depots, general offices and land department of the Company at that point, and to transfer cars of connecting roads without delay or discrimination. This action settles a long existing controversy between Council Bluffs and Omaha as to which would be the terminating point of the road.

☞ The officers of the Haliburton (Canada) Railway recently elected, are; J. D. Armour, Cobourg, President; Jas. Hall, Peterboro, Vice-President; Chas. Perry, Secretary; John Fowler, Managing Director; J. H. Dumble, Chief Engineer; W. J. Fowler, Treasurer; E. Burnham, Solicitor.

☞ Mr. J. B. Cunningham, of Nashua, N. H., has been engaged to make a survey of the new railroad route from that city through Hudson, Pelham and Salem to Plaistow, where it will connect with the Boston and Maine road. Distance 18 miles.

☞ The last rail between Willimantic and Putnam, on the Boston, Hartford and Erie Railroad, was laid on the 19th inst.

Russian Railways.

The opening of a new line from Smolensk to Brest is expected to produce a complete revolution in the relations between Central Russia and Western Europe, as the distance over which goods will have to be conveyed will be reduced by one-sixth. The distance between Bromberg and Moscow *via* Eydtkuhmen and St. Petersburg is 1,852 verstes, while by Warsaw and Smolensk it is only 1,503 verstes. The abbreviation of distance between Vienna and Moscow is more considerable still; by St. Petersburg it is 2,307 verstes, and by Warsaw 1 888 verstes only. A commission left St. Petersburg in November charged by the Minister of Means of Communications with the duty of inspecting two new lines just completed for traffic, with a view to the working of trains being commenced upon them. These two new lines are the Warsaw and Rostow and the Nikitskoy, a branch from the Donets Collieries to to the Azow line. The Breslau and Warsaw has obtained authority from the Russian Government to extend its line from the Russian frontier *via* Seradz, as far as Ludza: it is authorized at the same time to establish a branch from Seradz to Kalisch. The Russian Government has granted a concession of a new line from St. Petersburgh to the *embouchure* of the Neva, where it is proposed to construct a great port with docks and warehouses. A great bridge has been constructed over the Dnieper to carry the Krementchug and Kroukow over that river: this fine work is no less than 3,200 feet in length.—*Herapath.*

☞ About a year ago the Philadelphia, Wilmington and Baltimore Railroad Company began the alteration of the bed of their roads between Chester and Philadelphia, so as to avoid the damage and interruption of travel by the freshets of the Delaware. This is known as the Darby improvement. It is expected to be ready for the cars by July next. The estimated cost of the improvement is $1,500,000.

☞ It is officially announced that the Commissioners of the Sinking Fund of the Commonwealth of Pennsylvania have paid off of the State debt, for the year between December 1, 1870, and December 1, 1871, $2,131, 590 81, of which $394,043 63 were of 5 per cent. loan, $1,719,150 of 6 per cent. loan, $35 of old "relief notes," and $18,361 54 of over-due loans.

☞ The contract has been signed for the construction of the first section of the southern extension of the Wellington, Grey and Bruce Railway. The first sod was formally turned on the 16th inst., at Listowell.

☞ The bonded debt of the City of Chicago is stated by Mayor Medill at $14,103,300, and the floating debt at $687,000. The city's loss by the fire he estimates at $2,509,000.

☞ The directors of the New York and Long Branch Railroad are pushing the work earnestly, and have already commenced building the bridge over the Raritan River, near Perth Amboy.

☞ Between five and six miles of the Princeton extension of the Sheboygan and Fond du Lac Railroad have been supplied with iron. Track laying is progressing quite rapidly.

☞ The engineers are at work locating and grading the extension of the Lehigh Valley Road from Easton to Perth Amboy.

☞ Trains are now running on the New Jersey West Line Railroad between Baskingridge and Summit.

☞ The government commissioners appointed to examine so much of the Missouri, Kansas and Texas Railroad as is completed in Indian Territory, have made a favorable report. They say that the bridge across the Kansas river is nearly completed; that the ties are now delivered, and the iron will soon be laid to Canadian river.

☞ The track of the Manitowoc, Appleton and New London (Wis.) Railway is laid to the distance of twenty-five miles from Manitowoc.

RAILROAD IRON.

TRAUTWINE'S

CIVIL ENGINEER'S POCKET-BOOK.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

THE AMERICAN DIAMOND DRILL CO.

ARE MANUFACTURING

Under the celebrated Leschot Patents, with important improvements,

DIAMOND-POINTED STEAM DRILLS.

ESPECIALLY ADAPTED TO

Rock Drilling

OF EVERY VARIETY,

Tunneling, Open Cut and Side Work in RAILROAD IMPROVEMENTS.

They are Driven by Compressed Air or Steam, and Bore at a Uniformly rapid rate, making a perfectly cylindrical hole, of the same size top and bottom in the hardest rock.

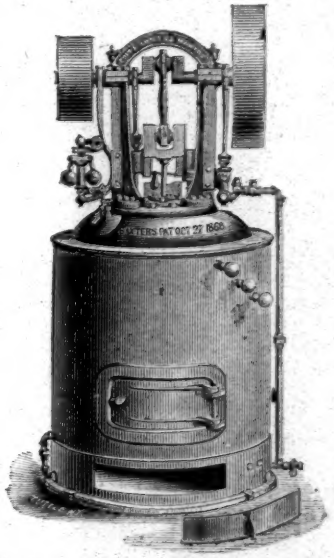
The economy of these Drills and their entire efficiency have been abundantly established, and the advantage of the rotary over the percussive operation very generally allowed.

NO SHARPENING REQUIRED. The Drills are also adapted [in different sizes and styles,] to *Channelling, Gadding and Shafting*; also to *Deep Boring for testing the value of Mines and Quarries*. Catalogues sent upon application. Manufactured by

The American Diamond Drill Co.,

No. 61 LIBERTY ST.,

NEW YORK.



THE

Baxter Steam-Engine,

MANUFACTURED BY

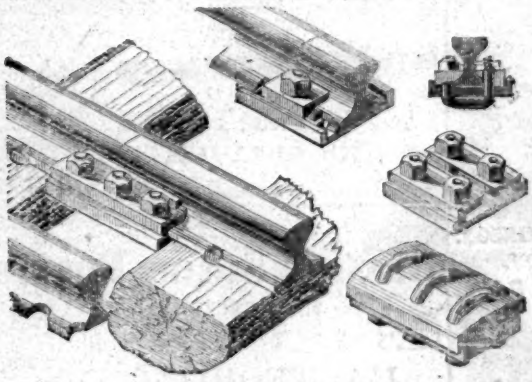
COLT'S PATENT FIRE-ARMS M'F'G CO.,

HARTFORD, CONN.,

IS A SELF-CONTAINED MACHINE, COMPACT, SIMPLE, SAFE, ECONOMICAL, FULLY GUARANTEED.

SIZES, 2, 3, 5, 8, AND 10 HORSE POWERS.

For Circular and Price List address

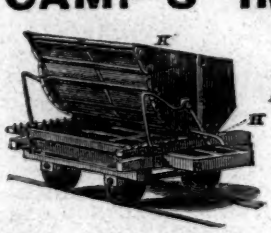


The Baxter Steam-Engine Co.,

18 Park Place, New York.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.



FISHER'S PATENT
Wrought Iron
RAIL JOINTS,
MADE BY
